

may be discharged to a publicly owned treatment works by a new point source subject to the provisions of this subpart.

Pollutant or pollutant property	Pretreatment standard
pH	No limitation.
BOD ₅	Do.
TSS	Do.

Subpart J—Wheat Starch and Gluten Subcategory

§ 406.100 Applicability; description of the wheat starch and gluten subcategory.

The provisions of this subpart are applicable to discharges resulting from those industrial operations utilizing wheat flour as a raw material for production of wheat starch and gluten (protein) components through conventional processes of physical separation and subsequent refinement.

§ 406.101 Specialized definitions.

For the purpose of this subpart: The general definitions, abbreviations and methods of analysis set forth in 40 CFR 401 shall apply to this subpart.

§ 406.102 Effluent limitations guidelines representing the degree of effluent reduction attainable by the application of the best practicable control technology currently available.

(a) In establishing the limitations set forth in this section, EPA took into account all information it was able to collect, develop and solicit with respect to factors (such as age and size of plant, raw materials, manufacturing processes, products produced, treatment technology available, energy requirements and costs) which can affect the industry subcategory and effluent levels established. It is, however, possible that data which would affect these limitations have not been available and, as a result, these limitations should be adjusted for certain plants in this industry. An individual discharger or other interested person may submit evidence to the Regional Administrator (or to the State, if the State has the authority to issue NPDES permits) that factors relating to the equipment or facilities involved, the process applied, or other such factors related to such discharger are fundamentally different from the factors considered in the establishment of the guidelines. On the basis of such evidence or other available information, the Regional Administrator (or the State) will make a written finding that such factors are or are not fundamentally different for that facility compared to those specified in the Development Document. If such fundamentally different factors are found to exist, the Regional Administrator or the

State shall establish for the discharger effluent limitations in the NPDES permit either more or less stringent than the limitations established herein, to the extent dictated by such fundamentally different factors. Such limitations must be approved by the Administrator of the Environmental Protection Agency. The Administrator may approve or disapprove such limitations, specify other limitations, or initiate proceedings to revise these regulations.

(b) The following limitations establish the quantity or quality of pollutants or pollutant properties, controlled by this section, which may be discharged by a point source subject to the provisions of this subpart after application of the best practicable control technology currently available:

Effluent characteristic	Effluent limitations	
	Maximum for any one day	Average of daily values for thirty consecutive days shall not exceed
(Metric units) kg/kg of raw material (wheat flour)		
BOD ₅	6.0	2.0
TSS	6.0	2.0
pH	Within the range 6.0 to 9.0	
(English units) lb/1,000 lb of raw material (wheat flour)		
BOD ₅	6.0	2.0
TSS	6.0	2.0
pH	Within the range 6.0 to 9.0	

§ 406.103 Effluent limitations guidelines representing the degree of effluent reduction attainable by the application of the best available technology economically achievable.

The following limitations establish the quantity or quality of pollutants or pollutant properties, controlled by this section, which may be discharged by a point source subject to the provisions of this subpart after application of the best available technology economically achievable:

Effluent characteristic	Effluent limitations	
	Maximum for any one day	Average of daily values for 30 consecutive days shall not exceed
(Metric units) kg/kg of raw material (wheat flour)		
BOD ₅	1.5	0.50
TSS	1.2	0.40
pH	Within the range 6.0 to 9.0	
(English units) lb/1,000 lb of raw material (wheat flour)		
BOD ₅	1.5	0.50
TSS	1.2	0.40
pH	Within the range 6.0 to 9.0	

§ 406.104 [Reserved]

§ 406.105 Standards of performance for new sources.

The following standards of performance establish the quantity or quality of pollutants or pollutant properties, controlled by this section, which may be discharged by a new source subject to the provisions of this subpart:

Effluent characteristic	Effluent limitations	
	Maximum for any one day	Average of daily values for thirty consecutive days shall not exceed
(Metric units) kg/kg of raw material (wheat flour)		
BOD ₅	3.0	1.0
TSS	3.0	1.0
pH	Within the range 6.0 to 9.0	
(English units) lb/1,000 lb of raw material (wheat flour)		
BOD ₅	3.0	1.0
TSS	3.0	1.0
pH	Within the range 6.0 to 9.0	

§ 406.106 Pretreatment standards for new sources.

