Title 32—NATIONAL DEFENSE

Chapter VII—Department of the Air Force

SUBCHAPTER C—CLAIMS AND ACCOUNTS

PART 834—PATERNITY CLAIMS

Sec.	Purpose.
834.1	Purpose.
834.2	Policy.
834.3	Active duty personnel.
834.4	Personnel not on active duty.
834.5	Former service personnel.

AUTHORITY: §§ 834.1 to 834.5 issued under sec. 8012, 70A Stat. 488; 10 U.S.C. 8012.

SOURCE: AFR 35-70, Sept. 9, 1958.

§ 834.1 Purpose.

Sections 834.1 to 834.5 outline the procedures for processing paternity claims made against Air Force personnel.

§ 834.2 Policy.

(a) Paternity disputes: The Air Force is without authority to adjudicate paternity claims made against Air Force personnel. The commander of the Air Force member concerned may only determine if the contention of the member is made in good faith. If the parties concerned cannot arrive at a decision as to paternity, then a court of competent jurisdiction adjudicates the dispute.

(b) If a court order, including one from a court of foreign jurisdiction, is issued, which determines paternity, the Air Force member concerned is expected to comply with it. The Air Force is with-

out authority to relieve personnel of obligations imposed by a court order. Personnel must obtain relief through a judicial system of competent jurisdiction.

(c) Established paternity: If paternity is established, either by admission or by judicial decree, the commander of the Air Force member concerned will:

(1) Counsel him on his legal and moral obligations to the child.

(2) Encourage him to render the necessary financial support to the child.

(3) Counsel him on his legal rights, and

(4) Take other actions as deemed appropriate under the circumstances.

(d) Leave:

(1) The commander of the service member concerned should approve leave to the serviceman when:

(i) The serviceman and the complainant desire to marry, and

(ii) No legal obstacle exists to the marriage, and

(iii) Paternity has been established or admitted.

(2) Overseas, the serviceman may be granted emergency return if the conditions in subparagraph (1) of this paragraph apply.

§ 834.3 Active duty personnel.

A paternity claim against an Air Force serviceman on active duty received by the Air Force will be brought to the attention of the member concerned by his immediate commander. After the serviceman concerned has had an opportunity to consult with an attorney, the serviceman will be advised of his rights under Article 31b, UCMJ, and then requested by his commander to make a sworn statement about the paternity claim. If he admits paternity, he will state if he desires to marry the complainant and if he intends to support the child or make other arrangements on the child's behalf. The commander will correspond directly with the complainant for:

(a) Furnishing information as to the Air Force member's intentions in the matter;

(b) Furnishing information that the Air Force has no authority to enforce or adjudicate paternity claims against its personnel;

(c) Requesting that he be furnished with a doctor's certification of pregnancy if the child is not yet born, or a copy of the birth certificate, and

(d) Requesting that he be furnished certified copies of all judicial orders or decrees of paternity or support, including those rendered by a court of foreign jurisdiction.

§ 834.4 Personnel not on active duty.

A paternity claim made against an Air Force serviceman not on active duty will be forwarded to him in a manner to insure delivery to the addressee only. Military channels will be used whenever practicable. Otherwise, correspondence will be forwarded to the last known mailing address of the member by Certified or Registered Mail, Return Receipt Requested—Deliver to Addressee Only. After delivery of the correspondence, the

complainant will be advised of the date of delivery without disclosing the member's mailing address. The complainant will be informed that the matter has been left to the discretion of the member complained of since he is in a civilian status and the Department of the Air Force has no direct control over him.

(a) Correspondence concerning Inactive Reservists will be forwarded to:
Commander, Air Reserve Records Center, 3800 York Street, Denver 5, Colo.

(b) Correspondence concerning Retired members will be forwarded to:
Director of Military Personnel, Headquarters USAF, ATTN: Special Activities Group, Retired Activities Branch, Washington 25, D.C.

