PART 29—TOBACCO INSPECTION

Subpart C—Standards

FLUE-CURED STANDARD GRADES

On April 24, 1968, notice of proposed rule making regarding an amendment to the Official Standard Grades for Flue-Cured Tobacco, U.S. Types 11, 12, 13, and 14, was published in the FEDERAL REGISTER (33 F.R. 6245). Interested persons were given 30 days in which to submit written data, views, or arguments regarding the proposed amendment.

No data, views, or arguments have been received and the proposed amendment is hereby adopted without change and is set forth below.

Effective date. This amendment shall become effective 30 days following the date of publication in the FEDERAL REGISTER.

Done at Washington, D.C., this 10th day of June 1968.

G. R. GRANGE,
Deputy Administrator,
Marketing Services.

§ 29.1008 [Amended]

1. Section 29.1008 is amended by deleting color symbol "D—walnut" and substituting therefor "KR—variegated scorched".

2. Section 29.1122 is revised to read as follows:

§ 29.1122 Rule 16.

Any lot of ripe tobacco which contains 20 percent or more of scorched tobacco shall be designated by the color symbol "KR". Any lot of unripe tobacco which is not greenish or green but which contains 20 percent or more of scorched tobacco or any lot of tobacco which contains 20 percent or more of a color distinctively different from the major color shall be classified as mixed and designated by the color symbol "KM".

§ 29.1161 [Amended]

3. Section 29.1161 is amended by deleting grades A1R and A2R and their specifications.

§ 29.1162 [Amended]

4. Section 29.1162 is amended by adding grades B3KR, B4KR, and B5KR after grade B6K and its specifications. The addition reads as follows:

B3KR Good Quality Variegated Scorched Leaf.

Ripe, firm leaf structure, fleshy, oily, normal width, over 16 inches in length. Uniformity, 80 percent; injury tolerance, 15 percent.

B4KR Fair Quality Variegated Scorched Leaf.

Ripe, firm leaf structure, fleshy body, lean in oil, normal width. Uniformity, 70 percent; injury tolerance 20 percent, of which not over 5 percent may be waste or other badly injured tobacco.

B5KR Low Quality Variegated Scorched Leaf.

Ripe, firm leaf structure, fleshy body, lean in oil, narrow. Uniformity, 70 percent; injury tolerance 30 percent, of which not over 10 percent may be waste or other badly injured tobacco.

5. Section 29.1162 is further amended by deleting grades B5D and B6D and their specifications.

§ 29.1163 [Amended]

6. Section 29.1163 is amended by deleting grade H3K and its specifications.

§ 29.1164 [Amended]

7. Section 29.1164 is amended by adding grades C4K and C4KR after grade C5F and its specifications. The addition reads as follows:

C4K Fair Quality Variegated Cutters.

Ripe, open leaf structure, medium body, lean in oil, moderate color intensity, normal width, over 16 inches in length. Uniformity, 70 percent; injury tolerance 20 percent, of which not over 5 percent may be waste or other badly injured tobacco.

C4KR Fair Quality Variegated Scorched Cutters.

Ripe, open leaf structure, medium body, lean in oil, moderate color intensity, normal width, over 16 inches in length. Uniformity, 70 percent; injury tolerance 20 percent, of which not over 5 percent may be waste or other badly injured tobacco.

8. Section 29.1164 is further amended by deleting grades C4FS and C5FS and their specifications.

§ 29.1165 [Amended]

9. Section 29.1165 is amended by adding grade X4KR after grade X5F and its specifications. The addition reads as follows:

X4KR Fair Quality Variegated Scorched Lugs.

PART 160—REGULATIONS AND STANDARDS FOR NAVAL STORES

Rosin Standards

On February 16, 1968, notice of proposed rule making regarding amendments to the Official Naval Stores Standards of the United States was published in the FEDERAL REGISTER (33 F.R. 3076). Interested persons were given an opportunity to appear at a public hearing held May 17, 1968, or to submit written data, views, or arguments not later than the date of the hearing.

