

5. Payment and Delivery

5.1. Settlement for allotted securities must be made at the Federal Reserve Bank or Branch or at the Bureau of the Public Debt, wherever the tender was submitted. Settlement on securities allotted to institutional investors and to others whose tenders are accompanied by a payment guarantee as provided in Section 3.5., must be made or completed on or before Wednesday, December 31, 1980. Payment in full must accompany tenders submitted by all other investors. Payment must be in cash; in other funds immediately available to the Treasury; in Treasury bills, notes, or bonds (with all coupons detached) maturing on or before the settlement date but which are not overdue as defined in the general regulations governing United States securities; or by check drawn to the order of the institution to which the tender was submitted, which must be received from institutional investors no later than Monday, December 29, 1980. When payment has been submitted with the tender and the purchase price of allotted securities is over par, settlement for the premium must be completed timely, as specified in the preceding sentence. When payment has been submitted with the tender and the purchase price is under par, the discount will be remitted to the bidder. Payment will not be considered complete where registered securities are requested if the appropriate identifying number as required on tax returns and other documents submitted to the Internal Revenue Service (an individual's social security number or an employer identification number) is not furnished. When payment is made in securities, a cash adjustment will be made to or required of the bidder for any difference between the face amount of securities presented and the amount payable on the securities allotted.

5.2. In every case where full payment has not been completed on time, an amount of up to 5 percent of the face amount of securities allotted, shall, at the discretion of the Secretary of the Treasury, be forfeited to the United States.

5.3. Registered securities tendered in payment for allotted securities are not required to be assigned if the new securities are to be registered in the same names and forms as appear in the registrations or assignments of the securities surrendered. When the new securities are to be registered in names and forms different from those in the inscriptions or assignments of the securities presented, the assignment should be to "The Secretary of the Treasury for (securities offered by this

circular) in the name of (name and taxpayer identifying number)." If new securities in coupon form are desired, the assignment should be to "The Secretary of the Treasury for coupon (securities offered by this circular) to be delivered to (name and address)." Specific instructions for the issuance and delivery of the new securities, signed by the owner or authorized representative, must accompany the securities presented. Securities tendered in payment should be surrounded to the Federal Reserve Bank or Branch or to the Bureau of the Public Debt, Washington, D.C. 20226. The securities must be delivered at the expense and risk of the holder.

5.4. If bearer securities are not ready for delivery on the settlement date, purchasers may elect to receive interim certificates. These certificates shall be issued in bearer form and shall be exchangeable for definitive securities of this issue, when such securities are available, at any Federal Reserve Bank or Branch or at the Bureau of the Public Debt, Washington, D.C. 20226. The interim certificates must be returned at the risk and expense of the holder.

5.5. Delivery of securities in registered form will be made after the requested form of registration has been validated, the registered interest account has been established, and the securities have been inscribed.

6. General Provisions

6.1. As fiscal agents of the United States, Federal Reserve Banks are authorized and requested to receive tenders, to make allotments as directed by the Secretary of the Treasury, to issue such notices as may be necessary, to receive payment for and make delivery of securities on full-paid allotments, and to issue interim certificates pending delivery of the definitive securities.

6.2. The Secretary of the Treasury may at any time issue supplemental or amendatory rules and regulations governing the offering. Public announcement of such changes will be promptly provided.

Paul H. Taylor,

Fiscal Assistant Secretary.

Supplementary Statement

The announcement set forth above does not meet the Department's criteria for significant regulations and, accordingly, may be published without compliance with the Departmental procedures applicable to such regulations

FEDERAL ENERGY REGULATORY COMMISSION.

December 10, 1980.

TIME AND DATE: 10 a.m., December 17, 1980.

PLACE: Room 9306, 825 North Capitol Street NE., Washington, D.C. 20426.

STATUS: Open.

MATTERS TO BE CONSIDERED: Agenda.

Note.—Items listed on the agenda may be deleted without further notice.

CONTACT PERSON FOR MORE

INFORMATION: Kenneth F. Plumb, Secretary; telephone (202) 357-8400.

This is a list of matters to be considered by the Commission. It does not include a listing of all papers relevant to the items on the agenda; however, all public documents may be examined in the Division of Public Information.

Power Agenda—473rd Meeting, December 17, 1980, Regular Meeting (10 a.m.)

CAP-1. Project No. 3018, Thomas M. McMaster and Robert Schroder; Project No. 3239, Puget Sound Power & Light Co.

CAP-2. Project No. 3064, City of Fayetteville, North Carolina, Public Works Commission; Project No. 3124, John M. Jordan

CAP-3. Project No. 199, South Carolina Public Service Authority

CAP-4. Docket No. ER81-69-000, Georgia Power Co.

CAP-5. Docket No. ER77-578, Kansas Gas & Electric Co.

CAP-6. Docket No. ER80-508, Boston Edison Co.

CAP-7. Docket No. ER80-473, Duke Power Co.

CAP-8. Docket No. ER80-184, Oklahoma Gas & Electric Co.

CAP-9. Docket No. EF80-4031, Southwestern Power Administration—Narrows Dam Project

CAP-10. Docket No. EL79-8, Central Power & Light Co., et al.

CAP-11. Docket No. ES80-38, Pacific Power & Light Co.

CAP-12. Docket No. ES81-11-000, Illinois Power Co.

Miscellaneous Agenda—473rd Meeting, December 17, 1980, Regular Meeting

CAM-1. Docket No. RM81-3, annual report for electric utilities, licensees and others. Federal filings pursuant to Section 141.1

CAM-2. Docket No. RM81- , revision of requirements for issuance of securities or the assumption of liability

CAM-3. Docket No. RM79-47, statewide exemptions from incremental pricing

CAM-4. Docket No. RM80-56, revision of form No. 2, annual report for natural gas companies (class A and class B)

CAM-5. Docket No. RM81-1-000, rule adopting revised alternative fuel price ceilings for the State of Rhode Island

CAM-6. Docket No. GP80-114-000, Jack D. Hodgden, lessee and Ruth Spearman, et al., lease, Gray County, Tex.

CAM-7. Docket No. GP80-74, Crutcher-tuffs Corp.

Gas Agenda—473rd Meeting, December 17, 1980, Regular Meeting

CAG-1. Docket Nos. TA81-1-6-000 (PGA81-1, LAFUT81-1, IPR81-1 and TT81-1) and CP77-302, Sea Robin Pipeline Co.

CAG-2. Docket No. TA81-11-11-000 (PGA81-1, IPR81-1, GRI81-1 and LFUT81-1), United Gas Pipe Line Co.

CAG-3. Docket No. TA81-1-58-000 (PGA81-1 and IPR81-1), Texas Gas Pipe Line Corp.

CAG-4. Docket No. RP81-20-000, U-T offshore system

CAG-5. Docket No. RP81-17-000, Midwestern Gas Transmission Co.

CAG-6. Docket No. RP81-18-000, High Island offshore system

CAG-7. Docket No. RP81-19-000, Northern Natural Gas Co.

CAG-8. Docket Nos. RP80-135 and TA80-1-16, National Fuel Gas Supply Corp.

CAG-9. Docket No. RP80-61, Consolidated Gas Supply Corp.

CAG-10. Docket Nos. RP73-110 and RP74-96, Natural Gas Pipeline Co. of America

CAG-11. Docket No. RP79-22 (storage), Consolidated Gas Supply Corp.

CAG-12. Docket No. CI78-816, Exxon Corp.; FERC Gas rate schedule No. 159, Chevron U.S.A. Inc.; Docket No. CI77-145-001, Freeport Oil Co.; Docket No. CI77-334-001, Southland Royalty Co.; Docket No. CI77-18, Transco Exploration Co.; Docket Nos. CI74-392 and CI78-882, Exxon Corp.

CAG-13. Docket No. RI81-2-000, Felmont Oil Corp.