§ 834.5 Former service personnel.
A paternity claim made against a former Air Force member will be returned to the complainant. The complainant will be advised that the member complained of is no longer in the Air Force in any capacity. Additionally, the date of discharge or final separation will be given, and the complainant will be informed that the Air Force has no responsibility for the whereabouts of former Air Force personnel. Only in cases in which the complainant has sent a certified copy of a judicial order or decree of paternity or support rendered by a United States or foreign court of competent jurisdiction, the former member's last known address will be given. In all other cases the last known address of the person concerned will not be given to the complainant.

[SEAL] CHARLES M. McDERMOTT,
Colonel, U.S. Air Force, Deputy
Director of Administrative
Services.

The areas described aggregate 920 acres.

3. The Department of the Air Force may use the area for flight and combat training purposes, at such time or times and in a manner consistent with the primary mission or missions of the De-

partment of the Army in, and its jurisdiction over, the lands.

4. Executive Order No. 8579 of October 29, 1940, as amended by Executive Order No. 9526 of February 28, 1945, withdrawing lands for use of the War Department as an aerial bombing and gunnery range, is hereby revoked so far as it affects the lands withdrawn by this order.

5. The Department of the Interior retains jurisdiction over the management of the surface and subsurface resources, including mineral resources, of the lands. No disposal of such resources will be made except under applicable public-land laws with the concurrence of the Department of the Army and, where necessary, only after appropriate modification of the provisions of this order.

6. The lands withdrawn by this order are excluded from the purview of the act of February 28, 1958 (72 Stat. 27) by section 1(4) thereof.

Title 47—TELECOMMUNICATION

Chapter I—Federal Communications Commission

[Rules Amdt. 10-9; Docket No. 12295]

PART 10—PUBLIC SAFETY RADIO SERVICES

Change of Effective Date of Narrow-Band Technical Standards in Certain Bands

The Commission having under consideration the Second Report and Order in the above-entitled matter (FCC 58-1217) adopted December 17, 1958; and

It appearing that under the terms of the subject Second Report and Order, Part 10 of the Commission's rules was amended, as set forth therein, with the formal codification of such changes to be accomplished by subsequent Order of the Commission; and

It further appearing that formal codification of the changes herein ordered in Part 10 of the Commission's rules conforms, without any substantive change, to the terms in the above-described Second Report and Order, and are, therefore, editorial in nature, requiring no further public notice of rule making thereon; and

It further appearing that the formal codification herein of Part 10 to reflect the rule changes ordered in said Second Report and Order should be made effective February 1, 1959 as provided in said Second Report and Order; and

It further appearing that authority for the amendments herein ordered is contained in sections 4(i) and 303 of the Communications Act of 1934, as amended, and section 0.341 of the Commission's Statement of Delegation of Authority:

It is ordered, This 12th day of January 1959, that, effective February 1, 1959, Part 10 of the Commission's rules, Public

Safety Radio Services, is amended as set forth below.

(Sec. 4, 48 Stat. 1086, as amended; 47 U.S.C. 154. Interprets or applies sec. 303, 48 Stat. 1082, as amended; 47 U.S.C. 303)

FEDERAL COMMUNICATIONS
COMMISSION,
[SEAL] MARY JANE MORRIS,
Secretary.

Part 10, Public Safety Radio Services Rules, is amended as follows:

1. Section 10.102(c) is amended so that the portion thereof preceding the table reads as follows:

(c) In lieu of meeting the requirements of paragraph (a) of this section for the frequency ranges shown below, transmitters authorized prior to August 1, 1958, and transmitters which are operationally integrated with existing radiocommunication systems authorized prior to August 1, 1958, may conform to the following frequency tolerances until not later than October 31, 1963, provided that authorized operation continues on the same frequency. In addition, transmitters of any radiocommunication system operated at locations wholly within the limits of one or more of the territories or possessions of the United States, or in Alaska, and transmitters of a system authorized prior to August 1, 1958, which system is required to move to a different frequency due to the reallocation of frequencies previously assigned, may also conform to the following frequency tolerances until not later than October 31, 1963.