Testimony given at the hearing affirmed that modern techniques in the manufacture of rosin have resulted in the production of quantities of rosin lighter in color than the lightest grade "X" of the U.S. Standards. Industry representation stressed the existing need for standards to cover the color range of the lighter colored rosin. All views presented concurred with the adoption of the three proposed standards, designated XA, XB, and XC, to meet this requirement.

After consideration of all such relevant matter as was presented by interested persons, the amendment as so proposed is hereby adopted, subject to the following changes:

The words "would be" in paragraphs 1, 2, 3, and 4 of the proposal, respectively, are changed to read "is".

Effective date. These amendments shall become effective three months following the date of publication in the FEDERAL REGISTER.

Done at Washington, D.C., this 10th day of June 1968.

G. R. GRANGE,
Deputy Administrator,
Marketing Services.

1. Section 160.13 is amended by inserting grade designations "XC," "XB," and "XA" between the word "respectively:" and grade designation "X."

2. Section 160.73 is amended by changing the heading to read "Availability of standards", by designating the present provisions as paragraph (a) with the heading "Standards available on loan", and by adding a new paragraph (b), to read as follows:

(b) *Standards available for purchase.* Duplicate cubes for rosin standard grades XA, XB, and XC are not available from the Department but may be obtained commercially.

3. Section 160.302 is amended by deleting the words "prepared by and".

4. Appendix B is added following statement No. 6 of Appendix A to read as follows:

APPENDIX B—COLORIMETRIC SPECIFICATIONS FOR U.S. ROSIN STANDARDS (MASTER CUBES XA, XB, AND XC)¹

Grade	x	y	T
XA	0.4048	0.4443	0.708
XB	0.3724	0.4117	0.788
XC	0.3406	0.3696	0.848

¹x and y are CIE trilinear coordinates; T is the luminous transmission factor.

Chapter VII—Agricultural Stabilization and Conservation Service (Agricultural Adjustment), Department of Agriculture

SUBCHAPTER B—FARM MARKETING QUOTAS AND ACREAGE ALLOTMENTS

[Amdt. 3]

PART 718—DETERMINATION OF ACREAGE AND COMPLIANCE

Miscellaneous Amendments

Basis and purpose. This amendment is issued pursuant to the Agricultural Adjustment Act of 1938, as amended (7 U.S.C. 1281 et seq.), for the purpose of providing authority for any authorized representative of Agricultural Stabilization and Conservation Service to enter a farm for the purpose of measuring or ascertaining acreage, or determining compliance with programs administered by ASCS; providing changes in State committee options; providing authority for obtaining approval of the Deputy Administrator to change certification dates for peanuts and diverted acreage; adding provisions for handling cases where the farm operator overstates crop acreage under certification and such overstatement of acreage would have resulted in an overpayment of marketing certificate or price support payment for

the farm; providing changes in the designation of certification counties; and providing changes in crop disposition dates.

Since farmers need to know of these changes in the rules as soon as possible, it is hereby found and determined that compliance with the notice, public procedure, and 30-day effective date requirement of 5 U.S.C. 553 (80 Stat. 383) is impracticable and contrary to the public interest. Accordingly, these changes will be effective upon publication of this amendment in the FEDERAL REGISTER. The Regulations Governing Determination of Acreage and Compliance, as amended (32 F.R. 9069, 9507, 11755, and 17513) are further amended as follows:

1. The table of contents is amended by adding §§ 718.2a, 718.29, and 718.30 to read as follows:

Sec.	
718.2a	Farm entry authority.
718.29	Final date for filing certification of diverted acreage.
718.30	Final date for filing certification of peanut acreage.

2. Section 718.2a is added to read as follows:

§ 718.2a Farm entry authority.

