TITLE 46—SHIPPING

Chapter I—Coast Guard, Department of the Treasury

[CGFR 51-20]

LIMIT SWITCHES AND EMERGENCY DISCONNECT SWITCHES IN CONTROL CIRCUITS OF LIFEBOAT WINCHES

A notice regarding proposed changes in the regulations for limit switches and

emergency disconnect switches was published in the FEDERAL REGISTER dated February 27, 1951, 16 F. R. 1831, as Item II on the Agenda to be considered by the Merchant Marine Council, and a public hearing was held by the Merchant Marine Council on March 27, 1951, in Washington, D. C. All the comments submitted were considered and where practicable were incorporated into the regulations.

The purpose of the amendments to 46 CFR 59.3a (b), 60.21a (b), 76.15a (b), 94.14a (b), and 160.015-3 (k) is to have the requirements for limit switches and emergency disconnect switches in the control circuits for lifeboat winches on existing vessels and new vessels to be the same, to require effective means for cutting off the electric power to lifeboat winches. During the last five years the records of the Coast Guard show there have been thirty accidents caused by defective limit switches. These thirty casualties have resulted in three deaths, eighteen persons injured, and considerable property damage. During this same period two men were killed and seven were injured as a result of being struck by spinning crank handles while in the act of hand cranking the davits to their final position.

The extension of the application of the regulations to installations on existing vessels and revision of requirements for limit switches and emergency disconnect switches are in the interest of safety of life at sea.

By virtue of the authority vested in me as Commandant, United States Coast Guard, by Treasury Department Order No. 120, dated July 31, 1950 (15 F. R. 6521), to promulgate regulations in accordance with the statutes cited with the regulations below, the following amendments to the regulations are prescribed which shall become effective ninety days after date of publication of this document in the FEDERAL REGISTER.

Subchapter G—Ocean and Coastwise; General Rules and Regulations

PART 59—BOATS, RAFTS, BULKHEADS, AND LIFESAVING APPLIANCES (OCEAN)

Section 59.3a (b) is amended to read as follows:

§ 59.3a *Mechanical means for lowering.* * * *

(b) (1) Winches proposed for use in new installations shall be of an approved type and constructed in accordance with Subpart 160.015 of Subchapter Q (Specifications) of this chapter.

(2) All existing vessels fitted with gravity davits and winches shall comply with the requirements contained in § 160.015-3 (k) of Subpart 160.015 of Subchapter Q (Specifications) of this chapter not later than July 1, 1952.

Subchapter Q—Specifications

PART 160—LIFESAVING EQUIPMENT

SUBPART 160.015—LIFEBOAT WINCHES FOR MERCHANT VESSELS

Section 160.015-3 (k) is amended to read as follows:

§ 160.015-3 *Construction of lifeboat winches.* * * *

(k) Limit switch and emergency disconnect switch requirements:

(1) A main line emergency disconnect switch shall be provided, the opening of which will disconnect all electrical potential to the lifeboat winch. This switch shall be located in a position accessible to the person in charge of the boat stowage, and for gravity davit installations, shall be in a position from which the movement of both davit arms can be observed as they approach the final stowed position.

(2) Where power driven winches are used with gravity davits, two limit switches, one for each davit arm, shall

be provided to limit the travel of the davit arms as they approach the final stowed position. These switches shall be connected in series, they may be connected in either the control or the power circuit, and they shall be so arranged that the opening of either switch will disconnect all electrical potential of the circuit in which the switches are connected. These switches shall be arranged to stop the travel of the davit arms not less than 12 inches from their final stowed position and they shall remain open until the davit arms move outboard beyond the tripping position of the switches.

(3) Other arrangements equivalent in design and safety will be given special consideration.

(R. S. 4405, as amended, 4488, as amended; 46 U. S. C. 375, 481. Interprets or applies R. S. 4417a, as amended, 4426, as amended, 4491, 4491, as amended, sec. 11, 35 Stat. 428, 49 Stat. 1544, sec. 3, 54 Stat. 347, sec. 5, 55 Stat. 244, as amended; 46 U. S. Chapter II—Federal Maritime Board, Maritime Administration, Department of Commerce

Subchapter F—Merchant Ship Sales Act of 1946

[Gen. Order 60, Supp. 21, Amdt. 2]

PART 299—RULES AND REGULATIONS, FORMS, AND CITIZENSHIP REQUIRE- MENTS

SUBPART C—CHARTER OF WAR-BUILT VESSELS TO CITIZENS

NET VOYAGE PROFIT

Procedure to be followed by Charterers in the rendition to the Commission (now Maritime Administration, Department of Commerce), of Final Accountings under Warshipdemiseout 203 and Ship-salesdemise 303 Bareboat Charter Agreements.

It is ordered, That § 299.37-4 *Net voyage profit* in Subpart C of this chapter (General Order 60, Supplement 21) published in the FEDERAL REGISTER issue of March 30, 1950 (15 F. R. 1789-1796) be and it hereby is amended as follows:

1. By deleting that certain statement appearing at the end of subparagraph (4) of paragraph (b), which reads: "Post redelivery expenses, to the extent hereafter determined by the Commission to have been reasonably and necessarily incurred in connection with the conduct of the operation of the chartered vessels, will be made the subject of a supplement hereto."

2. By adding at the end of paragraph (e) a new paragraph which shall read as follows:

(f) *Post redelivery overhead expenses.* Post redelivery overhead expenses, to the extent determined by the Maritime Ad-

ministration to have been reasonably and necessarily incurred in connection with the conduct of the operation of the chartered vessels after redelivery of the last vessel under the last Warshipdemiseout 203 or Ship-salesdemise 303 Agreement in effect prior to July 1, 1950 (excluding charters covering only passenger vessels), will be taken into account in the determination of "net voyage profit" thereunder, subject to the following conditions:

(1) That the charterer shall demonstrate to the satisfaction of the Maritime Administration, by presentation of statements fully supported by actual cost records or other sound accounting evidence, that such expenses were, in fact, necessarily and properly incurred in the conduct of the business of the chartered vessels and were not attributable to the conduct of other business of the charterer.

(2) That post redelivery overhead expenses shall be deemed to include only such overhead expenses as are directly attributable to the completion and finalization of accounting for bareboat charter operations (excluding any cost of submitting final statements of additional charter hire for which allowances are elsewhere provided), the processing and settlement of inventories, and the processing of and accounting for claims.

(3) That post redelivery overhead expenses, to the extent allowed hereunder, may be allocated directly to operations under the bareboat charter agreements involved on the basis of the relation that the number of vessel days applicable to each accounting period under each agreement (or addendum with respect to which a separate determination of additional charter hire is required to be made) bears to the total vessel days under all such agreements (or addenda) for all such periods.

(4) That statements of post redelivery overhead expenses shall be submitted to the Maritime Administration not later than June 30, 1951, or within six (6) months after redelivery of the last vessel under the bareboat charter agreement involved, whichever later occurs: *Provided, however,* That upon application of the charterer the Administration may extend, for such further period as in its judgment is warranted by the circumstances in any instance, the time limit prescribed in this subparagraph for the submission of such statements.

Statements of post redelivery overhead expenses may be integrated into the statements required by § 299.37-5 if the submission of the latter mentioned statements will not thereby be delayed; otherwise, supplementary accountings embodying statements of post redelivery overhead expense should be submitted. (Sec. 204, 49 Stat. 1987, as amended, sec. 5, 55 Stat. 244, sec. 12, 60 Stat. 49; 46 U. S. C. 1114, 50 U. S. C. App., 1275, 1745)

Dated: June 5, 1951.

PROPOSED RULE MAKING

DEPARTMENT OF AGRICULTURE

Commodity Exchange Authority

[17 CFR, Part 3]

SPECIAL PROVISIONS APPLICABLE TO COTTON

NOTICE OF PROPOSED AMENDMENTS

Notice is hereby given, pursuant to section 4 of the Administrative Procedure Act (60 Stat. 238; 5 U. S. C. 1003), that the Secretary of Agriculture is considering the issuance of amendments to §§ 3.16 and 3.17 (e) of the regulations promulgated under the Commodity Exchange Act (17 CFR 3.16, 3.17 (e)).

The proposed amendment to § 3.16 would eliminate the present requirement that reports on Form 304 be filed as of the close of business on July 31 of each year.

The proposed amendment to § 3.17 (e) would require that reports made by any person on Form 304 show such person's fixed-price spot-cotton positions (both long and short). The proposed amendment thus would eliminate the present provision of § 3.17 (e) which conditions the reporting of fixed-price spot-cotton positions on the holding or controlling of 20,000 bales or more of open contracts in any one cotton future on any contract market.

All persons who desire to submit written data, views, or arguments for consideration in connection with the proposed amendments shall file the same with the Administrator, Commodity Exchange Authority, United States Department of Agriculture, Washington 25, D. C., not later than 5:30 p. m., e. d. t., on the 20th day after the publication of this notice in the FEDERAL REGISTER.

Issued this 5th day of June 1951.

[SEAL]

CHARLES F. BRANNAN,
Secretary of Agriculture.

U. S. STANDARDS FOR ALMONDS IN THE SHELL

NOTICE OF PROPOSED RULE MAKING

Notice is hereby given that the United States Department of Agriculture is considering the issuance of United States Standards for Almonds in the Shell under the authority contained in the Department of Agriculture Appropriation Act, 1951 (Pub. Law 759, 81st Cong., approved September 6, 1950).

All persons who desire to submit written data, views or arguments for consideration in connection with the proposed standards should file the same with M. W. Baker, Deputy Director, Fruit and Vegetable Branch, Production and

Marketing Administration, United States Department of Agriculture, South Building, Washington 25, D. C., not later than 5:30 p. m., e. s. t., on the thirtieth (30) day after the publication of this notice in the FEDERAL REGISTER.

The proposed standards are as follows:

§ 51.456 *Standards for almonds in the shell*—(a) *Grades*—(1) *U. S. No. 1*. U. S. No. 1 consists of almonds in the shell which are of similar varietal characteristics, clean, fairly bright, fairly uniform in color, which are free from loose hulls, pieces of shells, chaff and foreign material and free from damage caused by discoloration, adhering hulls broken shells, or other means. The kernels shall be well dried, free from decay, rancidity, insect injury, and free from damage caused by mold, gum, shriveling, brown spot, or other means.

(i) Unless otherwise specified, the minimum thickness of the almond shall be not less than 28/64 of an inch.

(ii) In order to allow for variations incident to proper grading and handling, the following tolerances shall be permitted:

(a) *For external defects*. Ten percent, by count (except that loose hulls, chaff, pieces of shells and foreign material shall be determined by weight), for almonds which fail to meet the requirements of the grade, other than for variety and size: *Provided*, That, not more than 2 percent, by weight, shall be allowed for loose hulls, chaff, pieces of shells and foreign material, including not more than one-half of this amount, or 1 percent, that will pass through a screen with 24/64 inch round openings:

(b) *For dissimilar varieties*. Five percent, by count, including not more than one-fifth of this amount, or 1 percent, for bitter almonds mixed with sweet almonds;

(c) *For size*. Five percent, by count, for almonds which fail to meet the size requirements; and

(d) *For internal defects*. Ten percent, by count, for almonds which fail to meet the grade requirements: *Provided*, That, not more than one-half of this amount, or 5 percent, shall be allowed for kernels affected by decay, rancidity, insect injury and damage by mold.

(2) *U. S. No. 1 Mixed*. U. S. No. 1 Mixed consists of almonds in the shell which meet the requirements of U. S. No. 1 grade, except that the varieties are mixed, but may include not more than 1 percent of bitter almonds mixed with sweet almonds.

(3) *U. S. No. 2*. U. S. No. 2 consists of almonds in the shell which meet the requirements of U. S. No. 1 grade, except that an additional tolerance of 20 percent shall be allowed for discoloration.

(4) *U. S. No. 2 Mixed*. U. S. No. 2 Mixed consists of almonds in the shell which meet the requirements of the U. S. No. 2 grade, except that the varieties are mixed, but may include not

more than 1 percent of bitter almonds mixed with sweet almonds.

(b) *Unclassified*. Unclassified consists of almonds which have not been classified in accordance with any of the foregoing grades. The term "unclassified" is not a grade within the meaning of these standards but is provided as a designation to show that no definite grade has been applied to the lot.

(c) *Application of tolerances and determination of the grades*. The tolerances for the foregoing grades are to be applied to the entire lot, and a composite sample shall be taken for determining the grade. However, any container or group of containers in which the almonds are found to be materially inferior to those in the majority of the containers shall be considered a separate lot.

(1) In determining the grade of a lot of almonds, the percentage of loose hulls, pieces of shells, chaff and foreign material is first determined on the basis of weight. Then a stated number of nuts is counted out (depending upon the size of the lot) from the composite sample. These almonds are next examined for size, dissimilar varieties and external defects. The same nuts are then cracked and examined for internal defects.

(d) *Definitions*. (1) "Similar varietal characteristics" means that the almonds are similar in shape and are reasonably uniform in degree of hardness of the shells. For example, hard-shelled varieties shall not be mixed with semi-soft-shelled, soft-shelled and paper-shelled varieties; and semi-soft-shelled varieties shall not be mixed with soft-shelled and paper-shelled varieties; and soft-shelled varieties shall not be mixed with paper-shelled varieties. Likewise, bitter almonds shall not be mixed with sweet almonds.

(2) "Clean" means that the individual almond is practically free from dirt and other foreign matter.

(3) "Fairly bright" means that the almonds show good characteristic color.

(4) "Fairly uniform color" means that the shells do not show excessive variation in color.

(5) "Damage" means any defect which materially affects the appearance, or the edible or shipping quality of the almonds. Any one of the following defects or any combination thereof, the seriousness of which exceeds the maximum allowed for any one defect, shall be considered as damage:

(i) Discoloration which is distinctly gray to black, when affecting more than one-eighth of the surface of the shell in the aggregate, but normal color variations, such as reddish or brown between varieties, and within some varieties, are not to be considered as discoloration;

(ii) Adhering hulls, when covering more than 5 percent of the shell surface in the aggregate;

(iii) Broken shells, when a portion of the shell is missing or fractured to the