2. Section 10.104(b)(2) is amended so that the portion thereof preceding the table reads as follows:

(2) Except as provided in subparagraphs (3), (4) and (6) of this paragraph, for all F3 emission, the maximum authorized bandwidth and maximum authorized frequency deviation shall be as follows:

3. Section 10.104(b)(3) is amended to read as follows:

(3) In lieu of meeting the requirements of subparagraph (2) of this paragraph, for all F3 emission, transmitters of any radiocommunication system first authorized prior to August 1, 1958, and transmitters which are operationally integrated with such systems, may

(i) when authorized for operation in the frequency ranges 42 to 46.51 Mc, 47 to 49.51 Mc or 152 to 162 Mc, be operated with a maximum authorized bandwidth of 40 kc and a maximum frequency deviation of 15 kc until not later than July 31, 1960, provided that authorized operation continues on the same frequency. Subsequent to July 31, 1960, and until not later than October 31, 1963, such transmitters may continue to be utilized for authorized operation on the same frequency provided the frequency deviation thereof is reduced so as not to exceed ± 5 kc.

(ii) when authorized for operation in the frequency ranges 46.51 to 47 Mc or 49.51 to 50 Mc, be operated with a maximum authorized bandwidth of 40 kc and a maximum frequency deviation of 15 kc until not later than October 31, 1963,

[Rules Amdt. 21-16; FCC 59-13]

PART 21—DOMESTIC PUBLIC RADIO SERVICES (OTHER THAN MARITIME MOBILE)**Miscellaneous Amendments**

provided that authorized operation continues on the same frequency; when such transmitters are moved to a different frequency due to the reallocation of the frequency previously assigned they may be utilized for authorized operation provided the frequency deviation is immediately reduced so as not to exceed ± 5 kc.

(iii) when authorized for operation on frequencies in the 25 to 42 Mc range removed by at least 40 kc from the nearest regularly-available frequency listed in this part, Part 11 or 16 of this chapter be operated with a maximum authorized bandwidth of 40 kc and a maximum frequency deviation of 15 kc until not later than October 31, 1963, provided that authorized operation continues on the same frequency.

4. Section 10.104(b) is amended by adding new subparagraph (6) to read as follows:

(6) In lieu of meeting the requirements of subparagraph (2) of this paragraph, for all F3 emission, transmitters of any radiocommunication system authorized for operation in the 25 to 50 Mc or 152 to 162 Mc range and operated at locations wholly within the limits of one or more of the territories or possessions of the United States, or in Alaska, may be operated with a maximum authorized bandwidth of 40 kc and a maximum frequency deviation of 15 kc, until not later than October 31, 1963.

5. Section 10.105(d) is amended to read as follows:

(d) For the frequency ranges 25 to 50 Mc and 150.8 to 162 Mc: Except as otherwise provided in this paragraph, each transmitter first authorized or installed after July 31, 1958, other than transmitters operationally integrated with existing radiocommunication systems authorized prior to August 1, 1958, and each transmitter operating after October 31, 1963, which is provided with a modulation limiter in accordance with the provisions of paragraph (c) of this section, also shall be provided with an audio low-pass filter. Such filter shall be installed between the modulation limiter and the modulated stage and shall meet the specifications contained in paragraph (g) of this section. The provisions of this paragraph do not apply until November 1, 1963, to transmitters of licensed radiocommunication systems authorized prior to August 1, 1958, and transmitters which are operationally integrated with existing radio systems so authorized, when such a system is required to move to a different frequency due to the reallocation of the frequency previously assigned, nor to transmitters of any radiocommunication system operated on frequencies in the range 25 to 50 Mc or 152 to 162 Mc at locations wholly within the limits of one or more of the territories or possessions of the United States, or Alaska.

[F.R. Doc. 59-465; Filed, Jan. 16, 1959; 8:49 a.m.]