Any authorized representative of Agricultural Stabilization and Conservation Service shall have authority to enter any farm for the purpose of measuring or ascertaining acreage or determining compliance with any mandatory or voluntary program administered by ASCS. For voluntary programs, application of the producer to participate in the program shall constitute his consent to the authority to enter the farm to measure or ascertain acreage or determine compliance.

§ 718.17 [Amended]

3. In § 718.17(b) the Table of Sections Affected by State Committee Determinations pursuant to § 718.17(a) is amended for the States of Delaware, Mississippi, New York, and Ohio to read as follows:

TABLE OF SECTIONS AFFECTED BY STATE COMMITTEE DETERMINATIONS

State	Section 718.2(b)(5) normal row width	Section 718.14 deduction credit	Section 718.15 adjustment credit	Section 718.5(e)(2) acreage computations	Section 718.25(e)(2) remeasurement refund	Section 718.10(b)(2) range of row widths
Delaware	30 inches	Minimum area 0.1 acre for all crops and land uses except tobacco—Minimum width, 6 links.		Acres and tenths	0.2 acre	
Mississippi		Minimum width, 0.1 chain.	Minimum area, (1) 0.3 acre, except that one plot may be less than 0.3 acre where the total excess or deficiency is more than 0.3 acre. (2) 0.1 acre for irrigation dikes installed after initial measurement.			32-44 inches.
New York		Minimum width, 8 links (63 inches).	Minimum width, 0.2 chain, except 0.1 chain for irrigation dikes installed after initial measurement.			
Ohio		Minimum width, 8 links for crops other than tobacco.	Minimum width, 8 links (63 inches).	Acres and tenths		32-42 inches.

4. Section 718.21 is amended by changes in paragraph (b) (2) and (4), and by adding paragraph (g), to read as follows:

§ 718.21 Reports of acreage in certification counties.

(b) *Final dates for filing certifications.*

(2) *For peanuts.* As provided in § 718.30.

(4) *For an acreage diverted from feed grain or cotton.* As provided in § 718.29.

(g) *Overstatement of crop acreage under certification.* (1) If the farm operator files a certification of acreage for the wheat, feed grain, or upland cotton program which certifies an acreage on the farm in excess of the actual acreage planted to the crop, the operator may be considered to have made a good faith effort to file an accurate certification of crop acreage, provided the acreage so certified does not exceed the measured acreage by more than the larger of 2 acres or 10 percent of such certified acreage.

(2) If the crop acreage certified by the farm operator exceeds the actual crop acreage by more than the larger of 2 acres or 10 percent of the reported acreage, and such overstated acreage would have resulted in an overpayment of marketing certificate or price support payment to producers on the farm, no marketing certificate or price support payment shall be made for the farm. Notwithstanding the above provisions of this subparagraph (2), the Deputy Administrator may nevertheless authorize the making of marketing certificate or price support payment in cases where the operator overstated the crop acreage on the farm by more than the tolerance authorized under subparagraph (1) of this paragraph, in such amounts as he determines to be equitable, provided the operator has acted in good faith in certifying the crop acreage.

5. Paragraph (b) of § 718.27 is amended by revising, deleting and adding the following subparagraphs and subdivisions for certain States:

Alabama—revise entire subparagraph (1).
Arizona—revise all subparagraphs.
California—revise subdivisions (iv) and (v) of subparagraph (1).

Florida—revise entire subparagraph (1).

Chapter IX—Consumer and Marketing Service (Marketing Agreements and Orders; Fruits, Vegetables, Nuts), Department of Agriculture

PART 911—LIMES GROWN IN FLORIDA

Expenses and Rate of Assessment

On May 29, 1968, notice of rule making was published in the FEDERAL REGISTER (33 F.R. 7823) regarding proposed expenses and the related rate of assessment

for the period April 1, 1968, through March 31, 1969, pursuant to the marketing agreement, as amended, and Order No. 911, as amended (7 CFR Part 911), regulating the handling of limes grown in the State of Florida. This regulatory program is effective under the Agricultural Marketing Agreement Act of 1937, as amended (7 U.S.C. 601-674). After consideration of all relevant matters presented, including the proposals set forth in such notice which were submitted by the Florida Lime Administrative Committee (established pursuant to said marketing agreement and order), it is hereby found and determined that:

§ 911.208 Expenses and rate of assessment.

