PART 180—TOLERANCES AND EXEMPTIONS FROM TOLERANCES FOR PESTICIDE CHEMICALS IN OR ON RAW AGRICULTURAL COMMODITIES**Methazole; Correction**

In FR Doc. 75-8304 appearing on page 14083 in the issue for Friday, March 28, 1975, § 180.357 of Subpart C, should be corrected to read as follows:

§ 180.357 Methazole, tolerances for residues.

A tolerance is established for combined negligible residues of the herbicide methazole (2-(3,4-dichlorophenyl)-4-methyl-1,2,4-oxadiazolidine-3,5-dione) and its metabolites 1-(3,4-dichlorophenyl)-3-methylurea (DCPMU) and 3,4-dichlorophenylurea (DCPU) in or on cottonseed at 0.1 part per million.

PART 180—TOLERANCES AND EXEMPTIONS FROM TOLERANCES FOR PESTICIDE CHEMICALS IN OR ON RAW AGRICULTURAL COMMODITIES**Butralin**

On October 26, 1973, notice was given (38 FR 29645) that Amchem Products, Inc., Brookside Ave., Ambler, PA 19002, had filed a petition (PP 4F1431) with the Environmental Protection Agency (EPA). This petition proposed establishment of a tolerance for negligible residues of the herbicide butralin (formerly named dibutalrin (N-sec-butyl-4-tert-2,6-dinitroaniline)) in or on cottonseed and soybeans at 0.1 part per million. Amchem subsequently amended the petition to propose a tolerance for negligible residues of butralin in or on soybean forage at 0.1 part per million as well.

The data submitted in the petition and other relevant material have been evaluated. The pesticide is considered useful for the purpose for which the tolerance is sought. There is no reasonable expectation of residues in eggs, meat, milk, or poultry, and § 180.6(a)(3) applies. The tolerance as established will protect the public health.

Any person adversely affected by this regulation may, on or before May 27, 1975, file written objections with the Hearing Clerk, Environmental Protection Agency, 401 M Street SW., East Tower, Room 1019, Washington, D.C. 20460. Such objections should be submitted in triplicate and specify the provisions of the regulation deemed objectionable and the grounds for the objections. If a hearing is requested, the objections must state the issues for the hearing. A hearing will be granted if the objections are supported by grounds legally sufficient to justify the relief sought.

Effective on April 25, 1975, Part 180, Subpart C, is amended by adding § 180.358 to read as set forth below.

(Sec. 408(d)(2), Federal Food, Drug, and Cosmetic Act (21 U.S.C. 346a(d)(2)))

Dated: April 18, 1975.

Deputy Assistant Administrator
for Pesticide Programs.

§ 180.358 Butralin, tolerances for residues.

Tolerances are established for negligible residues of the herbicide butralin (4-(1,1-dimethylethyl)-N-(1-methylpropyl)-2,6-dinitrobenzenamine) in or on cottonseed, soybeans, and soybean forage at 0.1 part per million.

PART 428—RUBBER PROCESSING POINT SOURCE CATEGORY**Tire and Synthetic Segment**

On February 19, 1975, there was published in the FEDERAL REGISTER (40 FR 7109) a notice of proposed rulemaking setting forth certain amendments to the effluent limitations and guidelines for existing sources and standards of performance and pretreatment standards for new sources for the tire and synthetic segment of the rubber processing point source category. Interested persons were given the opportunity to submit, not later than March 21, 1975, written comments and data concerning the proposed amendments.

One comment was received which stated that the 1959 date used to distinguish between older and newer tire and inner tube plants is arbitrary and not based on facts and that the date of October 18, 1972 would be more realistic.

The cutoff date of 1959 was established to differentiate between older and newer tire and inner tube plants. The date is based upon analysis of the information gathered during the development phase of the effluent limitations guidelines study for this industry subcategory. The Agency and its contractor obtained and considered information from the literature, industry permit applications, plant inspections and industry and trade association sources.

The 1959 cutoff date was included in the proposed regulations for this industry subcategory on October 11, 1973, FR 28224. No comments in opposition to the use of the date of 1959 were received as a result of the Agency's request for comments.

Based on this information the Agency concludes that a 1959 cutoff date is appropriate and provides a reasonable basis for distinguishing between older and newer plants in the subcategory.

The Agency recognizes that there are instances in which a specific plant may have fundamentally different factors from those used in establishing effluent limitations and guidelines for an industry subcategory. Provisions have been made in § 428.12 to account for such fundamentally different factors.

No other comments in objection have been received, and the proposed amendments are accordingly adopted without change and are set forth below, effective May 27, 1975.

Dated: April 17, 1975.

JOHN QUARLES,
Acting Administrator.