1. Section 21.506 of Part 21 of the Commission's rules presently limits base stations in the Domestic Public Land Mobile Radio Service to an effective radiated power of 500 watts and § 21.505 restricts base station antenna installations to antenna heights of not more than 500 feet above average terrain. From time to time, the latter rule has been waived where circumstances were established which appeared to warrant authorization of antenna structures of greater elevation. However, § 21.506 has never been waived to permit use of higher effective radiated power. The Commission desires to amend § 21.505, as set forth below, to permit the use of base station antenna installations with heights in excess of 500 feet above average terrain (as determined by the method set forth in § 21.115 of the rules) on the condition that the effective radiated power of the base station is proportionately reduced below 500 watts by a factor not less than the value of the antenna height gain (with respect to a 500 foot high antenna), as shown in the chart entitled "Required Reduction in Effective Radiated Power for Antenna Heights in Excess of 500 Feet Above Average Terrain" attached hereto and made part of § 21.505 of the rules. In effecting this rule change, careful consideration also was given to whether § 21.506 should be amended so as to permit base stations which employ antenna heights of less than 500 feet above average terrain correspondingly to increase their effective radiated power above 500 watts by a factor not in excess of the antenna height loss with respect to a 500 foot high antenna. Such change is not being effectuated because we believe that the increase of base station effective radiated power above 500 watts would materially increase the problems of intermodulation interference to other radio systems now authorized, or which may be authorized in the future.

2. By the Commission's First Report and Order in Docket No. 11995, dated December 11, 1957, certain changes were made in Part 21 of the rules through Amendment No. 21-10 which, among other things, deleted the provisions under which mobile radio facsimile systems were authorized in the Domestic Public Land Mobile Radio Service. In view of this action, it is redundant to provide for authorizing the forms of emission (A4 and F4) used for facsimile transmission in the Domestic Public Land Mobile Radio Service. Accordingly, the Commission now desires to make appropriate changes in §§ 21.507 (a) and (b), as set forth below.

3. The Commission's Report and Order in Docket No. 11253, dated September 19, 1956, established narrow band technical standards for split-channel operations in the 25-50 Mc and 152-162 Mc bands. In applying these standards to the Domestic Public Land Mobile and

Rural Radio Services, certain changes were made in Part 21 of the rules through Amendment Nos. 21-2 and 21-7 wherein changes in §§ 21.507(b) and 21.604(a) unintentionally imposed the narrow band standards upon stations in the 72-76 Mc band. Additionally, § 21.507(b), as amended, allowed Domestic Public Land Mobile Radio Service transmitters authorized and installed prior to November 1, 1958, and transmitters operationally integrated with existing radio systems authorized for wide band operation (type 36F3 emission) prior to November 1, 1958, to be licensed for wide band operation, and required that all transmitters in the 25-50 Mc and 152-162 Mc bands meet the narrow band standards by October 31, 1963. Through oversight, we neglected to provide similarly for the Rural Radio Service which employs the same frequencies and types of equipment. With respect thereto, we desire to take corrective action by amending rule § 21.507 (b) and 21.604(a) as set forth below.

4. It appears that the public interest would be served by adoption of the rule changes discussed above and that such changes are of a nature which relieve restrictions or effect editorial corrections and, therefore, proposed rule-making proceedings are not necessary or desirable or in the public interest.

5. It is ordered, That §§ 21.505, 21.507 (a) and (b), and 21.604(a) of Part 21 of the Commission's rules are hereby amended, as set forth below, effective February 13, 1959. This action is taken pursuant to the authority contained in sections 4(i) and 303 of the Communications Act of 1934, as amended, and sections 4 (a) and (c) of the Administrative Procedure Act.

(Sec. 4, 48 Stat. 1066, as amended; 47 U.S.C. 154. Interprets or applies sec. 303, 48 Stat. 1082, as amended; 47 U.S.C. 303)

Adopted: January 7, 1959.

Released: January 13, 1959.

FEDERAL COMMUNICATIONS
COMMISSION,

[SEAL] MARY JANE MORRIS,
Secretary.

1. Section 21.505 is amended to read as follows:

§ 21.505 Antenna height-power limit for base stations.

In view of the fact that the predominant need for mobile communication service can usually be met by base stations within the classification set forth in § 21.502, and because widespread coverage is undesirable in areas where no substantial need exists for mobile communication service through a distant base station, base stations will not be authorized to employ transmitting antennas in excess of 500 feet above average terrain unless the effective radiated power of the base station is reduced below 500 watts by not less than the amount shown in the following chart entitled "Required Reduction in Effective Radiated Power for Antenna Heights in Excess of 500 Feet Above Average Terrain".