(a) *Expenses.* Expenses that are reasonable and likely to be incurred by the Florida Lime Administrative Committee during the period April 1, 1968, through March 31, 1969, will amount to \$12,030.

(b) *Rate of assessment.* The rate of assessment for said period, payable by each handler in accordance with § 911.41, is fixed at \$0.025 per bushel of limes.

It is hereby further found that good cause exists for not postponing the effective date hereof until 30 days after publication in the FEDERAL REGISTER (5 U.S.C. 553) in that (1) shipments of limes are now being made, (2) the relevant provisions of said marketing agreement and this part require that the rate of assessment herein fixed shall be applicable to all assessable limes handled during the aforesaid period, and (3) such period began on April 1, 1968, and said rate of assessment will automatically apply to all such limes beginning with such date.

PART 915—AVOCADOS GROWN IN SOUTH FLORIDA

Expenses and Rate of Assessment and Carryover of Unexpended Funds

On May 29, 1968, notice of rule making was published in the FEDERAL REGISTER (33 F.R. 7823) regarding proposed expenses, the related rate of assessment for the period beginning April 1, 1968, through March 31, 1968, and carryover of unexpended funds pursuant to the marketing agreement, as amended, and Order No. 915, as amended (7 CFR Part 915), regulating the handling of avocados grown in south Florida. This regulatory program is effective under the Agricultural Marketing Agreement Act of 1937, as amended (7 U.S.C. 601-674). After consideration of all relevant matters presented, including the proposals set forth in such notice which were submitted by the Avocado Administrative Committee (established pursuant to said

marketing agreement and order), it is hereby found and determined that:

§ 915.208 Expenses and rate of assessment and carryover of unexpended funds.

(a) *Expenses.* Expenses that are reasonable and likely to be incurred by the Avocado Administrative Committee during the period April 1, 1968, through March 31, 1969, will amount to \$13,050.

(b) *Rate of assessment.* The rate of assessment for said period, payable by each handler in accordance with § 915.41, is fixed at \$0.03 per bushel of avocados.

(c) *Reserve.* Of the unexpended assessment funds in excess of expenses incurred during the fiscal period ended March 31, 1968, \$303.84 shall be carried over in the reserve fund, established under § 915.205, in accordance with § 915.42 of said marketing agreement and order.

It is hereby further found that good cause exists for not postponing the effective date hereof until 30 days after publication in the FEDERAL REGISTER (5 U.S.C. 553) in that (1) shipments of avocados are now being made, (2) the relevant provisions of said marketing agreement and this part require that all rate of assessment herein fixed shall be applicable to all assessable avocados handled during the aforesaid period, and (3) such period began on April 1, 1968, and said rate of assessment will automatically apply to all such avocados beginning with such date.

[Peach Reg. 1]

**PART 917—FRESH PEARS, PLUMS,
AND PEACHES GROWN IN CAL-
IFORNIA**

Regulation by Grades and Sizes

Findings. (1) Pursuant to the marketing agreement, as amended, and Order No. 917, as amended (7 CFR Part 917), regulating the handling of fresh pears, plums, and peaches grown in the State of California, effective under the applicable provisions of the Agricultural Marketing Agreement Act of 1937, as amended (7 U.S.C. 601-674), and upon the basis of the recommendations of the Peach Commodity Committee, established under the aforesaid amended marketing agreement and order, and upon other available information, it is hereby found that the limitation of shipments of peaches, as hereinafter provided, will tend to effectuate the declared policy of the act.

(2) It is hereby further found that it is impracticable, unnecessary, and contrary to the public interest to give

preliminary notice, engage in public rule-making procedure, and postpone the effective date of this regulation until 30 days after publication thereof in the FEDERAL REGISTER (5 U.S.C. 553) in that, as hereinafter set forth, the time intervening between the date when information upon which this regulation is based became available and the time when this regulation must become effective in order to effectuate the declared policy of the act is insufficient; a reasonable time is permitted, under the circumstances, for preparation for such effective time; and good cause exists for making the provisions hereof effective not later than June 15, 1968. A reasonable determination as to the supply of, and the demand for, such peaches must await the development of the crop thereof, and adequate information thereon was not available to the Peach Commodity Committee until May 14, 1968, on which date an open meeting was held, after giving due notice thereof, to consider the need for, and the extent of, regulation of shipments of such peaches. Interested persons were afforded an opportunity to submit information and views at this meeting; the recommendation and supporting information for regulation during the period specified herein were promptly submitted to the Department after such meeting was held; necessary supplemental data was received on June 10, 1968; shipments of the current crop of such peaches are expected to begin on or about the effective date hereof; this regulation should be applicable to all such shipments in order to effectuate the declared policy of the act; the provisions of this regulation are identical with the aforesaid recommendation of the committee; information concerning such provisions and effective time has been disseminated among handlers of such peaches; and compliance with the provisions of this regulation will not require of handlers any preparation therefor which cannot be completed by the effective time hereof.

§ 917.411 Peach Regulation 1.

(a) *Order.* (1) During the period June 15, 1968, through October 31, 1968, no shipper shall ship:

(i) Any lot of packages or containers of peaches unless such peaches meet the requirements of the U.S. No. 1 grade: *Provided*, That with respect to ripe peaches a tolerance of 10 percent, by count, for bruises not causing serious damage is allowed in addition to the tolerances provided for such U.S. No. 1 grade;

(ii) Any package or container of peaches unless at least 85 percent, by count, of such peaches are well matured (as such term is defined in subparagraph (2) of this paragraph);

(iii) Any lot of packages or containers of peaches if more than three (3) percent, by count, of the peaches in such lot are immature;

(iv) Any package or container of peaches unless at least 85 percent of the peaches contained in such package or container measure not less than 2½ inches in diameter: *Provided*, That

peaches (a) when packed in a 12B California peach box, which are of the size that will pack, in accordance with the requirements prescribed for a standard pack, 65 peaches in said box, or (b) when packed in a No. 22D standard lug box, which are of the size that will pack, in accordance with the requirements prescribed by a standard pack, not more than 80 peaches in said box, shall be deemed to meet the said minimum diameter requirement: *And provided, further*, That for the purpose of determining whether ripe peaches meet the said standard pack requirements, such peaches may be fairly tightly packed rather than tightly packed.

(2) Peaches which are "well matured" means peaches which, at the time of picking, (i) have shoulders and sutures well filled out and smooth; (ii) have skin which is at least very light green to yellowish green in color; (iii) have flesh that is yellow or straw color with only a small portion usually next to the skin being greenish yellow or greenish straw color; (iv) have flesh which shows some juiciness; and (v) yield very slightly to moderate pressure at the suture or tip.

(3) Terms used in the amended marketing agreement and order shall, when used herein, have the same meaning as given to the respective term in said amended marketing agreement and order; "U.S. No. 1," "bruises," "defects," "damage," "serious damage," "standard pack," "tightly packed," and "fairly tightly packed" shall have the same meaning as when used in the U.S. Standards for Peaches (§§ 51.1210-51.1223 of this title); "No. 22D Standard lug box" shall have the same meaning as set forth in section 43601 of the Agricultural Code of California; "No. 12B California peach box" shall have the same meaning as set forth in section 43598 of the Agricultural Code of California; and "diameter" shall mean the distance through the widest portion of the cross section of a peach at right angles to a line running from the stem to the blossom end.