CAG-14. Docket Nos. CP75-140, et al., Pacific Alaska LNG Co., et al.; Docket Nos. CP74-160, et al., Pacific Indonesia LNG Co., et al.; Docket No. CI78-453, Pacific Lighting Gas Development Co.; Docket No. CI78-452, Pacific Simco Partnership

CAG-15. Docket No. CP80-560, Northern Border Pipeline Co.

CAG-16. Docket No. CP79-473, Alabama-Tennessee Natural Gas Co.

CAG-17. Docket No. CP75-23, Tennessee Gas Pipeline Co., a division of Tenneco Inc.

CAG-18. Docket No. CP80-554, Cities Service Gas Co.

CAG-19. Docket No. CP80-537, Northwest Pipeline Corp.

CAG-20. Docket No. CP80-446, Natural Gas Pipeline Co. of America

CAG-21. Docket No. CP79-416-001, ANR Storage Co.

CAG-22. Docket No. CP80-313, Michigan Wisconsin Pipe Line Co.; Docket No. CP74-317, Great Lakes Gas Transmission Co.

CAG-23. Docket No. CP80-452, Cimarron Transmission Co., Natural Gas Pipeline Co. of America and United Gas Pipe Line Co.

CAG-24. Docket No. CP80-509, Southern Natural Gas Co.

CAG-25. Docket No. CP80-373, Tennessee Gas Pipeline Co.

CAG-26. Docket No. CP80-510, Consolidated System LNG Co.

Power Agenda—473rd Meeting, December 17, 1980, Regular Meeting

I. Licensed Project Matters

P-1. Project No. 2750, Town of Springfield, Vermont

II. Electric Rate Matters

ER-1. Docket No. ER 80-204, CP National Corp.

Miscellaneous Agenda—473rd Meeting, December 17, 1980, Regular Meeting

SECURITIES AND EXCHANGE COMMISSION.

"FEDERAL REGISTER" CITATION OF PREVIOUS ANNOUNCEMENT: 45 FR 80629, December 5, 1980.

STATUS: Closed/open meeting.

PLACE: Room 825, 500 North Capitol Street, Washington, D.C.

DATE PREVIOUSLY ANNOUNCED: Tuesday, December 2, 1980.

CHANGES IN THE MEETING: Additional meeting and items. The following item was considered at a closed meeting scheduled for Tuesday, December 9, 1980, at 10 a.m.:

Litigation matter.

The following additional items will be considered at a closed meeting scheduled for Thursday, December 11, 1980, following the 10 a.m. open meeting:

Settlement of administrative proceeding of an enforcement nature.
Formal orders of investigation.

The following additional item will be considered at an open meeting scheduled for Thursday, December 11, 1980, at 10 a.m.:

Consideration of whether to adopt, on an interim basis, the following rules under the Investment Company Act of 1940 that would (1) permit any person controlled by a business development company and certain affiliated persons of such a person to enter into a transaction with such a company without first obtaining an order approving the transaction, and (2) permit a business development company to acquire the securities of and operate a wholly-owned small business investment company. For further information, please contact Marsha Gilman at (202) 272-3036.

Chairman Williams and Commissioners Loomis, Evans, and Friedman determined that Commission business required the above changes and that no earlier notice thereof was possible.

At times changes in Commission priorities require alterations in the scheduling of meeting items. For further information and to ascertain what, if any, matters have been added, deleted or postponed, please contact: Bruce Mendelsohn at (202) 272-2091.

December 10, 1980.

AGENCY PUBLICATION ON ASSIGNED DAYS OF THE WEEK

The following agencies have agreed to publish all documents on two assigned days of the week (Monday/Thursday or Tuesday/Friday). This is a voluntary program. (See OFR NOTICE FR 32914, August 6, 1976.)

Monday	Tuesday	Wednesday	Thursday	Friday
DOT/SECRETARY	USDA/ASCS		DOT/SECRETARY	USDA/ASCS
DOT/COAST GUARD	USDA/FNS		DOT/COAST GUARD	USDA/FNS
DOT/FAA	USDA/FSQS		DOT/FAA	USDA/FSQS
DOT/FHWA	USDA/REA		DOT/FHWA	USDA/REA
DOT/FRA	MSPB/OPM		DOT/FRA	MSPB/OPM
DOT/NHTSA	LABOR		DOT/NHTSA	LABOR
DOT/RSPA	HHS/FDA		DOT/RSPA	HHS/FDA
DOT/SLSDC			DOT/SLSDC	
DOT/UMTA			DOT/UMTA	
CSA			CSA	

Documents normally scheduled for publication on a day that will be a Federal holiday will be published the next work day following the holiday. Comments on this program are still invited. Comments should be submitted to the Day-of-the-Week Program Coordinator, Office of the Federal Register, National Archives and Records Service, General Services Administration, Washington, D.C. 20408

NOTE: As of September 2, 1980, documents from the Animal and Plant Health Inspection Service, Department of Agriculture, will no longer be assigned to the Tuesday/Friday publication schedule.

REMINDERS

The "reminders" below identify documents that appeared in issues of the **Federal Register** 15 days or more ago. Inclusion or exclusion from this list has no legal significance.

Rules Going Into Effect Today

COMMUNITY SERVICES ADMINISTRATION

- 74928 11-13-80 / State Agency Assistance funded under Section 231 of the Economic Opportunity Act; policy statement revision and changes in administrative requirements

COST ACCOUNTING STANDARDS BOARD

- 48573 7-21-80 / Cost of money as an element of the cost of capital assets under construction

ENERGY DEPARTMENT

Economic Regulatory Administration—

- 74672 11-10-80 / Synthetic natural gas feedstock allocation regulations; exemption of naphtha and allocations of propane

Federal Energy Regulatory Commission—

- 77421 11-24-80 / High-cost natural gas; production enhancement procedures

ENVIRONMENTAL PROTECTION AGENCY

- 75212 11-14-80 / Approval of implementation plan revision; Florida

JUSTICE DEPARTMENT

Immigration and Naturalization Service—

- 75166 11-14-80 / Petition to classify alien as immediate relative of a U.S. citizen or as a preference immigrant; Revision of requirements for petitions based on adoptive relationships [Corrected at 45 FR 76652, 11-20-80]

Prisons Bureau—

- 75124 11-13-80 / Control, custody, care, treatment, and instruction of inmates; social education guidelines

- 75127 11-13-80 / Inmate control, custody, care, treatment, and instruction; pre-trial inmates; work/study release; and searches of housing units, inmates, and inmate work areas

LABOR DEPARTMENT

Occupational Safety and Health Administration—

- 64872 9-30-80 / Occupational exposure to cotton dust

PERSONNEL MANAGEMENT OFFICE

- 75567 11-14-80 / Nondiscrimination on the basis of handicap in programs and activities receiving or benefiting from Federal financial assistance

SECURITIES AND EXCHANGE COMMISSION

- 15925 3-12-80 / Bank holding companies and banks—requirements for form and content of financial statements

List of Public Laws

Last Listing December 11, 1980

This is a continuing listing of public bills from the current session of Congress which have become Federal laws. The text of laws is not published in the **Federal Register** but may be ordered in individual pamphlet form (referred to as "slip laws") from the Superintendent of Documents, U.S. Government Printing Office, Washington, D.C. 20402 (telephone 202-275-3030).

H.R. 7020 / Pub. L. 96-510 Comprehensive Environmental Response, Compensation, and Liability Act of 1980 (Dec. 11, 1980; 94 Stat. 2767) Price \$2.25.

H.R. 6410 / Pub. L. 96-511 Paperwork Reduction Act of 1980 (Dec. 11, 1980; 94 Stat. 2812) Price \$1.25.

**PRINCIPLES OF REGULATIONS WRITING
SEMINAR**

- WHAT:** The aim of the seminar is to improve the quality of Federal regulations by teaching how to design and draft clear regulations.
The Principles of Regulations Writing Seminar covers the following concepts:
1. How to prepare for drafting: adopting a style manual, knowing your audience.
 2. How to draft a regulation: organizing a regulation to make it easier for the reader, using consistent clear language, avoiding jargon and legalese, and reviewing and redrafting systematically.
 3. How to prepare a regulation to comply with Federal Register publication requirements: writing an effective preamble and explaining how the regulation amends the Code of Federal Regulations.
- WHO:** Any Federal employee who drafts documents or who reviews for substance documents that are published in the Federal Register.
- WHEN:** January 21, 1981; February 25, 1981; May 13, 1981
- HOW:** Register for the class by sending a training authorization form to us. After we receive your training authorization form, we will mail you a confirmation letter that will serve as an admission ticket to the class. Tuition will not be charged for an applicant who cancels a confirmed reservation five work days before the day of the class. Someone may substitute for the applicant if the agency training office approves.
- WHERE:** Send your training form to: Principles of Regulations Writing Seminar, Office of the Federal Register, NARS, Washington, D.C. 20408. The class will be held in Washington, D.C., at 1100 L Street N.W. in Room 9407.
- COST:** \$75 for each person.
- FOR MORE INFORMATION:** Phone Viola Wilson
(202) 523-5240.

Part II

Department of the Treasury

Bureau of Alcohol, Tobacco and Firearms

**Proposed Establishment of Five
Viticultural Areas in California; Request
for Comments and Notice of Hearings**

DEPARTMENT OF THE TREASURY**Bureau of Alcohol, Tobacco and Firearms****27 CFR Part 9**

[Notice No. 360]

Santa Maria Valley, Santa Cruz Mountains, Los Carneros, Sonoma Valley, and North Coast Viticultural Areas.

AGENCY: Bureau of Alcohol, Tobacco and Firearms, Department of the Treasury.

ACTION: Notice of proposed rulemaking.

SUMMARY: The Bureau of Alcohol, Tobacco and Firearms (ATF) is considering the establishment of five viticultural area in California named "Santa Maria Valley," "Santa Cruz Mountains," "Los Carneros," "Sonoma Valley," and "North Coast." This proposal is the result of petitions submitted by members of the grape-growing industry. ATF feels that the establishment of viticultural areas and the subsequent use of viticultural area names as appellations of origin will help consumers of wine to identify better the wines which they may purchase.

DATE: Comments must be received by February 13, 1981.

ADDRESS: Send written comments to: Chief, Regulations and Procedures Division, Bureau of Alcohol, Tobacco and Firearms, P.O. Box 385, Washington, D.C. 20044 (Notice No. 360).

Copies of the petitions and written comments are available for public inspection during normal business hours at the: ATF Reading Room, Room 4407, Federal Building, 12th and Pennsylvania Avenue, NW, Washington, DC.

FOR FURTHER INFORMATION CONTACT: Thomas L. Minton, Research and Regulations Branch (202-566-7626).

SUPPLEMENTARY INFORMATION:**Background**

On August 23, 1978, ATF published Treasury Decision ATF-53 (43 FR 37672, 54624) revising regulations in 27 CFR Part 4. These regulations allow the establishment of definite viticultural areas. The regulations also allow the name of an approved viticultural area to be used as an appellation of origin on wine labels and in wine advertisements. Approved viticultural areas are listed in 27 CFR Part 9.

Section 4.25a(e)(1), Title 27, CFR, defines an American viticultural area as a delimited grape-growing region distinguishable by geographical features. Section 4.25a(e)(2) outlines the procedures for proposing an American viticultural area. Any interested person may petition ATF to establish a grape-growing region as a viticultural area.

The petition should include—

(a) Evidence that the name of the proposed viticultural area is locally and/or nationally known as referring to the area specified in the petition;

(b) Historical or current evidence that the boundaries of the viticultural area are as specified in the petition;

(c) Evidence relating to the geographical features (climate, soil, elevation, physical features, etc.), which distinguish the viticultural features of the proposed area from surrounding areas;

(d) A description of the specific boundaries of the viticultural area, based on features which can be found on U.S. Geological Survey (U.S.G.S.) maps of the largest applicable scale; and

(e) A copy of the appropriate U.S.G.S. maps with the boundaries prominently marked.

Proposed Regulations

This notice of proposed rulemaking is intended to solicit comments from interested parties concerning the possible establishment of these five viticultural areas. While ATF feels that the evidence submitted in the petitions concerning these areas may warrant this proposal, it is not convinced that the areas should be approved or where any particular boundaries should be drawn. Therefore, ATF is not proposing any specific regulatory language. However, on the basis of written comments received in response to this notice, testimony received at future public hearings, and its own research, ATF may issue a final rule establishing any of these proposed areas without further notice.

Santa Maria Valley

The proposed Santa Maria Valley viticultural area is located in portions of Santa Barbara and San Luis Obispo Counties, California. The proposed area consists of approximately 80,000 acres within the watershed of the Santa Maria River and includes portions of primary tributary valleys of the Cuyama River, Sisquoc River and Suey Creek to the north, Tepesquet Creek to the east, and Bradley Canyon to the south.

The petitioners state that the soils within the area are well-drained sandy and clay loams. The elevation of the proposed area ranges from 200 feet to over 2,000 feet above sea level. The petitioner also states that while a few micro-climatic regions exist within the proposed area, the areas suitable for grape production generally exhibit the climatic characteristics of Region II.

The petitioners describe the proposed boundary of the Santa Maria Valley viticultural area as follows:

Beginning at the intersection of

Highway 101 and Gary-Orcut Road, in Santa Barbara County, the boundary runs in a northerly direction along Highway 101, across the Santa Maria River for approximately 13½ miles to Los Berros Canyon Creek (elevation 200 feet). The boundary then runs northeasterly along the north bank of Los Berros Creek, then easterly and southeast to Suey Creek (elevation 1,000 feet). From Suey Creek the boundary runs southeast to a point of intersection with the San Luis Obispo County-Santa Barbara County line. The boundary then runs northeasterly along the county line to Chimney Canyon. The boundary then runs down Chimney Canyon across the Cuyama River to Suey Canyon, east of Las Coches Mountain. Then the boundary runs down the natural contour of Suey Canyon to Tepusquet Creek and subsequently down Tepusquet Canyon (elevation 1,000 feet) to the intersection of Tepusquet Canyon and the 800-foot contour line on the northern slope of the Santa Maria Valley. The boundary then runs easterly along the 800-foot contour line across the Sisquoc River and then westerly along the 800-foot contour line of the southern slope of the Santa Maria Valley to the Sisquoc Ranch Headquarters (elevation 600 feet). The boundary then runs along the 600-foot contour line to the unincorporated community of Sisquoc (elevation approximately 500 feet). From Sisquoc, the boundary runs westerly 3 miles along the southern edge of the valley to Gary-Orcut Road, then 4 miles west along Gary-Orcut Road to the beginning point on Highway 101.

Santa Cruz Mountains

The proposed Santa Cruz Mountains viticultural area is located in portions of San Mateo, Santa Clara and Santa Cruz Counties, California.

The petitioners state that the proposed area is distinguished from surrounding areas by its generally cooler climate, shorter growing season, and shallow, less fertile soils. The petitioners describe the proposed boundaries of the Santa Cruz Mountains viticultural area as follows:

Beginning at the summit of Highway 92 in San Mateo County, the boundary runs northeast to the 400-foot contour line. The boundary then travels southeast from the 400-foot contour line to Canada Road. The boundary then travels along Canada Road to Interstate 280, then along Interstate 280 to Highway 84 (Woodside Road). The boundary then runs southwest along Highway 84 to Mountain Home Road, then along Mountain Home Road to Portola Road, then southwest along Portola Road to Highway 84. The boundary then runs west on Highway 84

to the 600-foot contour line. The boundary then runs in a southeasterly direction along the 600-foot contour line to Pierce Road, then along Pierce Road to the 800-foot contour line, then along the 800-foot contour line in a southeasterly direction to Highway 152. The boundary then runs along Highway 152 in a southwesterly direction over the summit and down to the 400-foot contour line on the west side of the Santa Cruz Mountains. The boundary then runs along the 400-foot contour line in a northerly direction to Felton Empire Road. The boundary then runs along Felton Empire Road and northeast to Highway 9, then south along Highway 9 to Bull Creek, then southwest along Bull Creek to the 400-foot contour line. The boundary continues in a northwesterly manner along the 400-foot contour line to Highway 92, then northeast along Highway 92 to the beginning point.

Los Carneros

The proposed Los Carneros viticultural area is located in Napa County, California. The petitioner states that the proposed area is more suited to early-ripening grape varieties than the surrounding areas because of its generally cooler climate. The petitioner also states that the soils in the proposed area are primarily of the Haire-Coombs soil type rather than the Bale-Cole-Yolo soil types generally encountered in surrounding areas.

The petitioner describes the proposed boundary of the Los Carneros viticultural area as follows:

Beginning at the junction of the Napa County-Sonoma County line and the Napa County-Solano County line, the proposed western boundary runs north along the Napa County-Sonoma County line to the township line T.6.N./T.5.N. The northern boundary of the proposed area runs east along this township line to Browns Valley Creek. The northern boundary then follows Browns Valley Creek eastward to Napa Creek. The boundary then follows Napa Creek to the Napa River. The proposed eastern boundary would run along the Napa River to the Napa County-Solano County line. The proposed southern boundary would run along the Napa County-Solano County line from the Napa River to the beginning point.

Sonoma Valley

The proposed Sonoma Valley viticultural area is located in the southeastern portion of Sonoma County, California, and a small portion of Napa County, California. The petitioner states that the proposed area is unique in soil composition and climate. The petitioner

also states that the proposed area is the driest area in Sonoma County. The petitioner states that the area's location and surrounding mountains protect it from the intense heat of California's Central Valley and from the fog intrusion which affects the climate of the Santa Rosa-Petaluma Valley and Plains area. The petitioner describes the proposed boundaries as follows:

Beginning at the junction of Tolay Creek and San Pablo Bay, the boundary runs north along Tolay Creek to the junction of Tolay Creek and Highway 37. The boundary then runs west along Highway 37 to its junction with Highway 121. From this junction the boundary runs in a straight line to the peak of Wildcat Mountain and then in a straight line to a peak of Sonoma mountain (elevation 2,271 feet). From there, the boundary runs in a straight line to the peak of Taylor Mountain. From the peak of Taylor Mountain the boundary runs straight in a northeasterly direction to the point at which Los Alamos Road joins Highway 12. The boundary then runs easterly in a straight line to the peak of Buzzard Peak, then easterly in a straight line to the peak of Mount Hood. The boundary then runs easterly in a straight line to an unnamed peak located on the Sonoma County-Napa County line and identified as having an elevation of 2,530 feet. This unnamed peak is located in the northeast quarter of Section 9, Township 7 North, Range 6 West, Mt. Diablo Base and Meridian. The boundary then runs southeasterly along the Sonoma County-Napa County line to Los Amigos Road. The boundary then runs east along Los Amigos Road to its junction with Duhig Road, then south along Duhig Road to Ramal Road. The boundary then runs west along Ramal Road to the Sonoma County-Napa County line, then in a southwesterly direction along the county line to the point at which Sonoma Creek enters San Pablo Bay. The boundary then runs southwesterly along the shore of San Pablo Bay to the beginning point.

North Coast

The petitioner proposes that this viticultural area be known by two names, "North Coast" and "North Coast Counties." ATF has decided that in order to avoid consumer confusion and misleading labeling practices, a single defined viticultural area may have only one name. Also, ATF will not allow the use of the words "county" or "counties" in a viticultural area appellation. Since county and multi-county appellations of origin must contain the words "county" or "counties" and viticultural areas are intended to be distinct from political subdivisions, such as counties, ATF has

decided that the use of these words in a viticultural area appellation of origin would be inappropriate and misleading. Therefore, ATF is proposing only the name "North Coast" for this area.

The proposed North Coast viticultural area is comprised of the entire Mendocino, Sonoma, and Napa Counties, California. The petitioner states that the proposed North Coast viticultural area is distinguished from surrounding areas by soil, a unique combination of rainfall and temperature during the growing season, diurnal and nocturnal extremes, morning fogs, and the lowering of the water table during the ripening weeks.

The petitioner states that the boundaries of the proposed area are the statute boundaries of the counties of Napa, Sonoma, and Mendocino.

Public Participation

ATF requests comments from all interested persons concerning these proposed viticultural areas. ATF particularly requests comments concerning possible alternative boundaries for these proposed areas and comments concerning viticultural and geographical characteristics which may distinguish these areas from surrounding areas.

The proposed North Coast viticultural area includes the Sonoma Valley, Los Carneros, and previously proposed Napa Valley viticultural areas (ATF Notice No. 337 [45 FR 17026] March 17, 1980). In addition, the portion of the proposed Sonoma Valley area bounded by Los Amigos, Duhig, and Ramal Roads is located within the proposed Napa Valley Viticultural area. ATF believes that viticultural areas may be located wholly within another viticultural area if each individual area is supported by the evidence required in 27 CFR 4.25a(e)(2). While ATF was initially opposed to overlapping areas where only a portion of each area was located within the other, ATF now feels that this issue of overlapping areas should be opened for public comment. For this reason, ATF is interested in receiving any information, data, or opinions concerning those areas which are located in more than one proposed viticultural area. Further, ATF is especially interested in receiving comments on the general issue of allowing viticultural areas to overlap.

All comments received before the closing date will be carefully considered. Comments received after the closing date and too late for consideration will be treated as possible suggestions for future ATF action.

All comments and the names of persons submitting comments are

available to the public. Any material which the commenter considers to be confidential or inappropriate for disclosure to the public should not be included in the comments.

Public hearings concerning these proposed viticultural areas will be scheduled at a later date and will be announced in a later notice.

Drafting Information

The principal author of this document is Thomas L. Minton, Research and Regulations Branch, Bureau of Alcohol, Tobacco and Firearms.

Authority

These viticultural areas are proposed under the authority in 27 U.S.C. 205.

Signed: October 1, 1980.

G. R. Dickerson,
Director.

Approved: December 5, 1980.

Richard J. Davis,
Assistant Secretary (Enforcement and Operations).

BILLING CODE 4810-31-M

27 CFR Part 9

[Notice No. 361; Re: Notice Nos. 350-354, 356 and 360]

Viticultural Area Hearings—

AGENCY: Bureau of Alcohol, Tobacco and Firearms, Department of the Treasury.

ACTION: Notice of hearings.

SUMMARY: This notice announces the times and places the Bureau of Alcohol, Tobacco and Firearms (ATF) will hold ten public hearings to receive comments relating to the establishment of ten proposed viticultural areas. The proposed viticultural areas are North Coast, Sonoma Valley, Los Carneros, Guenoc Valley, Santa Cruz Mountains, Lime Kiln Valley, Santa Maria Valley, and San Pasqual Valley in California, Fennville in Michigan, and Finger Lakes in New York. ATF will hear testimony relating to a particular viticultural area at each particular hearing.

DATES: Hearing dates—

- (1) North Coast—January 12, 1981, at 9:30 a.m.
- (2) Sonoma Valley—January 13, 1981, at 9:30 a.m.
- (3) Los Carneros—January 14, 1981, at 9:30 a.m.
- (4) Guenoc Valley—January 15, 1981, at 9:30 a.m.
- (5) Santa Cruz Mountains—January 19, 1981, at 9:30 a.m.
- (6) Lime Kiln Valley—January 21, 1981, at 9:30 a.m.
- (7) Santa Maria Valley—January 23, 1981, at 9:30 a.m.

(8) San Pasqual Valley—January 26, 1981, at 9:30 a.m.

(9) Fennville—February 3, 1981, at 10:00 a.m.

(10) Finger Lakes—February 11, 1981, at 10:00 a.m.

(Evening sessions for each hearing will be held if necessary beginning at 7:00 p.m.)

Requests to comment—Requests to comment at these hearings must be received no later than 10 days before the scheduled date of the appropriate hearing.

ADDRESSES: Send requests to comment to: Chief, Regulations and Procedures Division, Bureau of Alcohol, Tobacco and Firearms, P.O. Box 385, Washington, DC 20044.

Copies of the petitions, the notices of proposed rulemaking, the hearing transcripts, and any written comments concerning these proposed viticultural areas will be available for public inspection during normal business hours at the: ATF Reading Room, Federal Building, Room 4407, 12th and Pennsylvania Avenue, N.W., Washington, DC.

Hearing Locations—

(1) North Coast, Sonoma Valley, Los Carneros, Guenoc Valley—Federal Building, 777 Sonoma Avenue, Room 113C, Santa Rosa, California.

(2) Santa Cruz Mountains—City Hall, City of Santa Clara, 1500 Warburton Avenue, Santa Clara, California.

(3) Lime Kiln Valley—County of San Benito Court House, Room 204, 5th and Martinez Streets, Hollister, California.

(4) Santa Maria Valley—Council Chambers, City of Santa Maria, 110 East Cook Street, Santa Maria, California.

(5) San Pasqual Valley—The Chamber of Commerce, 720 North Broadway, Escondido, California.

(6) Fennville—Douglas Village Hall, 86 Center Street (Corner of Center and Union Streets), Douglas, Michigan.

(7) Finger Lakes—New York Agricultural Experimental Station, Jordan Hall, 2nd Floor, 630 W. North Street, Geneva, New York.

FOR FURTHER INFORMATION CONTACT: Thomas Minton, Norman Blake, or Roger Bowling, Research and Regulations Branch, (202-566-7626).

SUPPLEMENTARY INFORMATION: On October 27, 1980, November 6, 1980, and elsewhere in this issue, ATF issued six notices of proposed rulemaking in the Federal Register to obtain comment on these ten proposed viticultural areas (45 FR 70914, 45 FR 73694), also elsewhere in this issue.

ATF believes that public hearings are essential in order to obtain and evaluate all possible information concerning these proposed viticultural areas. Persons desiring to testify should submit

a written request containing the name, address, and telephone number of the individual who will testify. They should indicate in their request *which hearing they would like to attend* and the time of day they would like to comment. To the extent possible, ATF will honor these preferences. Persons asking to comment should include in their request an outline of the topics on which they will speak. Oral comment will be limited to 10 minutes per speaker, but additional time may be granted for answering questions. Persons asking to comment should be prepared to respond to questions concerning their comments, their topic outline, or any matter relating to written comments they may have submitted.

Persons not scheduled to comment may be allowed to comment at the conclusion of each hearing if time permits.

ATF will notify all persons asking to comment and will confirm the date and time. An agenda listing the speakers will be available at each hearing.

Written comments relating to these proposed viticultural areas will be available at each hearing for public inspection. Each hearing will be conducted under the procedural rules in 27 CFR 71.41(a)(3).

ATF specifically requests comments and suggestions concerning—

(a) Evidence that the names of the proposed viticultural areas are locally and/or nationally known as referring to the areas specified in the petitions;

(b) Historical or current evidence supporting the proposed boundaries of the viticultural areas as specified in the petitions; and

(c) Evidence relating to the geographical characteristics (climate, soil, elevation, physical features, etc.) which distinguish the viticultural features of the proposed areas from surrounding areas.

Evidence obtained at the hearings along with the written comments received in response to the notices of proposed rulemaking will be used to determine whether to issue final regulations establishing any of these viticultural areas as proposed.

Drafting Information

The principal author of this document is Thomas Minton, Research and Regulations Branch, Bureau of Alcohol, Tobacco and Firearms.

Authority

This notice of hearing is issued under the authority contained in 27 U.S.C. 205.

Signed: November 26, 1980.

G. R. Dickerson,
Director.

Part III

Department of the Interior

Fish and Wildlife Service

Endangered and Threatened Wildlife and
Plants: Proposed Endangered Status and
Critical Habitat for Chihuahua Chub

DEPARTMENT OF THE INTERIOR

Fish and Wildlife Service

50 CFR Part 17

Endangered and Threatened Wildlife and Plants; Proposed Endangered Status and Critical Habitat for the Chihuahua Chub

AGENCY: Fish and Wildlife Service, Interior.

ACTION: Proposed rule.

SUMMARY: The Service proposes to determine the Chihuahua chub to be an Endangered species. This action is being taken because populations of the Chihuahua chub have been significantly reduced by habitat destruction resulting from channelization, development of flood control levees, massive diversion of surface water for irrigation, dam construction, pollution, deforestation, and excessive groundwater pumping. The Chihuahua chub occurs in the Guzman Basin including the Mimbres River of New Mexico and the Rio Casas Grandes, Rio Santa Maria, and Laguna Bustillos drainages of Mexico. Critical Habitat is included with this proposed rule. The proposed rule, if promulgated, would provide protection to wild populations of this species. Comments and information from the public are sought.

DATES: Comments from the public must be received by March 16, 1981. Comments from the Governor of New Mexico must be received by March 16, 1981. The public meeting on this proposal will be held January 6, 1981, at 7:00 p.m.

ADDRESSES: Interested persons or organizations are requested to submit comments to Director (OES), U.S. Fish and Wildlife Service, Department of the Interior, Washington, D.C. 20240. Comments and materials relating to this proposed rule are available for public inspection by appointment during normal business hours at the Service's Office of Endangered Species, Suite 500, 1000 North Glebe Road, Arlington, Virginia. The public meeting on this proposal will be held at the Light Hall Auditorium, Western New Mexico University, Silver City, New Mexico.

FOR FURTHER INFORMATION CONTACT: For further information on this proposal, contact Mr. John L. Spinks, Jr., Chief, Office of Endangered Species (703/235-2771).

SUPPLEMENTAL INFORMATION:

Background

The Chihuahua chub was first discovered in 1851, inhabiting the Mimbres River of New Mexico and the Rio Casas Grandes of Mexico. Adult chubs average about six inches in length and are usually found in pools (greater than three feet in depth) or associated with some type of cover (such as undercut banks, submerged trees or shrubs) in small and medium size streams. This species is assumed to feed primarily on aquatic invertebrates and insect larva; however, no data are available to support this assumption. Spawning occurs in the spring, possibly extending through summer, perhaps in quiet pools over beds of aquatic vegetation. Little else is known about the biology of the Chihuahua chub.

Populations of the Chihuahua chub have been significantly reduced because of recent modifications in the aquatic habitats of the Guzman Basin. The chub's preferred pool and undercut bank habitat has been virtually eliminated through a combination of factors including diversion of surface water for irrigation, channelization, construction of dams and levees, and deforestation. The excessive pumping of underground water supplies has also caused springs and other permanent aquatic habitats maintaining the species to dry up. Pollution is reported to be responsible for the elimination of chubs from some streams in Mexico.

The Service has received recommendations or resolutions urging the listings of the Chihuahua chub as Endangered from the following organizations: the Albuquerque District of the U.S. Army Corps of Engineer, the American Fisheries Society Endangered Species Committee (Fisheries 4: 29-44), the New Mexico Wildlife Federation, and the Desert Fishes Council. In 1979, the Service contracted biologists from the University of Michigan to survey the status of the Chihuahua chub in the United States and Mexico. These workers found no evidence of successful reproduction in the one small surviving Chihuahua chub population (less than ten adult fish) in the United States. They also documented the disappearance of chubs from six localities in Mexico where they were previously common or abundant. Their final report recommended that the Chihuahua chub be officially listed as an Endangered species for both the United States and Mexico.

Factors Affecting the Species

In 50 CFR 424.11(b) of the Service's regulations for Listing Endangered and Threatened Species and Designating

Critical Habitat (45 FR 13022-26) it is stated that:

"A species shall be listed if the Director determines on the basis of the best scientific and commercial data available to him after conducting a review of the species' status that the species is Endangered or Threatened because of any one or a combination of the following factors:

- (1) The present or threatened destruction, modification, or curtailment of its habitat or range;
- (2) Utilization for commercial, sporting, scientific, or educational purposes at levels that detrimentally affect it;
- (3) Disease or predation;
- (4) Absence of regulatory mechanisms adequate to prevent the decline of a species or degradation of its habitat; and
- (5) Other natural or manmade factors affecting its continued existence."

These factors, and their application to the Chihuahua chub, are as follows:

1. *The present or threatened destruction, modification, or curtailment of its habitat or range.* The Mimbres River of New Mexico, which in the past supported an abundant Chihuahua chub population, has been drastically modified by agricultural and flood control developments. These activities have resulted in the elimination of much of the natural pool and undercut bank habitat, restricting the present population, probably fewer than ten adult chubs, to one small section of the Mimbres River. Further flood reclamation work, maintenance of push-up irrigation diversions, channelization, and development of flood control levees without concern for the Chihuahua chub will severely threaten the continued existence of this species in the United States. Studies in Mexico revealed that historic Chihuahua chub habitats were destroyed because of pollution, massive diversion of surface waters for irrigation, development of hydroelectric facilities, construction of levees, and channelization. Some streams were found to be completely dry, probably due to excessive pumping of underground aquifers or diversion of surface waters. Undoubtedly, manipulation of the stream habitat will continue as the interior of Mexico and areas along the Mimbres River in New Mexico are further developed.

2. *Utilization for commercial, sporting, scientific, or educational purposes at levels that detrimentally affect it.* The Chihuahua chub is not being pursued for any commercial endeavors. In the early twentieth century, the chub was taken for sport and referred to as "gila trout." However, this practice does not occur today, at least partially because of the extremely low density of the existing population. It

is possible that the chub is taken, incidentally, as a bait fish.

3. *Disease or predation.* Some predation of Chihuahua chubs by introduced rainbow trout and other species probably occurs, but the impact of this factor is considered to be negligible if adequate escape cover is available.

4. *Absence of regulatory mechanisms adequate to prevent the decline of a species or degradation of its habitat.* Laws concerning State endangered species of New Mexico do not provide mechanisms to encourage habitat protection. Listing the Chihuahua chub and designation of its Critical Habitat, pursuant to the Endangered Species Act of 1973 (87 Stat. 884; 16 U.S.C. 1531 et seq.), as amended, would protect its habitat from destructive Federal actions.

5. *Other natural or manmade factors affecting its continued existence.* The introduction of exotic fishes has been documented to have detrimental effects on many types of native stream fish. Therefore, it has been assumed that the establishment of the rainbow trout, carp, longfin dace, black bullhead, mosquitofish, and rock bass within the range of the Chihuahua chub is a threat to its continued existence. However, the effect of this factor on the Chihuahua chub needs to be further studied.

Critical Habitat

50 CFR 424.02 defines "Critical Habitat" to include (a) areas within the geographical area occupied by the species at the time that species is listed which are essential to the conservation of the species and (b) which may require special management considerations or protection; and specific areas outside the geographic area occupied by the species at the time, upon a determination by the Director that such areas are essential for the conservation of the species.

The proposed Critical Habitat for the Chihuahua chub is as follows: the Mimbres River between the confluence of Allie Canyon and Sheppard Canyon (S $\frac{1}{4}$ Section 17, Section 20, Section 28, NE $\frac{1}{4}$ Section 29, Section 33, T16S; R11W), and two small spring-fed tributaries (less than 100 yards) entering the Mimbres River in the Critical Habitat Section (NW $\frac{1}{4}$ Section 28, SW $\frac{1}{4}$ Section 28, NW $\frac{1}{4}$ Section 33, T16S R11W) within Grant County, New Mexico. Although the actual streambed is subject to State jurisdiction, the waterflow is fully appropriated and the adjacent banks are privately owned.

As specified in the listing regulations [50 CFR 424.12(b)], "The Director shall consider in determining what areas are Critical Habitat those physiological,

behavioral, ecological, and evolutionary requirements essential to the conservation of the species and which may require special management consideration or protection. These requirements include, but are not limited to:

- (1) Space for individual and population growth and normal behavior;
- (2) Food, water, air, light, minerals, or other nutritional or physiological requirements;
- (3) Cover or shelter;
- (4) Sites for breeding, reproduction, rearing of offspring . . . and generally,
- (5) Habitats that are protected from disturbance or are representative of the historic geographical and ecological distributions of listed species."

Adult Chihuahua chub appear to be dependent on habitats that have some combination of pools at least three feet deep, shade, and undercut banks or other cover such as downed logs and submerged shrubs. This habitat evidently provides both escape cover and a suitable foraging situation, and is present in the proposed Critical Habitat area. Sites for breeding, reproduction, and development of juvenile chub are found in the proposed area.

Activities associated with irrigation agriculture, the primary land use surrounding the proposed Critical Habitat, are potentially detrimental to the continued existence of the Chihuahua chub. These primarily consist of physical modification of the natural streambed done without regard for presence of the chub, including the annual maintenance of push-up irrigation diversion, channelization of the stream, and the construction of flood control levees close to pools containing the remnant chub population. With some modification, most of these activities could be carried out without adversely impacting the chub population (e.g., by developing permanent irrigation diversions and flood control levees a safe distance from the chub habitat). Channelization in any form within the Critical Habitat would likely be detrimental to chubs, but there would probably be no incentive to modify the stream channel in such a manner if adequate flood protection was available for local property owners. In addition, any future excessive ground water pumping or surface water diversion in the vicinity of the Critical Habitat for any purpose could be detrimental to the chub by limiting flows in the Mimbres River. The recent proposed use of 210.33 acre feet of water per annum from a well near San Lorenzo, New Mexico (four miles downstream of the proposed Critical Habitat) for domestic and municipal purposes is not expected to

adversely impact the present chub habitat.

No current or proposed Federal action should impact the proposed Critical habitat. However, the U.S. Army Corps of Engineers, the Soil Conservation Service, and the Federal Disaster Assistance Administration are authorized to provide Emergency Levee Rehabilitation (Public Law 84-99) for private flood control structures damaged by high waters. Consequently, a future flood on the Mimbres River may necessitate such Federal flood control improvement projects in the proposed Critical Habitat. Before implementing such projects these agencies would be required to enter into Section 7 consultation with the Fish and Wildlife Service to insure their actions would not adversely modify the Critical Habitat.

Effect of This Proposal if Published as a Final Rule

Regulations already published in Title 50, § 17.21 of the Code of Federal Regulations set forth a series of general prohibitions and exceptions which apply to all Endangered species. These prohibitions, in part, would make it illegal for any person subject to the jurisdiction of the United States to take, import or export, ship in interstate commerce in the course of a commercial activity, or sell or offer for sale this species in interstate or foreign commerce. It also would be illegal to possess, sell, deliver, carry, transport, or ship any such wildlife which was illegally taken. Certain exceptions would apply to agents of the Service and State conservation agencies.

Permits may be issued to carry out otherwise prohibited activities involving Endangered species under certain circumstances. Regulations governing permits are at 50 CFR 17.22. Such permits are available for scientific purposes or to enhance the propagation or survival of the species. In some instances, permits may be issued during a specified period of time to relieve undue economic hardship which would be suffered if such relief were not available.

If published as a final rule this proposal would require Federal agencies not only to insure that activities they authorize, fund, or carry out, are not likely to jeopardize the continued existence of the Chihuahua chub, but also requires them to insure that their actions do not result in the destruction or adverse modification of this Critical Habitat which has been determined by the Director of the Service.

The Service is required to consider economic and other impacts of specifying a particular area as Critical

Habitat. The Service has prepared a draft impact analysis. The Service is notifying Federal agencies that may authorize, fund or carry out activities in the area under consideration in this proposed rule. These Federal agencies and other interested persons or organizations are requested to submit information on economic or other impacts of this proposed action. The Service will prepare a final impact analysis prior to the time of publishing a final rule.

The major threat to the Chihuahua chub is the destruction of habitat caused by channelization, development of flood control levees, massive diversion of surface water for irrigation, deforestation and excessive pumping of ground water. Federal agencies (U.S. Army Corps of Engineers, Soil Conservation Service, and Federal Disaster Assistance Administration) may be authorized through the Emergency Levee Rehabilitation Program (Pub. L. 84-99), after a future flood, to repair privately constructed flood control levees along the Mimbres River in the vicinity of the proposed Critical Habitat. The Corps is aware of the presence of the Chihuahua chub and is cooperating with the Service and the New Mexico Department of Game and Fish to insure their future activities do not adversely impact the remaining population of this species. Although the U.S. Forest Service controls a significant portion of Grant County, the agency has no jurisdiction in the proposed Critical Habitat. However, the Forest Service is negotiating for the purchase of a 160 acre tract referred to as the Cooney Place, which is adjacent to the Mimbres River, for use as a trail head. If this property is acquired by the Forest Service, they plan to assess the potential of this site for the successful reintroduction of the Chihuahua chub. Since this parcel of land is not being proposed as Critical Habitat, this action will not affect any of the Forest Service's intentions concerning the Cooney Place.

The Soil Conservation Service has proposed a bank stabilization program along the Mimbres River including the Critical Habitat, but funds for this project have not been appropriated. If this action is approved, any modification effected to eliminate impacts to the Chihuahua chub is expected to have a negligible effect on the Soil Conservation Service program. The Agricultural Stabilization and Conservation Service is involved in two programs within the Mimbres River Valley: (1) the ASCP program which authorizes cost sharing for County

committee approved soil and water conservation projects, and (2) the Emergency Conservation Loan Program which provides financial assistance to farmers and ranchers for clean-up operations following floods. Both programs are restricted to activities on or involving farm lands. These programs should not be affected by the designation of Critical Habitat on the Mimbres River. No other Federal activities are known that may impact the habitat of the Chihuahua chub.

Any Federal activities in the chub's Critical Habitat potentially would be subject to conferral or consultation under the requirements of Section 7 of the Endangered Species Act of 1973, as amended. It should be emphasized, however, that modification, and not curtailment, of the affected Federal activity traditionally has been the result of Section 7 consultations.

Public Comments Solicited

The Director intends that the rules finally adopted will be as accurate and effective as possible in the conservation of any Endangered or Threatened species. Therefore, any comments or suggestions from the public, other

concerned governmental agencies, the scientific community, industry, private interests, or any other interested party concerning any aspect of these proposed rules are hereby solicited. Comments particularly are sought concerning:

(1) Biological, commercial, or other relevant data concerning any threat (or lack thereof) to the species included in this proposal;

(2) The location of and the reasons why any habitat of this species should or should not be designated as Critical Habitat as provided for by Section 7 of the Act;

(3) Additional information concerning the range and distribution of this species;

(4) Current or planned activities which may adversely modify the area which is being considered for Critical Habitat; and

(5) The foreseeable economic and other impacts of the Critical Habitat designation on federally funded or authorized projects.

Public Meeting

The Service hereby announces that a public meeting will be held on this proposed rule. The public is invited to attend this meeting and to present opinions and information on the proposal. Specific information relative to the public meeting is set out below:

Place	Date	Time	Subject
1. Silver City, N. Mex.	January 6, 1981	7 p.m.	Chihuahua Chub

National Environmental Policy Act

A draft Environmental Assessment has been prepared in conjunction with this proposal. It is on file in the Service's Washington Office of Endangered Species, 1000 North Glebe Road, Arlington, Virginia, and may be examined by appointment during regular business hours. A determination will be made at the time of final rulemaking as to whether this is a major Federal action which would significantly affect the quality of the human environment within the meaning of section 102(2)(C) of the National Environmental Policy Act of 1969 (40 CFR 1500-08).

Primary Author

The primary author of this rule is Jim Bednarz, working under contract with the Service's Albuquerque Regional Office.

The Department has determined that this is not a significantly rulemaking under 43 CFR 14 or Executive Order 12044, nor does it require preparation of a regulatory analysis.

Regulations Promulgation

1. It is proposed to amend § 17.11 by adding, in alphabetical order under Fishes, the following to the list of animals:

Dated: November 26, 1980.

Robert S. Cook,

Acting Director, Fish and Wildlife Service.

[FR Doc. 80-38709 Filed 12-12-80; 8:45 am]

BILLING CODE 4310-55-M

§ 17.11 Endangered and threatened wildlife.

Species		Historic range	Status	When listed	Critical habitat	Special rules
Scientific name	Common name					
<i>Gila nigrescens</i>	Chub, Chihuahua.....	U.S.A. (New Mexico), Mexico (Chihuahua).	E		17.95(e)	NA

§ 17.95 [Amended]

2. It is further proposed that § 17.95(e), fishes, be amended by adding Critical Habitat of the Chihuahua chub in alphabetical order as follows:

CHIHUAHUA CHUB

(*Gila nigrescens*)

New Mexico, Grant County

The Mimbres River between the confluences of Allie and Sheppard Canyons in S¼ Section 17, Section 20, Section 28, NE¼ Section 29, and Section 33, T16S; R11W; plus two small spring-

fed tributaries entering the Mimbres River within the above described Critical Habitat. The spring-fed lateral tributary in NW¼ Section 28, T16S R11W and the spring-fed tributary in SW¼ Section 28 and NW¼ Section 33, T16S R11W. Known primary constituent elements includes: Clean water with pools at least three feet deep, shade and undercut banks or other cover such as downed logs and submerged shrubs.

Fish and Wildlife Service

**Endangered and Threatened Wildlife and
Plants: Review of Plant Taxa for Listing
as Endangered or Threatened Species**

DEPARTMENT OF THE INTERIOR

50 CFR Part 17

Endangered and Threatened Wildlife and Plants; Review of Plant Taxa for Listing as Endangered or Threatened Species

AGENCY: Fish and Wildlife Service, Interior.

ACTION: Notice of review.

SUMMARY: The Service is issuing current lists of those plant taxa native to the U.S. being considered for listing as Endangered or Threatened under the Endangered Species Act of 1973, as amended (the Act). Such taxa should be considered in environmental planning. The present notice refines and updates three previous notices. A list is also provided of plant taxa which were previously under consideration for listing, but are presently presumed either extinct, not valid species, subspecies or varieties, or more abundant or widespread than previously believed and/or not subject to identifiable threats.

ADDRESSES: Interested persons or organizations are requested to submit comments to: Director (OES), U.S. Fish and Wildlife Service, Department of the Interior, Washington, D.C. 20240. Comments and materials relating to this notice are available for public inspection by appointment during normal business hours at the Service's Office of Endangered Species, Suite 500, 1000 North Glebe Road, Arlington, Virginia.

Information relating to particular plant taxa may be obtained from appropriate Service Regional Offices listed below:

- Region 1—California, Hawaii, Idaho, Nevada, Oregon, Washington, and Pacific Trust Territories**
Regional Director (ARD/FA), U.S. Fish and Wildlife Service, Suite 1692, Lloyd 500 Building, 500 NE Multnomah Street, Portland, Oregon 97232, Telephone: 503/231-6131 (FTS: 8/429-6131)
- Region 2—Arizona, New Mexico, Oklahoma, and Texas**
Regional Director (ARD/FA), U.S. Fish and Wildlife Service, P.O. Box 1306, Albuquerque, New Mexico 87103, Telephone: 505/766-3972 (FTS: 8/474-3972)
- Region 3—Illinois, Indiana, Iowa, Michigan, Minnesota, Missouri, Ohio, and Wisconsin**
Regional Director (ARD/FA), U.S. Fish and Wildlife Service, Federal Building, Fort Snelling, Twin Cities, Minnesota 55111, Telephone: 612/725-3596 (FTS: 8/725-3596)

Region 4—Alabama, Arkansas, Florida, Georgia, Kentucky, Louisiana, Mississippi, North Carolina, South Carolina, Tennessee, Puerto Rico, and the Virgin Islands
Regional Director (ARD/FA), U.S. Fish and Wildlife Service, The Richard B. Russell Federal Building, 75 Spring Street, SW., Atlanta, Georgia 30303, Telephone 404/221-3583 (FTS: 8/242-3583)

Region 5—Connecticut, Delaware, Maine, Maryland, Massachusetts, New Hampshire, New Jersey, New York, Pennsylvania, Rhode Island, Vermont, Virginia, and West Virginia
Regional Director (ARD/FA), U.S. Fish and Wildlife Service, Suite 700, One Gateway Center, Newton Corner, Massachusetts 02158, Telephone: 617/965-5100 ext. 316 (FTS: 8/829-9316, 7, 8)

Region 6—Colorado, Kansas, Montana, Nebraska, North Dakota, South Dakota, Utah, and Wyoming (Iowa and Missouri under Region 3 after October 1, 1980)
Regional Director (ARD/FA), U.S. Fish and Wildlife Service, P.O. Box 25486, Denver Federal Center, Denver, Colorado 80225, Telephone: 303/234-2496 (FTS: 8/234-2496)

Alaska Area—Area Director, U.S. Fish and Wildlife Service, 1101 E. Tudor Road, Anchorage, Alaska 99503, Telephone: 907/276-3800, (FTS: Seattle Operator: 8/399-0150; 907/276-3800)

FOR FURTHER INFORMATION CONTACT:
John L. Spinks, Jr., Chief, Office of Endangered Species, U.S. Fish and Wildlife Service, Washington, D.C. 20240 (703/235-2771), or the appropriate Regional Office.

SUPPLEMENTARY INFORMATION:**Background**

Recognizing a special need to focus on the conservation of Endangered and Threatened plants, which were first accorded the means for Federal protection therein, the Endangered Species Act of 1973 directed the Secretary of the Smithsonian Institution to prepare a report on Endangered and Threatened plant species and recommend necessary conservation measures. The Smithsonian report, published as House Document No. 94-51, included a list of more than 3,000 native taxa thought to be extinct, Threatened, or Endangered. The Service published a notice on July 1, 1975 (40 FR 27823) in which it announced that the Smithsonian report had been accepted as a petition under the terms of the Act, and that the taxa named in the report

were being reviewed for possible inclusion in the list of Endangered and Threatened species. One previous notice of review, which named four plants, had been published in April 1975 (40 FR 17612) in response to a petition. Many of these taxa were subsequently proposed for addition to the list on June 16, 1976 (41 FR 24523). Later, in 1977 (42 FR 40823) a third notice involving one plant was published. Because of the provisions of a 2-year limit for proposed rules in the Endangered Species Act Amendments of 1978 (Pub. L. 95-632), the 1976 proposal was mandatorily withdrawn in November 1979. Official notice of this withdrawal appeared on December 10, 1979 (44 FR 70796). That notice indicated that withdrawal was required because of the expiration of the deadline for making such rules final and was not related to the conservation status of the taxa proposed therein. The present notice is intended to reflect the Service's current judgment of the probable status of all plant taxa that were included either in previous notices or the 1976 proposal, as well as other taxa concerning which information has become available more recently. Taxa are grouped in several categories, as described below, in order to accurately reflect the Service's present evaluation of their status.

Category 1

Taxa for which the Service presently has sufficient information on hand to support the biological appropriateness of their being listed as Endangered or Threatened species. Because of the large number of such species, and because of the necessity of gathering data concerning the environmental and economic impacts of listings and designations of Critical Habitats, it is anticipated that the development and publication of proposed and final rules concerning such species will require several years. In some cases, although adequate data are now available to the Service to support re-proposal of species originally included in the withdrawn 1976 proposal, such species cannot be proposed for listing pending the receipt of sufficient new information warranting such action, as required by Section 4(f)(5) of the Act. The requirement that such re-proposals be based on new information has been interpreted to mean that such information must have been developed subsequent to the withdrawal of the original proposal on November 10, 1979. The Service requests that new information on the species named in this notice be submitted as soon as possible and on a continuing basis.

Also included in this list are taxa whose status in the recent past is known, but which may have already become extinct. These retain a high priority for addition to the list, subject to confirmation of extant populations. Such possibly extinct species are indicated by an asterisk (*). Double asterisks (**) indicate taxa thought to be extinct in the wild, but known to be extant in cultivation.

Category 2

Taxa for which information now in the possession of the Service indicates the probable appropriateness of listing as Endangered or threatened, but for which sufficient information is not presently available to biologically support a proposed rule. Further biological research and field study will usually be necessary to determine the status of the taxa included in this category. It is hoped that this notice will encourage such research. Some taxa included in this category are of doubtful taxonomic validity and require further taxonomic research before their status can be clarified. The fact that many of these taxa have previously been proposed and withdrawn for procedural reasons largely reflects changes in informational standards applied to listing procedures in recent years. Additional information concerning these taxa, especially that resulting from recent investigations, is particularly sought by the Service.

Category 3

Taxa no longer being considered for listing as Endangered or Threatened. Such taxa are included in one of three sub-categories, depending on the reasons for removal from consideration.

3A. Taxa for which the Service has persuasive evidence of extinction. If re-discovered, however, such species might acquire high priority for listing. At this time, the best available information indicates that the taxa included in this category, or the habitats from which they were known, are in fact extinct or destroyed, respectively.

3B. Names that on the basis of current taxonomic understanding, usually as represented in published revisions and monographs, do not represent taxa meeting the Act's definition of "species." Such supposed taxa could be re-evaluated in the future on the basis of subsequent research.

3C. Taxa that have proven to be more abundant or widespread than was previously believed and/or those that are not subject to any identifiable threat. Should further research or changes in land use indicate significant decline in any of these taxa, they may

be re-evaluated for possible inclusion in categories 1 or 2.

The plants listed in categories 1 and 2 may be considered candidates for addition to the list of Endangered and Threatened plants and, as such, consideration should be given them in environmental planning.

The Service hereby solicits information concerning the status of any of the species included in the present lists. Information is particularly sought:

1. indicating that a taxon would more properly be assigned to a category other than the one in which it appears;

2. providing new information regarding a plant previously proposed for listing and withdrawn because of the expiration of two years before a final listing action;

3. recommending an area as Critical Habitat for a candidate taxon or indicating why it would not be prudent to propose Critical Habitat for the taxon;

4. nominating for listing consideration a taxon not contained in the present lists;

5. documenting threats to any of the taxa listed;

6. indicating taxonomic revisions of any taxa included;

7. suggesting new or more appropriate common names for taxa;

8. noting errors in indicated distribution, etc.

The Service intends to consider all information received in response to this notice and to amend the contents of categories 1, 2, and 3 to reflect the current state of knowledge concerning affected plant taxa, and to indicate its intentions with regard to future listing actions. Such changes will be indicated by periodic notices in the *Federal Register*.

The following lists are arranged alphabetically by names of genera and species. Synonyms have been provided when necessary to avoid confusion. In some cases, taxa have been included which have not yet been formally described in the scientific literature. Such taxa are usually identified by a name followed by "sp. (ssp., var.) nov. ined." Known historical ranges are given by state for all included taxa.

Table 1 contains the name of all taxa presently on the list of Endangered plants. The left-hand column indicates status (E—Endangered, T—Threatened).

Table 2 contains the names of all taxa that have been proposed for listing under the Act, but for which final action has not yet been taken.

Table 3 lists all taxa in categories 1 and 2 (candidates), as explained above. The left-hand column indicates category.

Table 4 lists all taxa in category 3, with the left-hand column indicating sub-categories.

A list of genera (Table 5) is also provided, arranged by families, for cross referencing.

This notice was principally prepared by the Botany staff of the Service's Endangered Species Program in the Washington Office of Endangered species and the Service's Regional and Area Offices. The Service gratefully acknowledges the assistance of Dr. John Nagy of Brookhaven National Laboratory, Upton, New York, for extensive technical assistance in compiling the lists of taxa.

Dated: September 25, 1980.

Ronald E. Lamberton,
Acting Director, Fish and Wildlife Service.