The pretreatment standards under section 307(c) of the Act for a new source within the wheat starch and gluten subcategory which is a user of a publicly owned treatment works and a major contributing industry as defined in 40 CFR Part 128, for existing sources (and which would be a new point source subject to section 306 of the Act, if it were to discharge pollutants to the navigable waters), shall be the same standard as set forth in 40 CFR Part 128, except that, for the purpose of this section, 40 CFR 128.121, 128.122, 128.132, and 128.133 shall not apply. The following pretreatment standard establishes the quantity or quality of pollutants or pollutant properties controlled by this section, which may be discharged to a publicly owned treatment works by a new point source subject to the provisions of this subpart.

Pollutant or pollutant property	Pretreatment standard
pH	No limitation.
BOD ₅	Do.
TSS	Do.

[FR Doc.75-3 Filed 1-2-75;8:45 am]

ENVIRONMENTAL PROTECTION AGENCY

[FRL 312-7]

[40 CFR Part 406]

GRAIN MILLS MANUFACTURING POINT SOURCE CATEGORY

Proposed Pretreatment Standards for Existing Sources

Notice is hereby given pursuant to section 307(b) of the Federal Water Pollution Control Act, as amended (the Act); 33 U.S.C. 1251, 1317(b); 86 Stat. 816 et seq.; Pub. L. 92-500, that the proposed regulation set forth below proposes pretreatment standards for pollutants introduced into publicly owned treatment works. The proposal will amend 40 CFR Part 406, Grain Mills Manufacturing Point Source Category, establishing for each subcategory therein the extent of application of effluent limitations guidelines to existing sources which discharge to publicly owned treatment works. The regulation is intended to be complementary to the general regulation for pretreatment standards set forth at 40 CFR 128. The general regulation was proposed July 19, 1973 (38 FR 19236), and published in final form on November 8, 1973 (38 FR 30982).

The proposed regulation is also intended to supplement a final regulation being simultaneously promulgated by the Environmental Protection Agency (EPA or Agency) which provides effluent limitations and guidelines for existing sources and standards of performance and pretreatment standards for new sources within the animal feed, hot cereal, ready-to-eat cereal, and wheat starch gluten subcategories of the grain mills manufacturing point source category. The latter regulation applies to the portion of a discharge which is directed to the navigable waters. The regulation proposed below applies to users of publicly owned treatment works which fall within the description of the point source category to which the limitations and standards (40 CFR Part 406) promulgated simultaneously apply. However, the proposed regulation applies to the introduction of pollutants which are directed into a publicly owned treatment works, rather than to discharges of pollutants to navigable waters.

The general pretreatment standard divides pollutants discharged by users of publicly owned treatment works into two broad categories; "compatible" and "incompatible." Compatible pollutants are generally not subject to pretreatment standards. However, 40 CFR 128.131 (prohibited wastes) may be applicable to compatible pollutants. Additionally, local pretreatment requirements may apply (See 40 CFR 128.110). Incompatible pollutants are subject generally to pretreatment standards as provided in 40 CFR 128.133.

The regulation proposed below is intended to implement that portion of § 128.133, above, requiring that a separate provision be made stating the application to pretreatment standards of effluent limitations guidelines based upon

best practicable control technology currently available.

Questions were raised during the public comment period on the proposed general pretreatment standard (40 CFR Part 128) about the propriety of applying a standard based upon best practicable control technology currently available to all plants subject to pretreatment standards. In general, EPA believes the analysis supporting the effluent limitations guidelines is adequate to make a determination regarding the application of those standards to users of publicly owned treatment works. However, to ensure that those standards are appropriate in all cases, EPA now seeks additional comments focusing upon the application of effluent limitations guidelines to users of publicly owned treatment works.

Sections 406.76, 406.86, 406.96, and 406.106 of the proposed regulation for point sources within the animal feed, hot cereal, ready-to-eat cereal and wheat starch gluten subcategories (September 17, 1974; 39 FR 33470), contained the proposed pretreatment standard for new sources. The regulation promulgated simultaneously herewith contains §§ 406.76, 406.86, 406.96, and 406.106 which states the applicability of standards of performance for purposes of pretreatment standard for new sources.

A preliminary Development Document was made available to the public at approximately the time of publication of the notice of proposed rulemaking and the final Development Documents entitled "Development Document for Effluent Limitations Guidelines and New Source Performance Standards for the Animal Feed, Breakfast Cereal, and Wheat Starch Segment of the Grain Mills Manufacturing Point Source Category" is now being published. The economic analysis report entitled "Economic Analysis of Proposed Effluent Guidelines for Animal Feed, Breakfast Cereal, and Wheat Starch Segment of the Grain Mills Manufacturing Point Source Category" (July 1974) was made available at the time of proposal. Copies of the final Development Document and economic analysis report will continue to be maintained for inspection and copying during the comment period at the EPA Information Center, Room 227, West Tower, Waterside Mall, 401 M Street SW., Washington, D.C. Copies will also be available for inspection at EPA regional offices and at State water pollution control agency offices. Copies of the Development Document may be purchased from the Superintendent of Documents, Government Printing Office, Washington, D.C. 20402. Copies of the economic analysis report will be available for purchase through the National Technical Information Service, Springfield, Virginia 22151.

The Development Document referred to above contains information available to the Agency concerning the major environmental effects of the regulation proposed below. The information includes: (1) The identification of pollutants present in waste waters resulting from the manufacture of animal feed,

breakfast cereal, and wheat starch, the characteristics of these pollutants, and the degree of pollutant reduction attainable through implementation of the proposed standard; and (2) the anticipated effects on other aspects of the environment (including air, subsurface waters, solid waste disposal and land use, and noise) of the treatment technologies available to meet the standard proposed.

The Development Document and the economic analysis report referred to above also contain information available to the Agency regarding the estimated cost and energy consumption implications of those treatment technologies and the potential effects of those costs on the price and production of animal feed, breakfast cereal, and wheat starch. To the extent possible, significant aspects of the material have been presented in summary form in the preamble to the proposed regulation containing effluent limitations guidelines, new source performance standards and pretreatment standards for new sources within the grain mills manufacturing category (39 FR 33470; September 17, 1974). Additional discussion is contained in the analysis of public comments on the proposed regulation and the Agency's response to those comments. This discussion appears in the preamble to the promulgated regulation (40 CFR Part 406) which currently is being published in the Rules and Regulations section of the FEDERAL REGISTER.

The options available to the Agency in establishing the level of pollutant reduction attainable through the best practicable control technology currently available, and the reasons for the particular level of reduction selected are discussed in the documents described above. In applying the effluent limitations guidelines to pretreatment standards for the introduction of incompatible pollutants into municipal systems by existing sources in the animal feed, hot cereal, ready-to-eat cereal, and wheat starch and gluten subcategories, the Agency has, essentially three options. The first is to allow unrestricted discharge to publicly owned treatment works of materials known to be adequately treated in such works (commonly classed as compatible pollutants). The second is to require the application BPT based (1977) limitations to those pollutants which interfere with, pass through or otherwise are incompatible with such works. The third is to establish a different discharge limitation for those pollutants which are treated to a known degree in publicly owned treatment works but such treatment is relatively inadequate.

Because the pollutants identified in the animal feed, hot cereal, ready-to-eat cereal and wheat starch and gluten subcategories are BOD₅, TSS, and pH and are known to have been adequately treated in publicly owned treatment works, the first option is applicable and unrestricted discharge of these pollutants to publicly owned treatment works is allowed.

Interested persons may participate in this rulemaking by submitting written comments in triplicate to the EPA In-

formation Center, Environmental Protection Agency, Washington, D.C. 20460. Attention: Mr. Philip B. Wisman. Comments on all aspects of the proposed regulations are solicited. In the event comments are in the nature of criticisms as to the adequacy of data which are available, or which may be relied upon by the Agency, comments should identify and, if possible, provide any additional data which may be available and should indicate why such data are essential to the development of the regulations. In the event comments address the approach taken by the Agency in establishing pretreatment standards for existing sources, EPA solicits suggestions as to what alternative approach should be taken and why and how this alternative better satisfies the detailed requirements of sections 301, 304, and 307(b) of the Act.

A copy of all public comments will be available for inspection and copying at the EPA Information Center, Room 227, West Tower, Waterside Mall, 401 M Street SW., Washington, D.C. 20460. The EPA information regulation, 40 CFR 2, provides that a reasonable fee may be charged for copying.

In consideration of the foregoing, it is hereby proposed that 40 CFR Part 406 be amended to add §§ 406.74, 406.84, 406.94, and 406.104, as set forth below. All comments received on or before February 3, 1975, will be considered.

Dated: December 18, 1974.

RUSSELL E. TRAIN,
Administrator.

Part 406 is proposed to be amended as follows:

Subpart G is amended by adding § 406.74 as follows:

§ 406.74 Pretreatment standards for existing sources.

Pretreatment standards under section 307(b) of the Act for a source within the animal feed subcategory which is a user of a publicly owned treatment works and a major contributing industry as defined in 40 CFR 128 (and which would be an existing point source subject to section 301 of the Act, if it were to discharge

pollutants to the navigable waters), shall be the standard set forth in 40 CFR Part 128, except that, for the purpose of this section, 40 CFR 128.121, 128.122, 128.132, 128.133 shall not apply. The following pretreatment standard establishes and 128.133 shall not apply. The following the quantity or quality of pollutants or pollutant properties, controlled by this section, which may be discharged to a publicly owned treatment works by a point source subject to the provisions of this subpart:

Pollutant or pollutant property	Pretreatment standard
pH	No limitation.
BOD5	Do.
TSS	Do.

Subpart H is amended by adding § 406.84 as follows:

§ 406.84 Pretreatment standards for existing sources.

Pretreatment standards under section 307(b) of the Act for a source within the hot cereal subcategory which is a user of a publicly owned treatment works and a major contributing industry as defined in 40 CFR Part 128 (and which would be an existing point source subject to section 301 of the Act, if it were to discharge pollutants to the navigable waters), shall be the standard set forth in 40 CFR Part 128, except that, for the purpose of this section, 40 CFR 128.121, 128.122, 128.132, and 128.133 shall not apply. The following pretreatment standard establishes the quantity or quality of pollutants or pollutant properties, controlled by this section, which may be discharged to a publicly owned treatment works by a point source subject to the provisions of this subpart:

Pollutant or pollutant property	Pretreatment standard
pH	No limitation.
BOD5	Do.
TSS	Do.

Subpart I is amended by adding § 406.94 as follows:

§ 406.94 Pretreatment standards for existing sources.

Pretreatment standards under Section 307(b) of the Act for a source within the ready-to-eat cereal subcategory which

is a user of a publicly owned treatment works and a major contributing industry as defined in 40 CFR 128 (and which would be an existing point source subject to Section 301 of the Act, if it were to discharge pollutants to the navigable waters), shall be the standard set forth in 40 CFR Part 128, except that, for the purpose of this section, 40 CFR 128.121, 128.122, 128.132, and 128.133 shall not apply. The following pretreatment standard establishes the quantity or quality of pollutants or pollutant properties, controlled by this section, which may be discharged to a publicly owned treatment works by a point source subject to the provisions of this subpart:

Pollutant or pollutant property	Pretreatment standard
ph	No limitation.
BOD5	Do.
TSS	Do.

Subpart J is amended by adding § 406.104 as follows:

§§ 406.104 Pretreatment standards for existing sources.

Pretreatment standards under section 307(b) of the Act for a source within the wheat starch and gluten subcategory which is a user of a publicly owned treatment works and a major contributing industry as defined in 40 CFR 128 (and which would be an existing point source subject to section 301 of the Act, if it were to discharge pollutants to the navigable waters), shall be the standard set forth in 40 CFR Part 128, except that, for the purpose of this section, 40 CFR 128.121, 128.122, 128.132, and 128.133 shall not apply. The following pretreatment standard establishes the quantity or quality of pollutants or pollutant properties, controlled by this section, which may be discharged to a publicly owned treatment works by a point source subject to the provisions of this subpart:

Pollutant or pollutant property	Pretreatment standard
ph	No limitation.
BOD5	Do.
TSS	Do.

DEPARTMENT OF LABOR

**Employment Standards
Administration**

MINIMUM WAGES FOR FEDERAL AND FEDERALLY ASSISTED CONSTRUCTION

**General Wage Determination Decisions,
Modifications, and Supersedeas
Decisions; Index**

DEPARTMENT OF LABOR

Employment Standards Administration

MINIMUM WAGES FOR FEDERAL AND
FEDERALLY ASSISTED CONSTRUCTIONModifications and Supersedeas Decisions
to General Wage Determination Decisions

General wage determination decisions. General Wage Determination Decisions of the Secretary of Labor specify, in accordance with applicable law and on the basis of information available to the Department of Labor from its study of local wage conditions and from other sources, the basic hourly wage rates and fringe benefit payments which are determined to be prevailing for the described classes of laborers and mechanics employed in construction activity of the character and in the localities specified therein.

The determinations in these decisions of such prevailing rates and fringe benefits have been made by authority of the Secretary of Labor pursuant to the provisions of the Davis-Bacon Act of March 3, 1931, as amended (46 Stat. 1494, as amended, 40 U.S.C. 276a) and of other Federal statutes referred to in 29 C.F.R. 1.1 (including the statutes listed at 36 FR 306 following Secretary of Labor's Order No. 24-70) containing provisions for the payment of wages which are dependent upon determinations by the Secretary of Labor under the Davis-Bacon Act; and pursuant to the provisions of Part 1 of Subtitle A of Title 29 of Code of Federal Regulations, Procedure for Predetermination of Wage Rates (37 FR 21138), and of Secretary of Labor's Orders 12-71 and 15-71 (36 FR 8755, 8756). The prevailing rates and fringe benefits determined in these decisions shall, in accordance with the provisions of the foregoing statutes, constitute the minimum wages payable on Federal and Federally assisted construction projects to laborers and mechanics of the specified classes engaged on contract work of the character and in the localities described therein.

Good cause is hereby found for not utilizing notice and public procedure thereon prior to the issuance of these determinations as prescribed in 5 U.S.C. 553 and not providing for delay in effective date as prescribed in that section, because the necessity to issue construction industry wage determination frequently and in large volume causes procedures to be impractical and contrary to the public interest.

General Wage Determination Decisions are effective from their date of publication in the Federal Register without limitation as to time and are to be used

in accordance with the provisions of 29 CFR, Parts 1 and 5. Accordingly, the applicable decision together with any modifications issued subsequent to its publication date shall be made a part of every contract for performance of the described work within the geographic area indicated as required by an applicable Federal prevailing wage law and 29 CFR, Part 5. The wage rates contained therein shall be the minimum paid under such contract by contractors and subcontractors on the work.

Modifications and supersedeas decisions to general wage determination decisions. Modifications and Supersedeas Decisions to General Wage Determination Decisions are based upon information obtained concerning changes in prevailing hourly wage rates and fringe benefit payments since the decisions were issued.

The determinations of prevailing rates and fringe benefits made in the Modifications and Supersedeas Decisions have been made by authority of the Secretary of Labor pursuant to the provisions of the Davis-Bacon Act of March 3, 1931, as amended (46 Stat. 1494, as amended, 40 U.S.C. 276a) and of other Federal statutes referred to in 29 CFR 1.1 (including the statutes listed at 36 FR 306 following Secretary of Labor's Order No. 24-70) containing provisions for the payment of wages which are dependent upon determination by the Secretary of Labor under the Davis-Bacon Act; and pursuant to the provisions of Part 1 of Subtitle A of Title 29 of Code of Federal Regulations, Procedure for Predetermination of Wage Rates (37 FR 21138), and of Secretary of Labor's Orders 13-71 and 15-71 (36 FR 8755, 8756). The prevailing rates and fringe benefits determined in foregoing General Wage Determination Decisions, as hereby modified, and/or superseded shall, in accordance with the provisions of the foregoing statutes, constitute the minimum wages payable on Federal and Federally assisted construction projects to laborers and mechanics of the specified classes engaged in contract work of the character and in the localities described therein.

Modifications and Supersedeas Decisions are effective from their date of publication in the Federal Register without limitation as to time and are to be used in accordance with the provisions of 29 CFR, Parts 1 and 5.

Any person, organization, or governmental agency having an interest in the wages determined as prevailing is encouraged to submit wage rate information for consideration by the Department. Further information and self-explanatory forms for the purpose of

submitting this data may be obtained by writing to the U.S. Department of Labor, Employment Standards Administration, Office of Special Wage Standards, Division of Wage Determinations, Washington, D.C. 20210. The cause for not utilizing the rule-making procedures prescribed in 5 U.S.C. 553 has been set forth in the original General Wage Determination Decision.

Modifications to general wage determination decisions. The numbers of the decisions being modified and their dates of publication in the Federal Register are listed with each State.

CLASSIFICATIONS

GROUP 1 - Machines with booms doing hook work, any machine handling machinery, cable spinning machines, helicopter and similar machines

GROUP 2 - All types of cranes, all types of backhoes, cableways, draglines, hoystones, all types of shovels, derricks, trench shovels, trenching machines, hoists, with 2 towers, pavers 2LE and over, all types overized cranes, building hoists (double drum), grapplels, motor patrols (fine grade), mucking machines in tunnel, all front end loaders 3-1/2 c.y., and over, tandem scrapers, pipin type backhoes, boat captains, batch plant operators (concrete), drills, self contained rotary drills, fork lifts (20' lift & over), and similar machines

GROUP 3 - Conveyors (except building), bucketing boats (single arm), scrapers, tounpalls, spreaders (spinals), high or low pressure boilers, concrete pumps, well drillers, belldozers, trectors, asphalt plant engineers, rollers (high grade finishers), ditch witch type trenchers, all loaders under 3-1/2 c.y., mechanic-welders, motorpatrols, core drill operator, forklift trucks under 20' lift, similar machines

GROUP 4 - Conveyors (building), concrete spreader, welding machines, well points, compressors, pumps, heaters, farm tractors, form line graders, fine grade machines, road finishing machines, concrete breaking machines, rollers, ocean pldriving, air, power broom, seeding spreader, tiraman (for power equipment), and similar machines

GROUP 5 - Firemae, grease trucks

GROUP 6 - Oilers and deck lands (personnel boats), core drill helcor

GROUP 7 - All machines with booms (including lifts, masts and leads)

PAID HOLIDAYS (where applicable)

A-New Year's Day; B-Memorial Day; C-Independence Day; D-Labor Day;
E-Thanksgiving Day; F-Christmas Day.

700-770-7725

- a. Employer contributes $\frac{1}{2}$ % of basic hourly rate for 5 years or more of service or $\frac{1}{2}$ % of basic hourly rate for 6 months to 5 years or more of service as vacation pay credit.
- b. 6 paid holidays: A through F.
- c. 1 paid holiday: Labor Day - providing employee is currently on payroll and would be scheduled to work the holiday, also employee must work the day prior to and after the holiday.
- d. 6 paid holidays: A through F - providing the employee worked the scheduled work day preceding and following the holiday.
- e. 1 paid holiday: Election Day.
- f. 6 paid holidays: A through F - for employee currently employed by the employer at the time the holiday occurs, and who would otherwise be scheduled to work and would work on such days if it were not observed as a holiday, and who has worked under working conditions, the last regularly scheduled workday after the holiday.
- g. 7 paid holidays: Washington's Birthday, Good Friday, Memorial Day, Labor Day, Presidential Election Day, Veteran's Day and Thanksgiving.

GROUP I: Crane, hydro crane, shovels, crane type backfiller, tower crane, mobile
& crawler & stationary, derricks & hoist (3-drum); Dragline, Dragline, Drott Turbo
and similar types considered as cranes, backhoe, derrick boats, pile driver & side
rigs, clam shells, locomotive cranes, road pavers-single drum & tri bat-
ter, motor patrols & power blades-Demore, elevating similar types, mechanics cen-
tral concrete mixing plant oper. blacktop plant operators & plant engineers gravel,
caisson rig-require oiler, self-scoopering scooper, dredges (all types) top-
toe-crane type (require oiler). Speculated rate on crane & derricks booms, .01 per
hour, per ft., over 80' including jib all cherry pickers, cherry pickers (over 15
tons require oiler), work boat, Ross carrier, helicopter, derrick and towerderrick
GROUP II: Asphalt heater & planter combination (used to plant streets), trench ma-
chines, pumpcrete-beltcrete concretecretecrete-type pumps & system, bulkier & pump,
dinkys, towerpallet-all, and similar types, multiple unit earth movers, .25 per
hour for each scoop over one, scoops (all sizes), pushboats, endloaders (all types),
side booms, P-3 one-pass soil cement machines & similar types, wheel tractors (in-
dustrial or farm-type with four-hoe-end loader or other attachments, backfillers,
asphalt surfacing machines wheel loader, fork lifts, formless finishings, jeep
w/fitting machine or other attachments, tunneling, rockcrusher, automatic cement
& gravel batching mobile drills (soil testing) & similar types, pugmill with pump,
flattery spreader or similar types (require oiler), heavy equipment greaser (top
greaser on spread), power launchers, boring machine, C. M. I. & similar types (re-
quire oiler), all (10 & 2) drum hoists, deviating system, straw blower, hydro-
seeder, boring machine, hydro-seeder, boring machine, hydroboom, starting engineer
on pipeline, 3 M.D. & similar types
GROUP III: Apoco spreader or similar types, tractors (truck-type) without power
units pulling rollers, rollers on asphalt-brick or macadam, concrete breakers, con-
crete spreaders, center stripper, cement finishing machines, vibro tamers (all
similar types) self-propelled, mechanical bull floats, mixers over three bag to
275, wheel & track tractors, concrete rolling power blades or elevating grader, Barber
Rex rail, Clary screw, male pulling rollers, pugmill without pump, Barber Greene
or similar loaders, track-type tractors w/power unit attached (minimum fireman,
screed man or laydown machine, and spray machine on paving)

GROUP IV: Power subgrader, oil distributor, straight tractor, tractor (without
attachments), curb machines, paver ditch machines, truck crane oiler, and truck
type tractor oilers

GROUP V: Herman Nelson Heater, Deervo, Warner, silent gas & similar types, one
engineer will operator 1-5 & after 5, two operators will be required, self-pro-
pelled concrete saws, assistant heavy equipment greater crawler crane and skid
oilers, rollers 5 ton & under on earth and gravel, from graders, pump (1) or
(20), light plant (10 or (2), generator (1) or (2), conveyor (1) or (2), welding
machine (1) or (2) mixer 3 bags & under, and bulk cement plant

Riggers & Welders - Receive rates prescribed for crafts performing operations to which rigging & welding are incidental.

PAID HOLIDAYS: A-New Year's Day, B-Memorial Day, C-Independence Day, D-Labor Day, E-Thanksgiving Day, F-Christmas Day.

FOOTNOTES:

- Holidays: A through F
- Employer contributes $\frac{1}{4}$ basic hourly rate for 5 years or more of service or $\frac{1}{2}$ basic hourly rate for 6 months to 5 years service as vacation pay credit.
- Holidays: A through F plus Washington's Birthday, Good Friday and Christmas Eve (provided an employee has worked at least 45 full days during the 120 calendar days prior to the holiday, and the regular scheduled work days immediately preceding and following the holiday).
- \$8.00 per week when employee has worked 90 days and works 3 days in a work week.
- Holidays: A-D-E and F (provided the employee works the regularly scheduled work days immediately preceding and following the holiday).
- Five paid holidays: Labor Day, Veteran's Day, Thanksgiving Day, Christmas Day and New Year's Day.
- One week's paid vacation providing employee has worked 3 years and a minimum of 1450 hours during any calendar year.

INDEX TO GENERAL WAGE DETERMINATION DECISIONS AND MODIFICATIONS AS OF DECEMBER 6, 1974

There is set forth below an index to general wage determination decisions and modifications as published in the Federal Register pursuant to the Davis-Bacon and related Acts. The index lists general wage determination decisions

and modifications by State and county. An updated index is published on the first Friday of each month.

The index is published for the convenience of the public and the Department of Labor will endeavor to keep it accurate and up to date. In the event the data in the index and published general decisions do not coincide, the published general decisions shall control.

Abbreviations:

(B)—Building Construction.
(D)—Dredging Construction.
(F)—Flood Control Construction.
(H)—Heavy Construction.
(Hw)—Highway Construction.
(R)—Residential Construction.
Mod.—Modification.
(HE)—Heavy Engineering.
(LE)—Light Engineering.

(U)—Utility.
(S)—Streets.
(W&S)—Water and Sewer Lines.

Signed at Washington, D.C. this 27th day of December 1974.

RAY J. DOLAN,
Assistant Administrator,
Wage and Hour Division.