2. Sections 21.507(a) and (b) are amended to read as follows:

§ 21.507 Bandwidth and emission limitations.

(a) Stations in this service shall normally be authorized to use only type A3 or F3 emission for radiotelephony, and type A1, A2, F1 or F2 emission for selective signaling. The authorization to use type A3 or F3 emission shall be construed to include the use of the tone signals or signaling devices the sole function of which is to establish and maintain communication between stations using radiotelephony. Stations using selective signaling in the one-way signaling service

are required to be authorized to employ telegraph type emission appropriate to the type of transmission employed. The use of types AO and FO emission in the 72-76 Mc band will not be authorized, except for temporary or short periods necessary for testing incident to the construction or maintenance of a radio station. (Further reference should be made to §§ 21.103 to 21.105, inclusive.)

(b) Except as provided in subparagraph (1) of this paragraph the maximum authorized bandwidth of emission and, for the cases of frequency or phase modulated emissions, the maximum authorized frequency deviation shall be as follows:

(1) In lieu of meeting the foregoing requirements of this paragraph, for the frequency ranges shown below, transmitters authorized and installed prior to November 1, 1958, to utilize type F3 emission, and transmitters which are operationally integrated with existing radio systems authorized prior to November 1, 1958, may be operated until not later than October 31, 1963, with a maximum authorized bandwidth and a maximum frequency deviation in accordance with the following schedule:

Frequency range (Mc)	Authorized bandwidth (kc)	Frequency deviation (kc)
25 to 50 Mc.....	40	15
150 to 450 Mc.....	40	15

3. Section 21.604(a) is amended to read as follows:

§ 21.604 Emission limitations.

(a) Except as provided in subparagraph (1) of this paragraph the maximum authorized bandwidth of emission and for the cases of frequency or phase modulated emissions, the maximum authorized frequency deviation shall be as follows:

Type of emission	50-150 Mc		25-50 Mc and 150-450 Mc		450-500 Mc	
	Authorized bandwidth (kc)	Frequency deviation (kc)	Authorized bandwidth (kc)	Frequency deviation (kc)	Authorized bandwidth (kc)	Frequency deviation (kc)

F1	3		3		3	
F2	3		3		3	
F3	40	15	20	5	40	15
F4	40	15	20	5	40	15

(1) In lieu of meeting the foregoing requirements of this paragraph, for the frequency ranges shown below, transmitters authorized and installed prior to November 1, 1958, to utilize type F3 emission, and transmitters which are operationally integrated with existing radio systems authorized prior to November 1, 1958, may be operated until not later than October 31, 1963, with a maximum authorized bandwidth and a

maximum frequency deviation in accordance with the following schedule:

Notice of Hearing on Proposed Marketing Agreement and Order

Pursuant to the provisions of the Agricultural Marketing Agreement Act of 1937, as amended (7 U.S.C. 601 et seq.), and the applicable rules of practice and procedure governing the formulation of marketing agreements and marketing orders (7 CFR Part 900), notice is hereby given of a public hearing to be held in the Ballroom, Emerson Hotel, Baltimore and Calvert Streets, Baltimore, Maryland, beginning at 10:00 a.m., e.s.t., on February 2, 1959, with respect to a proposed marketing agreement and order to regulate the handling of milk in the Baltimore, Maryland, marketing area.

This public hearing is for the purpose of receiving evidence with respect to economic and marketing conditions, which relate to the proposed marketing agreement and order hereinafter set forth, and any appropriate modifications thereof; and for the purpose of determining (1) whether the handling of milk in the area proposed for regulation is in the current of interstate or foreign commerce or directly burdens, obstructs, or affects interstate or foreign commerce, (2) whether there is need for a marketing agreement or order regulating the handling of milk in the area, and (3) whether provisions specified in the proposals or some other provisions appropriate to the terms of the Agricultural Marketing Agreement Act of 1937, as amended, will tend to effectuate the declared policy of the Act.

The proposals set forth below have not received the approval of the Secretary of Agriculture.

Proposed by the Maryland Cooperative Milk Producers, Inc.:
