

Rules and Regulations

Federal Register

Vol. 46, No. 167

Friday, August 28, 1981

This section of the FEDERAL REGISTER contains regulatory documents having general applicability and legal effect, most of which are keyed to and codified in the Code of Federal Regulations, which is published under 50 titles pursuant to 44 U.S.C. 1510.

The Code of Federal Regulations is sold by the Superintendent of Documents. Prices of new books are listed in the first FEDERAL REGISTER issue of each month.

Corrections

In FR Doc. 81-23662 appearing at page 41019 in the issue of Friday, August 14, 1981, make the following changes:

1. On page 41019, third column, § 531.406(a), first line, "Civil" should read "Civilian".

2. On page 41020, first column, § 531.411, tenth line, "acceptance" should read "acceptable".

BILLING CODE 1505-01-M

DEPARTMENT OF AGRICULTURE

Agricultural Marketing Service

7 CFR Part 910

[Lemon Regulation 320; Lemon Regulation 319, Amdt. 1]

Lemons Grown in California and Arizona; Limitation of Handling

AGENCY: Agricultural Marketing Service, USDA.

ACTION: Final rule.

SUMMARY: This action establishes the quantity of California-Arizona lemons that may be shipped to the fresh market during the period August 30-September 5, 1981, and increases the quantity of lemons that may be shipped during the period August 23-29, 1981. Such action is needed to provide for orderly marketing of fresh lemons for the periods specified due to the marketing situation confronting the lemon industry.

DATES: The regulation becomes effective August 30, 1981, and the amendment is

effective for the period August 23-29, 1981.

FOR FURTHER INFORMATION CONTACT: William J. Doyle, 202-447-5975.

SUPPLEMENTARY INFORMATION:

Findings

This rule has been reviewed under Secretary's Memorandum 1512-1 and Executive Order 12291 and has been designated a "non-major" rule. This regulation and amendment are issued under the marketing agreement, as amended, and Order No. 910, as amended (7 CFR Part 910), regulating the handling of lemons grown in California and Arizona. The agreement and order are effective under the Agricultural Marketing Agreement Act of 1937, as amended (7 U.S.C. 601-674). The action is based upon the recommendations and information submitted by the Lemon Administrative Committee and upon other available information. It is hereby found that this action will tend to effectuate the declared policy of the act.

This action is consistent with the marketing policy for 1981-82. The marketing policy was recommended by the committee following discussion at a public meeting on July 7, 1981. A regulatory impact analysis on the marketing policy is available from William J. Doyle, Acting Chief, Fruit Branch, F&V, AMS, USDA, Washington, D.C. 20250, telephone 202-447-5975.

The committee met again publicly on August 25, 1981, at Los Angeles, California, to consider the current and prospective conditions of supply and demand and recommended a quantity of lemons deemed advisable to be handled during the specified weeks. The committee reports the demand for lemons is good.

It is further found that it is impracticable and contrary to the public interest to give preliminary notice, engage in public rulemaking, and postpone the effective date until 30 days after publication in the Federal Register (5 U.S.C. 553), because of insufficient time between the date when information became available upon which this regulation and amendment are based and the effective date necessary to effectuate the declared policy of the act. Interested persons were given an opportunity to submit information and views on the regulation at an open meeting, and the amendment relieves restrictions on the handling of lemons. It

is necessary to effectuate the declared purposes of the act to make these regulatory provisions effective as specified, and handlers have been apprised of such provisions and the effective times.

Information collection requirements (reporting or recordkeeping) under this part are subject to clearance by the Office of Management and Budget and are in the process of review. These information requirements shall not become effective until such time as clearance by the OMB has been obtained.

1. Section 910.620 is added as follows:

§ 910.620 Lemon Regulation 320.

The quantity of lemons grown in California and Arizona which may be handled during the period August 30, 1981, through September 5, 1981, is established at 237,473 cartons.

2. Section 910.619, *Lemon Regulation 319* (46 FR 42441, is revised to read as follows:

§ 910.619 Lemon Regulation 319.

The quantity of lemons grown in California and Arizona which may be handled during the period August 23, 1981, through August 29, 1981, is established at 237,500 cartons.

(Secs. 1-19, 48 Stat. 31, as amended; 7 U.S.C. 601-674)

Dated: August 27, 1981.

D. S. Kuryloski,

Deputy Director, Fruit and Vegetable Division, Agricultural Marketing Service.

AGENCY: Agricultural Marketing Service, USDA.

ACTION: Final rule.

SUMMARY: This action establishes a new procedure for announcing Class II prices under the 29 milk orders in this proceeding. A tentative Class II price for a particular month would be announced by the 15th day of the preceding month. The final Class II price for the month would be announced by the 5th day after the month and would reflect, if applicable, the use of the Class III price for that month as a "floor" under the Class II price. This action replaces a procedure under which Class II prices for a month had been announced by the 5th day after the month. The amendments are based on industry proposals considered at a public hearing held on August 12-14, 1980.

EFFECTIVE DATE: September 1, 1981.

Extension of Time: Issued March 19, 1981; published March 25, 1981 (46 FR 18558).

Final Decision: Issued July 8, 1981; published July 14, 1981 (46 FR 36151).

Findings and Determinations

The findings and determinations hereinafter set forth are supplementary and in addition to the findings and determinations previously made in connection with the issuance of each of the aforesaid orders and of the previously issued amendments thereto; and all of said previous findings and determinations are hereby ratified and affirmed, except insofar as such findings and determinations may be in conflict with the findings and determinations set forth herein.

The following findings are made with respect to each of the aforesaid orders:

(a) *Findings.* A public hearing was held upon certain proposed amendments to the tentative marketing agreement and to the order regulating the handling of milk in the aforesaid marketing area. The hearing was held pursuant to the provisions of the Agricultural Marketing Agreement Act of 1937, as amended (7 U.S.C. 601 *et seq.*), and the applicable rules of practice and procedure (7 CFR Part 900).

Upon the basis of the evidence introduced at such hearing and the record thereof, it is found that:

(1) The said order as hereby amended, and all of the terms and conditions thereof, will tend to effectuate the declared policy of the Act;

(2) The parity prices of milk, as determined pursuant to section 2 of the Act, are not reasonable in view of the price of feeds, available supplies of feeds, and other economic conditions which affect market supply and demand for milk in the said marketing area, and the minimum prices specified in the order as hereby amended, are such prices as will reflect the aforesaid factors, insure a sufficient quantity of pure and wholesome milk, and be in the public interest; and

(3) The said order as hereby amended regulates the handling of milk in the same manner as, and is applicable only to persons in the respective classes of industrial or commercial activity specified in, a marketing agreement upon which a hearing has been held.

(b) *Additional findings.* It is necessary in the public interest to make this order amending each of the respective orders effective not later than September 1, 1981.

In an action against the Department (*American Dairy of Evansville, Inc., et al., v. Robert Bergland, Secretary of Agriculture, et al.*), the U.S. Appeals Court of the District of Columbia Circuit ruled that the Class II price announcement procedure in the 29 orders was legally invalid due to inadequate findings when the procedure

was established in the orders. The Court ordered the Department to establish on the basis of further rulemaking procedures a method for announcing Class II prices. This order fulfills the Department's responsibilities in this matter.

The provisions of the order are known to handlers. The decision of the Assistant Secretary for Marketing and Inspection Services containing all amendment provisions of this order was issued July 8, 1981. The changes effected by this order will not require extensive preparation or substantial alteration in method of operation for handlers. In view of the foregoing, it is hereby found and determined that good cause exists for making this order amending the respective orders effective September 1, 1981, and that it would be contrary to the public interest to delay the effective date of the amended orders for 30 days after their publication in the *Federal Register*. (Sec. 553(d), Administrative Procedure Act, 5 U.S.C. 551-559).

(c) *Determinations:* It is hereby determined that:

(1) The refusal or failure of handlers (excluding cooperative associations specified in Section 8c(9) of the Act) of more than 50 percent of the milk, which is marketed within each of the specified marketing areas, to sign a proposed marketing agreement, tends to prevent the effectuation of the declared policy of the Act;

(2) The issuance of this order, amending each of the specified orders, is the only practical means pursuant to the declared policy of the Act of advancing the interests of producers as defined in the respective orders as hereby amended;

(3) The issuance of the order amending the orders (except the Red River Valley marketing area) is approved or favored by at least two-thirds of the producers, as defined under the terms of each of the orders who during the determined representative period were engaged in the production of milk for sale within the respective marketing areas;

(4) Further, the issuance of the order amending orders for the Memphis, Tennessee marketing area and the Ft. Smith, Arkansas marketing area is approved by more than three-fourths of the producers who during January 1981, the representative month, were engaged in the production of milk for sale in each of the above marketing areas; and

(5) The issuance of the order, as amended, regulating the handling of milk in the Red River Valley marketing area is approved or favored by at least two-thirds of the producers, as defined

under the terms of the order, who participated in a referendum and who during the determined representative period were engaged in the production of milk for sale in the Red River Valley marketing area.

Order relative to handling. It is therefore ordered that on and after the effective date hereof the handling of milk in each of the specified marketing areas shall be in conformity to and in compliance with the terms and conditions of each of the orders, as amended, and as hereby amended, as follows:

PART 1062—MILK IN THE ST. LOUIS-OZARKS MARKETING AREA

1. Section 1062.19 is added and reserved and a new § 1062.20 is added to read as follows:

§ 1062.19 (Reserved)

§ 1062.20 Product prices.

The following product prices shall be used in calculating the basic Class II formula price pursuant to § 1062.51a:

(a) *Butter price.* "Butter price" means the simple average, for the first 15 days of the month, of the daily prices per pound of Grade A (92-score) butter. The prices used shall be those of the Chicago Mercantile Exchange as reported and published weekly by the Dairy Division, Agricultural Marketing Service. The average shall be computed by the Director of the Dairy Division, using the price reported each week as the daily price for that day and for each following work-day until the next price is reported. A work-day is each Monday through Friday, except national holidays. For any week that the Exchange does not meet to establish a price, the price for the following week shall be the last price that was established.

(b) *Cheddar cheese price.* "Cheddar cheese price" means the simple average, for the first 15 days of the month, of the daily prices per pound of cheddar cheese in 40-pound blocks. The prices used shall be those of the National Cheese Exchange (Green Bay, WI), as reported and published weekly by the Dairy Division, Agricultural Marketing Service. The average shall be computed by the Director of the Dairy Division, using the price reported each week as the daily price for that day and for each following work-day until the next price is reported. A work-day is each Monday through Friday except national holidays. For any week that the Exchange does not meet to establish a price, the price for the following week shall be the last price that was established.

(c) *Nonfat dry milk price.* "Nonfat dry milk price" means the simple average, for the first 15 days of the month, of the daily prices per pound of nonfat dry milk, which average shall be computed by the Director of the Dairy Division as follows:

(1) The prices used shall be the prices (using the midpoint of any price range as one price) of high heat, low heat and Grade A nonfat dry milk, respectively, for the Central States production area, as reported and published weekly by the Dairy Division, Agricultural Marketing Service.

(2) For each week, determine the simple average of the prices reported for the three types of nonfat dry milk. Such average shall be the daily price for the day that such prices are reported and for each preceding work-day until the day such prices were previously reported. A work-day is each Monday through Friday except national holidays.

(3) Add the prices determined in paragraph (c)(2) of the section for the first 15 days of the month and divide by the number of days for which there is a daily price.

(d) *Edible whey price.* "Edible whey price" means the simple average, for the first 15 days of the month, of the daily prices per pound of edible whey powder (nonhygroscopic). The prices used shall be the prices (using the midpoint of any price range as one price) of edible whey powder for the Central State production area, as reported and published weekly by the Dairy Division, Agricultural Marketing Service. The average shall be computed by the Director of the Dairy Division, using the price reported each week as the daily price for that day and for each preceding work-day until the day such price was previously reported. A work-day is each Monday through Friday except national holidays.

2. Section 1062.50(b) is revised to read as follows:

§ 1062.50 Class prices.

(b) *Class II price.* A tentative Class II price shall be computed by the Director of the Dairy Division and transmitted to the market administrator on or before the 15th day of the preceding month. The tentative Class II price shall be the basic Class II formula price computed pursuant to § 1062.51a for the month plus the amount that the value computed pursuant to paragraph (b)(1) of this section exceeds the value computed pursuant to paragraph (b)(2) of this section, except that, for each month after the first month in which this paragraph is effective, the final Class II

price shall be not less than the Class III price.

(1) Determine for the most recent 12-month period the simple average (rounded to the nearest cent) of the basic formula prices computed pursuant to § 1062.51 and add 10 cents; and

(2) Determine for the same 12-month period as specified in paragraph (b)(1) of this section the simple average (rounded to the nearest cent) of the basic Class II formula prices computed pursuant to § 1062.51a.

3. A new § 1062.51a is added to read as follows:

§ 1062.51a Basic Class II formula price.

The "basic Class II formula price" for the month shall be the basic formula price determined pursuant to § 1062.51 for the second preceding month plus or minus the amount computed pursuant to paragraphs (a) through (d) of this section:

(a) The gross values per hundredweight of milk used to manufacture cheddar cheese and butter-nonfat dry milk shall be computed, using price data determined pursuant to § 1062.20 and yield factors in effect under the Dairy Price Support Program authorized by the Agricultural Act of 1949, as amended, for the first 15 days of the preceding month and, separately, for the first 15 days of the second preceding month as follows:

(1) The gross value of milk used to manufacture cheddar cheese shall be the sum of the following computations:

(i) Multiply the cheddar cheese price by the yield factor used under the Price Support Program for cheddar cheese;

(ii) Multiply the butter price by the yield factor used under the Price Support Program for determining the butterfat component of the whey value in the cheese price computation; and

(iii) Subtract from the edible whey price the processing cost used under the Price Support Program for edible whey and multiply any positive difference by the yield factor used under the Price Support Program for edible whey.

(2) The gross value of milk used to manufacture butter-nonfat dry milk shall be the sum of the following computations:

(i) Multiply the butter price by the yield factor used under the Price Support Program for butter; and

(ii) Multiply the nonfat dry milk price by the yield factor used under the Price Support Program for nonfat dry milk.

(b) Determine the amounts by which the gross value per hundredweight of milk used to manufacture cheddar cheese and the gross value per hundred-

weight of milk used to manufacture butter-nonfat dry milk for the first 15 days of the preceding month exceed or are less than the respective gross values for the first 15 days of the second preceding month.

(c) Compute weighting factors to be applied to the changes in gross values determined pursuant to paragraph (b) of this section by determining the relative proportion that the data included in each of the following subparagraphs is of the total of the data represented in paragraph (c) (1) and (2) of this section:

(1) Combine the total American cheese production for the States of Minnesota and Wisconsin, as reported by the Economics and Statistics Service of the Department for the third preceding month, and divide by the yield factor used under the Price Support Program for cheddar cheese to determine the quantity of milk used in the production of American cheddar cheese; and

(2) Combine the total nonfat dry milk production for the States of Minnesota and Wisconsin, as reported by the Economics and Statistics Service of the Department for the third preceding month, and divide by the yield factor used under the Price Support Program for nonfat dry milk to determine the quantity of milk used in the production of butter-nonfat dry milk.

(d) Compute a weighted average of the changes in gross values per hundredweight of milk determined pursuant to paragraph (b) of this section in accordance with the relative proportions of milk determined pursuant to paragraph (c) of this section.

4. Section 1062.53 is revised to read as follows:

§ 1062.53 Announcement of class prices.

The market administrator shall announce publicly on or before the fifth day of each month the Class I price for the following month, the Class III price for the preceding month and, for each month after the first month in which this section is effective, the final Class II price for the preceding month; and on or before the 15th day of each month the tentative Class II price for the following month.

PART 1007—MILK IN THE GEORGIA MARKETING AREA

1. A new § 1007.20 is added to read as follows:

§ 1007.20 Product prices.

The following product prices shall be used in calculating the basic Class II formula price pursuant to § 1007.51a:

(a) *Butter price.* "Butter price" means the simple average, for the first 15 days of the month, of the daily prices per pound of Grade A (92-score) butter. The prices used shall be those of the Chicago Mercantile Exchange as reported and published weekly by the Dairy Division, Agricultural Marketing Service. The average shall be computed by the Director of the Dairy Division, using the price reported each week as the daily price for that day and for each following work-day until the next price is reported. A work-day is each Monday through Friday, except national holidays. For any week that the Exchange does not meet to establish a price, the price for the following week shall be the last price that was established.

(b) *Cheddar cheese price.* "Cheddar cheese price" means the simple average, for the first 15 days of the month, of the daily prices per pound of cheddar cheese in 40-pound blocks. The prices used shall be those of the National Cheese Exchange (Green Bay, WI), as reported and published weekly by the Dairy Division, Agricultural Marketing Service. The average shall be computed by the Director of the Dairy Division, using the price reported each week as the daily price for that day and for each following work-day until the next price is reported. A work-day is each Monday through Friday except national holidays. For any week that the Exchange does not meet to establish a price, the price for the following week shall be the last price that was established.

(c) *Nonfat dry milk price.* "Nonfat dry milk price" means the simple average, for the first 15 days of the month, of the daily prices per pound of nonfat dry milk, which average shall be computed by the Director of the Dairy Division as follows:

(1) The prices used shall be the prices (using the midpoint of any price range as one price) of high heat, low heat and Grade A nonfat dry milk, respectively, for the Central States production area, as reported and published weekly by the Dairy Division, Agricultural Marketing Service.

(2) For each week, determine the simple average of the prices reported for the three types of nonfat dry milk. Such average shall be the daily price for the day that such prices are reported and for each preceding work-day until the day such prices were previously reported. A work-day is each Monday through Friday except national holidays.

(3) Add the prices determined in paragraph (c)(2) of this section for the first 15 days of the month and divide by the number of days for which there is a daily price.

(d) *Edible whey price.* "Edible whey price" means the simple average, for the first 15 days of the month, of the daily prices per pound of edible whey powder (nonhygroscopic). The prices used shall be the prices (using the midpoint of any price range as one price) of edible whey powder for the Central States production area, as reported and published weekly by the Dairy Division, Agricultural Marketing Service. The average shall be computed by the Director of the Dairy Division, using the price reported each week as the daily price for that day and for each preceding work-day until the day such price was previously reported. A work-day is each Monday through Friday except national holidays.

2. Section 1007.50(b) is revised to read as follows:

§ 1007.50 Class prices.

(b) *Class II price.* A tentative Class II price shall be computed by the Director of the Dairy Division and transmitted to the market administrator on or before the 15th day of the preceding month. The tentative Class II price shall be the basic Class II formula price computed pursuant to § 1007.51a for the month plus the amount that the value computed pursuant to paragraph (b)(1) of this section exceeds the value computed pursuant to paragraph (b)(2) of this section, except that, for each month after the first month in which this paragraph is effective, the final Class II price shall be not less than the Class III price.

(1) Determine for the most recent 12-month period the simple average (rounded to the nearest cent) of the basic formula prices computed pursuant to § 1007.51 and add 10 cents; and

(2) Determine for the same 12-month period as specified in paragraph (b)(1) of this section the simple average (rounded to the nearest cent) of the basic Class II formula prices computed pursuant to § 1007.51a.

3. A new § 1007.51a is added to read as follows:

§ 1007.51a Basic Class II formula price.

The "basic Class II formula price" for the month shall be the basic formula price determined pursuant to § 1007.51 for the second preceding month plus or minus the amount computed pursuant to paragraphs (a) through (d) of this section:

(a) The gross values per hundredweight of milk used to manufacture cheddar cheese and butter-nonfat dry milk shall be computed, using

price data determined pursuant to § 1007.20 and yield factors in effect under the Dairy Price Support Program authorized by the Agricultural Act of 1949, as amended, for the first 15 days of the preceding month and, separately, for the first 15 days of the second preceding month as follows:

(1) The gross value of milk used to manufacture cheddar cheese shall be the sum of the following computations:

(i) Multiply the cheddar cheese price by the yield factor used under the Price Support Program for cheddar cheese;

(ii) Multiply the butter price by the yield factor used under the Price Support Program for determining the butterfat component of the whey value in the cheese price computation; and

(iii) Subtract from the edible whey price the processing cost used under the Price Support Program for edible whey and multiply any positive difference by the yield factor used under the Price Support Program for edible whey.

(2) The gross value of milk used to manufacture butter-nonfat dry milk shall be the sum of the following computations:

(i) Multiply the butter price by the yield factor used under the Price Support Program for butter; and

(ii) Multiply the nonfat dry milk price by the yield factor used under the Price Support Program for nonfat dry milk.

(b) Determine the amounts by which the gross value per hundredweight of milk used to manufacture cheddar cheese and the gross value per hundredweight of milk used to manufacture butter-nonfat dry milk for the first 15 days of the preceding month exceed or are less than the respective gross values for the first 15 days of the second preceding month.

(c) Compute weighting factors to be applied to the changes in gross values determined pursuant to paragraph (b) of this section by determining the relative proportion that the data included in each of the following subparagraphs is of the total of the data represented in paragraph (c)(1) and (2) of this section:

(1) Combine the total American cheese production for the States of Minnesota and Wisconsin, as reported by the Economics and Statistics Service of the Department for the third preceding month, and divide by the yield factor used under the Price Support Program for cheddar cheese to determine the quantity of milk used in the production of American cheddar cheese; and

(2) Combine the total nonfat dry milk production for the States of Minnesota and Wisconsin, as reported by the Economics and Statistics Service of the Department for the third preceding

month, and divide by the yield factor used under the Price Support program for nonfat dry milk to determine the quantity of milk used in the production of butter-nonfat dry milk.

(d) Compute a weighted average of the changes in gross values per hundredweight of milk determined pursuant to paragraph (b) of this section in accordance with the relative proportions of milk determined pursuant to paragraph (c) of this section.

4. Section 1007.53 is revised to read as follows:

§ 1007.53 Announcement of class prices.

The market administrator shall announce publicly on or before the fifth day of each month the Class I price for the following month, the Class III price for the preceding month and, for each month after the first month in which this section is effective, the final Class II price for the preceding month; and on or before the 15th day of each month the tentative Class II price for the following month.

PART 1011—MILK IN THE TENNESSEE VALLEY MARKETING AREA

1. Section 1011.19 is added and reserved and a new § 1011.20 is added to read as follows:

§ 1011.19 [Reserved]

§ 1011.20 Product prices.

The following product prices shall be used in calculating the basic Class II formula price pursuant to § 1011.51a:

(a) *Butter price.* "Butter price" means the simple average, for the first 15 days of the month, of the daily prices per pound of Grade A (92-score) butter. The prices used shall be those of the Chicago Mercantile Exchange as reported and published weekly by the Dairy Division, Agricultural Marketing Service. The average shall be computed by the Director of the Dairy Division, using the price reported each week as the daily price for that day and for each following work-day until the next price is reported. A work-day is each Monday through Friday, except national holidays. For any week that the Exchange does not meet to establish a price, the price for the following week shall be the last price that was established.

(b) *Cheddar cheese price.* "Cheddar cheese price" means the simple average, for the first 15 days of the month, of the daily prices per pound of cheddar cheese in 40-pound blocks. The prices used shall be those of the National Cheese Exchange (Green Bay, WI), as reported and published weekly by the Dairy Division, Agricultural Marketing

Service. The average shall be computed by the Director of the Dairy Division, using the price reported each week as the daily price for that day and for each following work-day until the next price is reported. A work-day is each Monday through Friday except national holidays. For any week that the Exchange does not meet to establish a price, the price for the following week shall be the last price that was established.

(c) *Nonfat dry milk price.* "Nonfat dry milk price" means the simple average, for the first 15 days of the month, of the daily prices per pound of nonfat dry milk, which average shall be computed by the Director of the Dairy Division as follows:

(1) The prices used shall be the prices (using the midpoint of any price range as one price) of high heat, low heat and Grade A nonfat dry milk, respectively, for the Central States production area, as reported and published weekly by the Dairy Division, Agricultural Marketing Service.

(2) For each week, determine the simple average of the prices reported for the three types of nonfat dry milk. Such average shall be the daily price for the day that such prices are reported and for each preceding work-day until the day such prices were previously reported. A work-day is each Monday through Friday except national holidays.

(3) Add the prices determined in paragraph (c)(2) of this section for the first 15 days of the month and divide by the number of days for which there is a daily price.

(d) *Edible whey price.* "Edible whey price" means the simple average, for the first 15 days of the month, of the daily prices per pound of edible whey powder (nonhygroscopic). The prices used shall be the prices (using the midpoint of any price range as one price) of edible whey powder for the Central States production area, as reported and published weekly by the Dairy Division, Agricultural Marketing Service. The average shall be computed by the Director of the Dairy Division, using the price reported each week as the daily price for that day and for each preceding work-day until the day such price was previously reported. A work-day is each Monday through Friday except national holidays.

2. Section 1011.50(b) is revised to read as follows:

§ 1011.50 Class prices.

(b) *Class II price.* A tentative Class II price shall be computed by the Director of the Dairy Division and transmitted to the market administrator on or before

the 15th day of the preceding month. The tentative Class II price shall be the basic Class II formula price computed pursuant to § 1011.51a for the month plus the amount that the value computed pursuant to paragraph (b)(1) of this section exceeds the value computed pursuant to paragraph (b)(2) of this section, except that, for each month after the first month in which this paragraph is effective, the final Class II price shall be not less than the Class III price.

(1) Determine for the most recent 12-month period the simple average (rounded to the nearest cent) of the basic formula prices computed pursuant to § 1011.51 and add 10 cents; and

(2) Determine for the same 12-month period as specified in paragraph (b)(1) of this section the simple average (rounded to the nearest cent) of the basic Class II formula prices computed pursuant to § 1011.51a.

3. A new § 1011.51a is added to read as follows:

§ 1011.51a Basic Class II formula price.

The "basic Class II formula price" for the month shall be the basic formula price determined pursuant to § 1011.51 for the second preceding month plus or minus the amount computed pursuant to paragraphs (a) through (d) of this section:

(a) The gross values per hundredweight of milk used to manufacture cheddar cheese and butter-nonfat dry milk shall be computed, using price data determined pursuant to § 1011.20 and yield factors in effect under the Dairy Price Support Program authorized by the Agricultural Act of 1949, as amended, for the first 15 days of the preceding month and, separately, for the first 15 days of the second preceding month as follows:

(1) The gross value of milk used to manufacture cheddar cheese shall be the sum of the following computations:

(i) Multiply the cheddar cheese price by the yield factor used under the Price Support Program for cheddar cheese;

(ii) Multiply the butter price by the yield factor used under the Price Support Program for determining the butterfat component of the whey value in the cheese price computation; and

(iii) Subtract from the edible whey price the processing cost used under the Price Support Program for edible whey and multiply any positive difference by the yield factor used under the Price Support Program for edible whey.

(2) The gross value of milk used to manufacture butter-nonfat dry milk shall be the sum of the following computations:

(i) Multiply the butter price by the yield factor used under the Price Support Program for butter; and

(ii) Multiply the nonfat dry milk price by the yield factor used under the Price Support Program for nonfat dry milk.

(b) Determine the amounts by which the gross value per hundredweight of milk used to manufacture cheddar cheese and the gross value per hundredweight of milk used to manufacture butter-nonfat dry milk for the first 15 days of the preceding month exceed or are less than the respective gross values for the first 15 days of the second preceding month.

(c) Compute weighting factors to be applied to the changes in gross values determined pursuant to paragraph (b) of this section by determining the relative proportion that the data included in each of the following subparagraphs is of the total of the data represented in paragraph (c) (1) and (2) of this section:

(1) Combine the total American cheese production for the States of Minnesota and Wisconsin, as reported by the Economics and Statistics Service of the Department for the third preceding month, and divide by the yield factor used under the Price Support Program for cheddar cheese to determine the quantity of milk used in the production of American cheddar cheese; and

(2) Combine the total nonfat dry milk production for the States of Minnesota and Wisconsin, as reported by the Economics and Statistics Service of the Department for the third preceding month, and divide by the yield factor used under the Price Support program for nonfat dry milk to determine the quantity of milk used in the production of butter-nonfat dry milk.

(d) Compute a weighted average of the changes in gross values per hundredweight of milk determined pursuant to paragraph (b) of this section in accordance with the relative proportions of milk determined pursuant to paragraph (c) of this section.

4. Section 1011.53 is revised to read as follows:

§ 1011.53 Announcement of class prices.

The market administrator shall announce publicly on or before the fifth day of each month the Class I price for the following month, the Class III price for the preceding month and, for each month after the first month in which this section is effective, the final Class II price for the preceding month; and on or before the 15th day of each month the tentative Class II price for the following month.

PART 1030—MILK IN THE CHICAGO REGIONAL MARKETING AREA

1. A new § 1030.20 is added to read as follows:

§ 1030.20 Product prices.

The following product prices shall be used in calculating the basic Class II formula price pursuant to § 1030.51a:

(a) *Butter price.* "Butter price" means the simple average, for the first 15 days of the month, of the daily prices per pound of Grade A (92-score) butter. The prices used shall be those of the Chicago Mercantile Exchange as reported and published weekly by the Dairy Division, Agricultural Marketing Service. The average shall be computed by the Director of the Dairy Division, using the price reported each week as the daily price for that day and for each following work-day until the next price is reported. A work-day is each Monday through Friday, except national holidays. For any week that the Exchange does not meet to establish a price, the price for the following week shall be the last price that was established.

(b) *Cheddar cheese price.* "Cheddar cheese price" means the simple average, for the first 15 days of the month, of the daily prices per pound of cheddar cheese in 40-pound blocks. The prices used shall be those of the National Cheese Exchange (Green Bay, WI), as reported and published weekly by the Dairy Division, Agricultural Marketing Service. The average shall be computed by the Director of the Dairy Division, using the price reported each week as the daily price for that day and for each following work-day until the next price is reported. A work-day is each Monday through Friday except national holidays. For any week that the Exchange does not meet to establish a price, the price for the following week shall be the last price that was established.

(c) *Nonfat dry milk price.* "Nonfat dry milk price" means the simple average, for the first 15 days of the month, of the daily prices per pound of nonfat dry milk, which average shall be computed by the Director of the Dairy Division as follows:

(1) The prices used shall be the prices (using the midpoint of any price range as one price) of high heat, low heat and Grade A nonfat dry milk, respectively, for the Central States production area, as reported and published weekly by the Dairy Division, Agricultural Marketing Service.

(2) For each week, determine the simple average of the prices reported for the three types of nonfat dry milk. Such

average shall be the daily price for the day that such prices are reported and for each preceding work-day until the day such prices were previously reported. A work-day is each Monday through Friday except national holidays.

(3) Add the prices determined in paragraph (c)(2) of this section for the first 15 days of the month and divide by the number of days for which there is a daily price.

(d) *Edible whey price.* "Edible whey price" means the simple average, for the first 15 days of the month, of the daily prices per pound of edible whey powder (nonhygroscopic). The prices used shall be the prices (using the midpoint of any price range as one price) of edible whey powder for the Central States production area, as reported and published weekly by the Dairy Division, Agricultural Marketing Service. The average shall be computed by the Director of the Dairy Division, using the price reported each week as the daily price for that day and for each preceding work-day until the day such price was previously reported. A work-day is each Monday through Friday except national holidays.

2. Section 1030.50(b) is revised to read as follows:

§ 1030.50 Class prices.

(b) *Class II price.* A tentative Class II price shall be computed by the Director of the Dairy Division and transmitted to the market administrator on or before the 15th day of the preceding month. The tentative Class II price shall be the basic Class II formula price computed pursuant to § 1030.51a for the month plus the amount that the value computed pursuant to paragraph (b)(1) of this section exceeds the value computed pursuant to paragraph (b)(2) of this section, except that, for each month after the first month in which this paragraph is effective, the final Class II price shall be not less than the Class III price.

(1) Determine for the most recent 12-month period the simple average (rounded to the nearest cent) of the basic formula prices computed pursuant to § 1030.51 and add 10 cents; and

(2) Determine for the same 12-month period as specified in paragraph (b)(1) of this section the simple average (rounded to the nearest cent) of the basic Class II formula prices computed pursuant to § 1030.51a.

3. A new § 1030.51a is added to read as follows:

§ 1030.51a Basic Class II formula price.

The "basic Class II formula price" for the month shall be the basic formula price determined pursuant to § 1030.51 for the second preceding month plus or minus the amount computed pursuant to paragraphs (a) through (d) of this section:

(a) The gross values per hundredweight of milk used to manufacture cheddar cheese and butter-nonfat dry milk shall be computed, using price data determined pursuant to § 1030.20 and yield factors in effect under the Dairy Price Support Program authorized by the Agricultural Act of 1949, as amended, for the first 15 days of the preceding month and, separately, for the first 15 days of the second preceding month as follows:

(1) The gross value of milk used to manufacture cheddar cheese shall be the sum of the following computations:

(i) Multiply the cheddar cheese price by the yield factor used under the Price Support Program for cheddar cheese;

(ii) Multiply the butter price by the yield factor used under the Price Support Program for determining the butterfat component of the whey value in the cheese price computation; and

(iii) Subtract from the edible whey price the processing cost used under the Price Support Program for edible whey and multiply any positive difference by the yield factor used under the Price Support Program for edible whey.

(2) The gross value of milk used to manufacture butter-nonfat dry milk shall be the sum of the following computations:

(i) Multiply the butter price by the yield factor used under the Price Support Program for butter; and

(ii) Multiply the nonfat dry milk price by the yield factor used under the Price Support Program for nonfat dry milk.

(b) Determine the amounts by which the gross value per hundredweight of milk used to manufacture cheddar cheese and the gross value per hundredweight of milk used to manufacture butter-nonfat dry milk for the first 15 days of the preceding month exceed or are less than the respective gross values for the first 15 days of the second preceding month.

(c) Compute weighting factors to be applied to the changes in gross values determined pursuant to paragraph (b) of this section by determining the relative proportion that the data included in each of the following subparagraphs is of the total of the data represented in paragraph (c) (1) and (2) of this section:

(1) Combine the total American cheese production for the States of Minnesota and Wisconsin, as reported by the Economics and Statistics Service

of the Department for the third preceding month, and divide by the yield factor used under the Price Support Program for cheddar cheese to determine the quantity of milk used in the production of American cheddar cheese; and

(2) Combine the total nonfat dry milk production for the States of Minnesota and Wisconsin, as reported by the Economics and Statistics Service of the Department for the third preceding month, and divide by the yield factor used under the Price Support Program for nonfat dry milk to determine the quantity of milk used in the production of butter-nonfat dry milk.

(d) Compute a weighted average of the changes in gross values per hundredweight of milk determined pursuant to paragraph (b) of this section in accordance with the relative proportions of milk determined pursuant to paragraph (c) of this section.

4. Section 1030.53 is revised to read as follows:

§ 1030.53 Announcement of class prices.

The market administrator shall announce publicly on or before the fifth day of each month the Class I price for the following month, the Class III price for the preceding month and, for each month after the first month in which this section is effective, the final Class II price for the preceding month; and on or before the 15th day of each month the tentative Class II price for the following month.

PART 1032—MILK IN THE SOUTHERN ILLINOIS MARKETING AREA

1. A new § 1032.20 is added to read as follows:

§ 1032.20 Product prices.

The following product prices shall be used in calculating the basic Class II formula price pursuant to § 1032.51a:

(a) *Butter price.* "Butter price" means the simple average, for the first 15 days of the month, of the daily prices per pound of Grade A (92-score) butter. The prices used shall be those of the Chicago Mercantile Exchange as reported and published weekly by the Dairy Division, Agricultural Marketing Service. The average shall be computed by the Director of the Dairy Division, using the price reported each week as the daily price for that day and for each following work-day until the next price is reported. A work-day is each Monday through Friday, except national holidays. For any week that the Exchange does not meet to establish a price, the price for the following week

shall be the last price that was established.

(b) *Cheddar cheese price.* "Cheddar cheese price" means the simple average, for the first 15 days of the month, of the daily prices per pound of cheddar cheese in 40-pound blocks. The prices used shall be those of the National Cheese Exchange (Green Bay, WI), as reported and published weekly by the Dairy Division, Agricultural Marketing Service. The average shall be computed by the Director of the Dairy Division, using the price reported each week as the daily price for that day and for each following work-day until the next price is reported. A work-day is each Monday through Friday except national holidays. For any week that the Exchange does not meet to establish a price, the price for the following week shall be the last price that was established.

(c) *Nonfat dry milk price.* "Nonfat dry milk price" means the simple average, for the first 15 days of the month, of the daily prices per pound of nonfat dry milk, which average shall be computed by the Director of the Dairy Division as follows:

(1) The prices used shall be the prices (using the midpoint of any price range as one price) of high heat, low heat and Grade A nonfat dry milk, respectively, for the Central States production area, as reported and published weekly by the Dairy Division, Agricultural Marketing Service.

(2) For each week, determine the simple average of the prices reported for the three types of nonfat dry milk. Such average shall be the daily price for the day that such prices are reported and for each preceding work-day until the day such prices were previously reported. A work-day is each Monday through Friday except national holidays.

(3) Add the prices determined in paragraph (c)(2) of this section for the first 15 days of the month and divide by the number of days for which there is a daily price.

(d) *Edible whey price.* "Edible whey price" means the simple average, for the first 15 days of the month, of the daily prices per pound of edible whey powder (nonhygroscopic). The prices used shall be the prices (using the midpoint of any price range as one price) of edible whey powder for the Central States production area, as reported and published weekly by the Dairy Division, Agricultural Marketing Service. The average shall be computed by the Director of the Dairy Division, using the price reported each week as the daily price for that day and for each preceding work-day until the day such price was previously reported. A work-day is each

Monday through Friday except national holidays.

2. Section 1032.50(b) is revised to read as follows:

§ 1032.50 Class prices.

(b) *Class II price.* A tentative Class II price shall be computed by the Director of the Dairy Division and transmitted to the market administrator on or before the 15th day of the preceding month. The tentative Class II price shall be the basic Class II formula price computed pursuant to § 1032.51a for the month plus the amount that the value computed pursuant to paragraph (b)(1) of this section exceeds the value computed pursuant to paragraph (b)(2) of this section, except that, for each month after the first month in which this paragraph is effective, the final Class II price shall be not less than the Class III price.

(1) Determine for the most recent 12-month period the simple average (rounded to the nearest cent) of the basic formula prices computed pursuant to § 1032.51 and add 10 cents; and

(2) Determine for the same 12-month period as specified in paragraph (b)(1) of this section the simple average (rounded to the nearest cent) of the basic Class II formula prices computed pursuant to § 1032.51a.

3. A new § 1032.51a is added to read as follows:

§ 1032.51a Basic Class II formula price.

The "basic Class II formula price" for the month shall be the basic formula price determined pursuant to § 1032.51 for the second preceding month plus or minus the amount computed pursuant to paragraphs (a) through (d) of this section:

(a) The gross values per hundredweight of milk used to manufacture cheddar cheese and butter-nonfat dry milk shall be computed, using price data determined pursuant to § 1032.20 and yield factors in effect under the Dairy Price Support Program authorized by the Agricultural Act of 1949, as amended, for the first 15 days of the preceding month and, separately, for the first 15 days of the second preceding month as follows:

(1) The gross value of milk used to manufacture cheddar cheese shall be the sum of the following computations:

(i) Multiply the cheddar cheese price by the yield factor used under the Price Support Program for cheddar cheese;

(ii) Multiply the butter price by the yield factor used under the Price Support Program for determining the

butterfat component of the whey value in the cheese price computation; and

(iii) Subtract from the edible whey price the processing cost used under the Price Support Program for edible whey and multiply any positive difference by the yield factor used under the Price Support Program for edible whey.

(2) The gross value of milk used to manufacture butter-nonfat dry milk shall be the sum of the following computations:

(i) Multiply the butter price by the yield factor used in the Price Support Program for butter; and

(ii) Multiply the nonfat dry milk price by the yield factor used under the Price Support Program for nonfat dry milk.

(b) Determine the amounts by which the gross value per hundredweight of milk used to manufacture cheddar cheese and the gross value per hundredweight of milk used to manufacture butter-nonfat dry milk for the first 15 days of the preceding month exceed or are less than the respective gross values for the first 15 days of the second preceding month.

(c) Compute weighting factors to be applied to the changes in gross values determined pursuant to paragraph (b) of this section by determining the relative proportion that the data included in each of the following subparagraphs is of the total of the data represented in paragraph (c) (1) and (2) of this section:

(1) Combine the total American cheese production for the States of Minnesota and Wisconsin, as reported by the Economics and Statistics Service of the Department for the third preceding month, and divide by the yield factor used under the Price Support Program for cheddar cheese to determine the quantity of milk used in the production of American cheddar cheese; and

(2) Combine the total nonfat dry milk production for the States of Minnesota and Wisconsin, as reported by the Economics and Statistics Service of the Department for the third preceding month, and divide by the yield factor used under the Price Support Program for nonfat dry milk to determine the quantity of milk used in the production of butter-nonfat dry milk.

(d) Compute a weighted average of the changes in gross values per hundredweight of milk determined pursuant to paragraph (b) of this section in accordance with the relative proportions of milk determined pursuant to paragraph (c) of this section.

4. Section 1032.53 is revised to read as follows:

§ 1032.53 Announcement of class prices.

The market administrator shall announce publicly on or before the fifth day of each month the Class I price for the following months, the Class III price for the preceding month and, for each month after the first month in which this section is effective, the final Class II price for the preceding month; and on or before the 15th day of each month the tentative Class II price for the following month.

PART 1046—MILK IN THE LOUISVILLE-LEXINGTON-EVANSVILLE MARKETING AREA

1. Section 1046.19 is added and reserved and a new § 1046.20 is added to read as follows:

§ 1046.19 [Reserved]**§ 1046.20 Product prices.**

The following product prices shall be used in calculating the basic Class II formula price pursuant to § 1046.51a:

(a) *Butter price.* "Butter price" means the simple average, for the first 15 days of the month, of the daily prices per pound of Grade A (92-score) butter. The prices used shall be those of the Chicago Mercantile Exchange as reported and published weekly by the Dairy Division, Agricultural Marketing Service. The average shall be computed by the Director of the Dairy Division, using the price reported each week as the daily price for that day and for each following work-day until the next price is reported. A work-day is each Monday through Friday, except national holidays. For any week that the Exchange does not meet to establish a price, the price for the following week shall be the last price that was established.

(b) *Cheddar cheese price.* "Cheddar cheese price" means the simple average, for the first 15 days of the month, of the daily prices per pound of cheddar cheese in 40-pound blocks. The prices used shall be those of the National Cheese Exchange (Green Bay, WI), as reported and published weekly by the Dairy Division, Agricultural Marketing Service. The average shall be computed by the Director of the Dairy Division, using the price reported each week as the daily price for that day and for each following work-day until the next price is reported. A work-day is each Monday through Friday except national holidays. For any week that the Exchange does not meet to establish a price, the price for the following week shall be the last price that was established.

(c) *Nonfat dry milk price.* "Nonfat dry milk price" means the simple average, for the first 15 days of the month, of the

daily prices per pound of nonfat dry milk, which average shall be computed by the Director of the Dairy Division as follows:

(1) The prices used shall be the prices (using the midpoint of any price range as one price) of high heat, low heat and Grade A nonfat dry milk, respectively, for the Central States production area, as reported and published weekly by the Dairy Division, Agricultural Marketing Service.

(2) For each week, determine the simple average of the prices reported for the three types of nonfat dry milk. Such average shall be the daily price for the day that such prices are reported and for each preceding work-day until the day such prices were previously reported. A work-day is each Monday through Friday except national holidays.

(3) Add the prices determined in paragraph (c)(2) of this section for the first 15 days of the month and divide by the number of days for which there is a daily price.

(d) *Edible whey price.* "Edible whey price" means the simple average, for the first 15 days of the month, of the daily prices per pound of edible whey powder (nonhygroscopic). The prices used shall be the prices (using the midpoint of any price range as one price) of edible whey powder for the Central States production area, as reported and published weekly by the Dairy Division, Agricultural Marketing Service. The average shall be computed by the Director of the Dairy Division, using the price reported each week as the daily price for that day and for each preceding work-day until the day such price was previously reported. A work-day is each Monday through Friday except national holidays.

2. Section 1046.50(b) is revised to read as follows:

§ 1046.50 Class prices.

(b) *Class II price.* A tentative Class II price shall be computed by the Director of the Dairy Division and transmitted to the market administrator on or before the 15th day of the preceding month. The tentative Class II price shall be the basic Class II formula price computed pursuant to § 1046.51a for the month plus the amount that the value computed pursuant to paragraph (b)(1) of this section exceeds the value computed pursuant to paragraph (b)(2) of this section, except that, for each month after the first month in which this paragraph is effective, the final Class II price shall be not less than the Class III price.

(1) Determine for the most recent 12-month period the simple average (rounded to the nearest cent) of the basic formula prices computed pursuant to § 1046.51 and add 10 cents; and

(2) Determine for the same 12-month period as specified in paragraph (b)(1) of this section the simple average (rounded to the nearest cent) of the basic Class II formula prices computed pursuant to § 1046.51a.

3. A new § 1046.51a is added to read as follows:

§ 1046.51a Basic Class II formula price.

The "basic Class II formula price" for the month shall be the basic formula price determined pursuant to § 1046.51 for the second preceding month plus or minus the amount computed pursuant to paragraphs (a) through (d) of this section:

(a) The gross values per hundredweight of milk used to manufacture cheddar cheese and butter-nonfat dry milk shall be computed, using price data determined pursuant to § 1046.20 and yield factors in effect under the Dairy Price Support Program authorized by the Agricultural Act of 1949, as amended, for the first 15 days of the preceding month and, separately, for the first 15 days of the second preceding month as follows:

(1) The gross value of milk used to manufacture cheddar cheese shall be the sum of the following computations:

(i) Multiply the cheddar cheese price by the yield factor used under the Price Support Program for cheddar cheese;

(ii) Multiply the butter price by the yield factor used under the Price Support Program for determining the butterfat component of the whey value in the cheese price computation; and

(iii) Subtract from the edible whey price the processing cost used under the Price Support Program for edible whey and multiply any positive difference by the yield factor used under the Price Support Program for edible whey.

(2) The gross value of milk used to manufacture butter-nonfat dry milk shall be the sum of the following computations:

(i) Multiply the butter price by the yield factor used under the Price Support Program for butter; and

(ii) Multiply the nonfat dry milk price by the yield factor used under the Price Support Program for nonfat dry milk.

(b) Determine the amounts by which the gross value per hundredweight of milk used to manufacture cheddar cheese and the gross value per hundredweight of milk used to manufacture butter-nonfat dry milk for

the first 15 days of the preceding month exceed or are less than the respective gross values for the first 15 days of the second preceding month.

(c) Compute weighting factors to be applied to the changes in gross values determined pursuant to paragraph (b) of this section by determining the relative proportion that the data included in each of the following subparagraphs is of the total of the data represented in paragraph (c) (1) and (2) of this section:

(1) Combine the total American cheese production for the States of Minnesota and Wisconsin, as reported by the Economics and Statistics Service of the Department for the third preceding month, and divide by the yield factor used under the Price Support Program for cheddar cheese to determine the quantity of milk used in the production of American cheddar cheese; and

(2) Combine the total nonfat dry milk production for the States of Minnesota and Wisconsin, as reported by the Economics and Statistics Service of the Department for the third preceding month, and divide by the yield factor used under the Price Support Program for nonfat dry milk to determine the quantity of milk used in the production of butter-nonfat dry milk.

(d) Compute a weighted average of the changes in gross values per hundredweight of milk determined pursuant to paragraph (b) of this section in accordance with the relative proportions of milk determined pursuant to paragraph (c) of this section.

4. Section 1046.53 is revised to read as follows:

§ 1046.53 Announcement of class prices.

The market administrator shall announce publicly on or before the fifth day of each month the Class I price for the following month, the Class III price for the preceding month and, for each month after the first month in which this section is effective, the final Class II price for the preceding month; and on or before the 15th day of each month the tentative Class II price for the following month.

PART 1049—MILK IN THE INDIANA MARKETING AREA

1. Section 1049.19 is added and reserved and a new § 1049.20 is added to read as follows:

§ 1049.19 [Reserved]

§ 1049.20 Product prices.

The following product prices shall be used in calculating the basic Class II formula price pursuant to § 1049.51a:

(a) *Butter price.* "Butter price" means the simple average, for the first 15 days of the month, of the daily prices per pound of Grade A (92-score) butter. The prices used shall be those of the Chicago Mercantile Exchange as reported and published weekly by the Dairy Division, Agricultural Marketing Service. The average shall be computed by the Director of the Dairy Division, using the price reported each week as the daily price for that day and for each following work-day until the next price is reported. A work-day is each Monday through Friday, except national holidays. For any week that the Exchange does not meet to establish a price, the price for the following week shall be the last price that was established.

(b) *Cheddar cheese price.* "Cheddar cheese price" means the simple average, for the first 15 days of the month, of the daily prices per pound of cheddar cheese in 40-pound blocks. The prices used shall be those of the National Cheese Exchange (Green Bay, WI), as reported and published weekly by the Dairy Division, Agricultural Marketing Service. The average shall be computed by the Director of the Dairy Division, using the price reported each week as the daily price for that day and for each following workday until the next price is reported. A work-day is each Monday through Friday except national holidays. For any week that the Exchange does not meet to establish a price, the price for the following week shall be the last price that was established.

(c) *Nonfat dry milk price.* "Nonfat dry milk price" means the simple average, for the first 15 days of the month, of the daily prices per pound of nonfat dry milk, which average shall be computed by the Director of the Dairy Division as follows:

(1) The prices used shall be the prices (using the midpoint of any price range as one price) of high heat, low heat and Grade A nonfat dry milk, respectively, for the Central States production area, as reported and published weekly by the Dairy Division, Agricultural Marketing Service.

(2) For each week, determine the simple average of the prices reported for the three types of nonfat dry milk. Such average shall be the daily price for the day that such prices are reported and for each preceding work-day until the day such prices were previously reported. A work-day is each Monday through Friday except national holidays.

(3) Add the prices determined in paragraph (c)(2) of this section for the first 15 days of the month and divide by the number of days for which there is a daily price.

(d) *Edible whey price.* "Edible whey price" means the simple average, for the first 15 days of the month, of the daily prices per pound of edible whey powder (nonhygroscopic). The prices used shall be the prices (using the midpoint of any price range as one price) of edible whey powder for the Central States production area, as reported and published weekly by the Dairy Division, Agricultural Marketing Service. The average shall be computed by the Director of the Dairy Division, using the price reported each week as the daily price for that day and for each preceding work-day until the day such price was previously reported. A work-day is each Monday through Friday except national holidays.

2. Section 1049.50(b) is revised to read as follows:

§ 1049.50 Class prices.

(b) *Class II price.* A tentative Class II price shall be computed by the Director of the Dairy Division and transmitted to the market administrator on or before the 15th day of the preceding month. The tentative Class II price shall be the basic Class II formula price computed pursuant to § 1049.51a for the month plus the amount that the value computed pursuant to paragraph (b)(1) of this section exceeds the value computed pursuant to paragraph (b)(2) of this section, except that, for each month after the first month in which this paragraph is effective, the final Class II price shall be not less than the Class III price.

(1) Determine for the most recent 12-month period the simple average (rounded to the nearest cent) of the basic formula prices computed pursuant to § 1049.51 and add 10 cents; and

(2) Determine for the same 12-month period as specified in paragraph (b)(1) of this section the simple average (rounded to the nearest cent) of the basic Class II formula prices computed pursuant to § 1049.51a.

3. A new § 1049.51a is added to read as follows:

§ 1049.51a Basic Class II formula price.

The "basic Class II formula price" for the month shall be the basic formula price determined pursuant to § 1049.51 for the second preceding month plus or minus the amount computed pursuant to paragraphs (a) through (d) of this section:

(a) The gross values per hundredweight of milk used to manufacture cheddar cheese and butter-nonfat dry milk shall be computed, using

price data determine pursuant to § 1049.20 and yield factors in effect under the Dairy Price Support Program authorized by the Agricultural Act of 1949, as amended, for the first 15 days of the preceding month and, separately, for the first 15 days of the second preceding month as follows:

(1) The gross value of milk used to manufacture cheddar cheese shall be the sum of the following computations:

(i) Multiply the cheddar cheese price by the yield factor used under the Price Support Program for cheddar cheese;

(ii) Multiply the butter price by the yield factor used under the Price Support Program for determining the butterfat component of the whey value in the cheese price computation; and

(iii) Subtract from the edible whey price the processing cost used under the Price Support Program for edible whey and multiply any positive difference by the yield factor used under the Price Support Program for edible whey.

(2) The gross value of milk used to manufacture butter-nonfat dry milk shall be the sum of the following computations:

(i) Multiply the butter price by the yield factor used under the Price Support Program for butter; and

(ii) Multiply the nonfat dry milk price by the yield factor used under the Price Support Program for nonfat dry milk.

(b) Determine the amounts by which the gross value per hundredweight of milk used to manufacture cheddar cheese and the gross value per hundredweight of milk used to manufacture butter-nonfat dry milk for the first 15 days of the preceding month exceed or are less than the respective gross values for the first 15 days of the second preceding month.

(c) Compute weighting factors to be applied to the changes in gross values determined pursuant to paragraph (b) of this section by determining the relative proportion that the data included in each of the following subparagraphs is of the total of the data represented in paragraph (c) (1) and (2) of this section:

(1) Combine the total American cheese production for the States of Minnesota and Wisconsin, as reported by the Economics and Statistics Service of the Department for the third preceding month, and divide by the yield factor used under the Price Support Program for cheddar cheese to determine the quantity of milk used in the production of American cheddar cheese; and

(2) Combine the total nonfat dry milk production for the States of Minnesota and Wisconsin, as reported by the Economics and Statistics Service of the Department for the third preceding

month, and divide by the yield factor used under the Price Support Program for nonfat dry milk to determine the quantity of milk used in the production of butter-nonfat dry milk.

(d) Compute a weighted average of the changes in gross values per hundredweight of milk determined pursuant to paragraph (b) of this section in accordance with the relative proportions of milk determined pursuant to paragraph (c) of this section.

4. Section 1049.53 is revised to read as follows:

§ 1049.53 Announcement of class prices.

The market administrator shall announce publicly on or before the fifth day of each month the Class I price for the following month, the Class III price for the preceding month and, for each month after the first month in which this section is effective, the final Class II price for the preceding month; and on or before the 15th day of each month the tentative Class II price for the following month.

PART 1050—MILK IN THE CENTRAL ILLINOIS MARKETING AREA

1. A new § 1050.20 is added to read as follows:

§ 1050.20 Product prices.

The following product prices shall be used in calculating the basic Class II formula price pursuant to § 1050.51a:

(a) *Butter price.* "Butter price" means the simple average, for the first 15 days of the month, of the daily prices per pound of Grade A (92-score) butter. The prices used shall be those of the Chicago Mercantile Exchange as reported and published weekly by the Dairy Division, Agricultural Marketing Service. The average shall be computed by the Director of the Dairy Division, using the price reported each week as the daily price for that day and for each following work-day until the next price is reported. A work-day is each Monday through Friday, except national holidays. For any week that the Exchange does not meet to establish a price, the price for the following week shall be the last price that was established.

(b) *Cheddar cheese price.* "Cheddar cheese price" means the simple average, for the first 15 days of the month, of the daily prices per pound of cheddar cheese in 40-pound blocks. The prices used shall be those of the National Cheese Exchange (Green Bay, WI), as reported and published weekly by the Dairy Division, Agricultural Marketing Service. The average shall be computed by the Director of the Dairy Division,

using the price reported each week as the daily price for that day and for each following work-day until the next price is reported. A work-day is each Monday through Friday except national holidays. For any week that the Exchange does not meet to establish a price, the price for the following week shall be the last price that was established.

(c) *Nonfat dry milk price.* "Nonfat dry milk price" means the simple average, for the first 15 days of the month, of the daily prices per pound of nonfat dry milk, which average shall be computed by the Director of the Dairy Division as follows:

(1) The prices used shall be the prices (using the midpoint of any price range as one price) of high heat, low heat and Grade A nonfat dry milk, respectively, for the Central States production area, as reported and published weekly by the Dairy Division, Agricultural Marketing Service.

(2) For each week, determine the simple average of the prices reported for the three types of nonfat dry milk. Such average shall be the daily price for the day that such prices are reported and for each preceding work-day until the day such prices were previously reported. A work-day is each Monday through Friday except national holidays.

(3) Add the prices determined in paragraph (c)(2) of this section for the first 15 days of the month and divide by the number of days for which there is a daily price.

(d) *Edible whey price.* "Edible whey price" means the simple average, for the first 15 days of the month, of the daily prices per pound of edible whey powder (nonhygroscopic). The prices used shall be the prices (using the midpoint of any price range as one price) of edible whey powder for the Central States production area, as reported and published weekly by the Dairy Division, Agricultural Marketing Service. The average shall be computed by the Director of the Dairy Division, using the price reported each week as the daily price for that day and for each preceding work-day until the day such price was previously reported. A work-day is each Monday through Friday except national holidays.

2. Section 1050.50(b) is revised to read as follows:

§ 1050.50 Class prices.

(b) *Class II price.* A tentative Class II price shall be computed by the Director of the Dairy Division and transmitted to the market administrator on or before the 15th day of the preceding month. The tentative Class II price shall be the basic

Class II formula price computed pursuant to § 1050.51a for the month plus the amount that the value computed pursuant to paragraph (b)(1) of this section exceeds the value computed pursuant to paragraph (b)(2) of this section, except that, for each month after the first month in which this paragraph is effective, the final Class II price shall be not less than the Class III price.

(1) Determine for the most recent 12-month period the simple average (rounded to the nearest cent) of the basic formula prices computed pursuant to § 1050.51 and add 10 cents; and

(2) Determine for the same 12-month period as specified in paragraph (b)(1) of this section the simple average (rounded to the nearest cent) of the basic Class II formula prices computed pursuant to § 1050.51a.

3. A new § 1050.51a is added to read as follows:

§ 1050.51a Basic Class II formula price.

The "basic Class II formula price" for the month shall be the basic formula price determined pursuant to § 1050.51 for the second preceding month plus or minus the amount computed pursuant to paragraphs (a) through (d) of this section:

(a) The gross values per hundredweight of milk used to manufacture cheddar cheese and butter-nonfat dry milk shall be computed, using price data determined pursuant to § 1050.20 and yield factors in effect under the Dairy Price Support Program authorized by the Agricultural Act of 1949, as amended, for the first 15 days of the preceding month and, separately, for the first 15 days of the second preceding month as follows:

(1) The gross value of milk used to manufacture cheddar cheese shall be the sum of the following computations:

(i) Multiply the cheddar cheese price by the yield factor used under the Price Support Program for cheddar cheese;

(ii) Multiply the butter price by the yield factor used under the Price Support Program for determining the butterfat component of the whey value in the cheese price computation; and

(iii) Subtract from the edible whey price the processing cost used under the Price Support Program for edible whey and multiply any positive difference by the yield factor used under the Price Support Program for edible whey.

(2) The gross value of milk used to manufacture butter-nonfat dry milk shall be the sum of the following computations:

(i) Multiply the butter price by the yield factor used under the Price Support Program for butter; and

(ii) Multiply the nonfat dry milk price by the yield factor used under the Price Support Program for nonfat dry milk.

(b) Determine the amounts by which the gross value per hundredweight of milk used to manufacture cheddar cheese and the gross value per hundredweight of milk to manufacture butter-nonfat dry milk for the first 15 days of the preceding month exceed or are less than the respective gross values for the first 15 days of the second preceding month.

(c) Compute weighting factors to be applied to the changes in gross values determined pursuant to paragraph (b) of this section by determining the relative proportion that the data included in each of the following subparagraphs is of the total of the data represented in paragraph (c)(1) and (2) of this section:

(1) Combine the total American cheese production for the States of Minnesota and Wisconsin, as reported by the Economics and Statistics Service of the Department for the third preceding month, and divide by the yield factor used under the Price Support Program for cheddar cheese to determine the quantity of milk used in the production of American cheddar cheese; and

(2) Combine the total nonfat dry milk production for the States of Minnesota and Wisconsin, as reported by the Economics and Statistics Service of the Department for the third preceding month, and divide by the yield factor used under the Price Support Program for nonfat dry milk to determine the quantity of milk used in the production of butter-nonfat dry milk.

(d) Compute a weighted average of the changes in gross values per hundredweight of milk determined pursuant to paragraph (b) of this section in accordance with the relative proportions of milk determined pursuant to paragraph (c) of this section.

4. Section 1050.53 is revised to read as follows:

§ 1050.53 Announcement of class prices.

The market administrator shall announce publicly on or before the fifth day of each month the Class I price for the following month, the Class III price for the preceding month and, for each month after the first month in which this section is effective, the final Class II price for the preceding month; and on or before the 15th day of each month the tentative Class II price for the following month.

PART 1064—MILK IN THE GREATER KANSAS CITY MARKETING AREA

1. Section 1064.19 is added and reserved and a new § 1064.20 is added to read as follows:

§ 1064.19 (Reserved)

§ 1064.20 Product prices.

The following product prices shall be used in calculating the basic Class II formula price pursuant to § 1064.51a:

(a) *Butter price.* "Butter price" means the simple average, for the first 15 days of the month, of the daily prices per pound of Grade A (92-score) butter. The prices used shall be those of the Chicago Mercantile Exchange as reported and published weekly by the Dairy Division, Agricultural Marketing Service. The average shall be computed by the Director of the Dairy Division, using the price reported each week as the daily price for that day and for each following work-day until the next price is reported. A work-day is each Monday through Friday, except national holidays.

For any week that the Exchange does not meet to establish a price, the price for the following week shall be the last price that was established.

(b) *Cheddar cheese price.* "Cheddar cheese price" means the simple average, for the first 15 days of the month, of the daily prices per pound of cheddar cheese in 40-pound blocks. The prices used shall be those of the National Cheese Exchange (Green Bay, WI), as reported and published weekly by the Dairy Division, Agricultural Marketing Service. The average shall be computed by the Director of the Dairy Division, using the price reported each week as the daily price for that day and for each following work-day until the next price is reported. A work-day is each Monday through Friday except national holidays. For any week that the Exchange does not meet to establish a price, the price for the following week shall be the last price that was established.

(c) *Nonfat dry milk price.* "Nonfat dry milk price" means the simple average, for the first 15 days of the month, of the daily prices per pound of nonfat dry milk, which average shall be computed by the Director of the Dairy Division as follows:

(1) The prices used shall be the prices (using the midpoint of any price range as one price) of high heat, low heat and Grade A nonfat dry milk, respectively, for the Central States production area, as reported and published weekly by the Dairy Division, Agricultural Marketing Service.

(2) For each week, determine the simple average of the prices reported for the three types of nonfat dry milk. Such average shall be the daily price for the day that such prices are reported and for each preceding work-day until the day such prices were previously reported. A work-day is each Monday through Friday except national holidays.

(3) Add the prices determined in paragraph (c)(2) of this section for the first 15 days of the month and divide by the number of days for which there is a daily price.

(d) *Edible whey price.* "Edible whey price" means the simple average, for the first 15 days of the month, of the daily prices per pound of edible whey powder (nonhygroscopic). The prices used shall be the prices (using the midpoint of any price range as one price) of edible whey powder for the Central States production area, as reported and published weekly by the Dairy Division, Agricultural Marketing Service. The average shall be computed by the Director of the Dairy Division, using the price reported each week as the daily price for that day and for each preceding work-day until the day such price was previously reported. A work-day is each Monday through Friday except national holidays.

2. Section 1064.50(b) is revised to read as follows:

§ 1064.50. Class prices.

(b) *Class II price.* A tentative Class II price shall be computed by the Director of the Dairy Division and transmitted to the market administrator on or before the 15th day of the preceding month. The tentative Class II price shall be the basic Class II formula price computed pursuant to § 1064.51a for the month plus the amount that the value computed pursuant to paragraph (b)(1) of this section exceeds the value computed pursuant to paragraph (b)(2) of this section, except that, for each month after the first month in which this paragraph is effective, the final Class II price shall be not less than the Class III price.

(1) Determine for the most recent 12-month period the simple average (rounded to the nearest cent) of the basic formula prices computed pursuant to § 1064.51 and add 10 cents; and

(2) Determine for the same 12-month period as specified in paragraph (b)(1) of this section the simple average (rounded to the nearest cent) of the basic Class II formula prices computed pursuant to § 1064.51a.

3. A new § 1064.51a is added to read as follows:

§ 1064.51a. Basic Class II formula price.

The "basic Class II formula price" for the month shall be the basic formula price determined pursuant to § 1064.51 for the second preceding month plus or minus the amount computed pursuant to paragraphs (a) through (d) of this section:

(a) The gross values per hundredweight of milk used to manufacture cheddar cheese and butter-nonfat dry milk shall be computed, using price data determined pursuant to § 1064.20 and yield factors in effect under the Dairy Price Support Program authorized by the Agricultural Act of 1949, as amended, for the first 15 days of the preceding month and, separately, for the first 15 days of the second preceding month as follows:

(1) The gross value of milk used to manufacture cheddar cheese shall be the sum of the following computations:

(i) Multiply the cheddar cheese price by the yield factor used under the Price Support Program for cheddar cheese;

(ii) Multiply the butter price by the yield factor used under the Price Support Program for determining the butterfat component of the whey value in the cheese price computation; and

(iii) Subtract from the edible whey price the processing cost used under the Price Support Program for edible whey and multiply any positive difference by the yield factor used under the Price Support Program for edible whey.

(2) The gross value of milk used to manufacture butter-nonfat dry milk shall be the sum of the following computations:

(i) Multiply the butter price by the yield factor used under the Price Support Program for butter; and

(ii) Multiply the nonfat dry milk price by the yield factor used under the Price Support Program for nonfat dry milk.

(b) Determine the amounts by which the gross value per hundredweight of milk used to manufacture cheddar cheese and the gross value per hundredweight of milk used to manufacture butter-nonfat dry milk for the first 15 days of the preceding month exceed or are less than the respective gross value for the first 15 days of the second preceding month.

(c) Compute weighting factors to be applied to the changes in gross values determined pursuant to paragraph (b) of this section by determining the relative proportion that the data included in each of the following subparagraphs is of the total of the data represented in paragraph (c) (1) and (2) of this section:

(1) Combine the total American cheese production for the States of Minnesota and Wisconsin, as reported by the Economics and Statistics Service of the Department for the third preceding month, and divide by the yield factor used under the Price Support Program for cheddar cheese to determine the quantity of milk used in the production of American cheddar cheese; and

(2) Combine the total nonfat dry milk production for the States of Minnesota and Wisconsin, as reported by the Economics and Statistics Service of the Department for the third preceding month, and divide by the yield factor used under the Price Support Program for nonfat dry milk to determine the quantity of milk used in the production of butter-nonfat dry milk.

(d) Compute a weighted average of the changes in gross values per hundredweight of milk determined pursuant to paragraph (b) of this section in accordance with the relative proportions of milk determined pursuant to paragraph (c) of this section.

4. Section 1064.53 is revised to read as follows:

§ 1064.53. Announcement of class prices.

The market administrator shall announce publicly on or before the fifth day of each month the Class I price for the following month, the Class III price for the preceding month and, for each month after the first month in which this section is effective, the final Class II price for the preceding month; and on or before the 15th day of each month the tentative Class II price for the following month.

PART 1065—MILK IN THE NEBRASKA-WESTERN IOWA MARKETING AREA

1. Section 1065.19 is added and reserved and a new § 1065.20 is added to read as follows:

§ 1065.19. [Reserved]

§ 1065.20. Product prices.

The following product prices shall be used in calculating the basic Class II formula price pursuant to § 1065.51a:

(a) *Butter price.* "Butter price" means the simple average, for the first 15 days of the month, of the daily prices per pound of Grade A (92-score) butter. The prices used shall be those of the Chicago Mercantile Exchange as reported and published weekly by the Dairy Division, Agricultural Marketing Service. The average shall be computed by the Director of the Dairy Division, using the price reported each week as the daily price for that day and for each following

work-day until the next price is reported. A work-day is each Monday through Friday, except national holidays. For any week that the Exchange does not meet to establish a price, the price for the following week shall be the last price that was established.

(b) *Cheddar cheese price.* "Cheddar cheese price" means the simple average, for the first 15 days of the month, of the daily prices per pound of cheddar cheese in 40-pound blocks. The prices used shall be those of the National Cheese Exchange (Green Bay, WI), as reported and published weekly by the Dairy Division, Agricultural Marketing Service. The average shall be computed by the Director of the Dairy Division, using the price reported each week as the daily price for that day and for each following work-day until the next price is reported. A work-day is each Monday through Friday, except national holidays. For any week that the Exchange does not meet to establish a price, the price for the following week shall be the last price that was established.

(c) *Nonfat dry milk price.* "Nonfat dry milk price" means the simple average, for the first 15 days of the month, of the daily prices per pound of nonfat dry milk, which average shall be computed by the Director of the Dairy Division as follows:

(1) The prices used shall be the prices (using the midpoint of any price range as one price) of high heat, low heat and Grade A nonfat dry milk, respectively, for the Central States production area, as reported and published weekly by the Dairy Division, Agricultural Marketing Service.

(2) For each week, determine the simple average of the prices reported for the three types of nonfat dry milk. Such average shall be the daily price for the day that such prices are reported and for each preceding work-day until the day such prices were previously reported. A work-day is each Monday through Friday except national holidays.

(3) Add the prices determined in paragraph (c)(2) of this section for the first 15 days of the month and divide by the number of days for which there is a daily price.

(d) *Edible whey price.* "Edible whey price" means the simple average, for the first 15 days of the month, of the daily prices per pound of edible whey powder (nonhygroscopic). The prices used shall be the prices (using the midpoint of any price range as one price) of edible whey powder for the Central States production area, as reported and published weekly by the Dairy Division, Agricultural Marketing Service. The

average shall be computed by the Director of the Dairy Division, using the price reported each week as the daily price for that day and for each preceding work-day until the day such price was previously reported. A work-day is each Monday through Friday, except national holidays.

2. Section 1065.50(b) is revised to read as follows:

§ 1065.50 Class prices.

(b) *Class II price.* A tentative Class II price shall be computed by the Director of the Dairy Division and transmitted to the market administrator on or before the 15th day of the preceding month. The tentative Class II price shall be the basic Class II formula price computed pursuant to § 1065.51a for the month plus the amount that the value computed pursuant to paragraph (b)(1) of this section exceeds the value computed pursuant to paragraph (b)(2) of this section, except that, for each month after the first month in which this paragraph is effective, the final Class II price shall be not less than the Class III price.

(1) Determine for the most recent 12-month period the simple average (rounded to the nearest cent) of the basic formula prices computed pursuant to § 1065.51 and add 10 cents; and

(2) Determine for the same 12-month period as specified in paragraph (b)(1) of this section the simple average (rounded to the nearest cent) of the basic Class II formula prices computed pursuant to § 1065.51a.

3. A new § 1065.51a is added to read as follows:

§ 1065.51a Basic Class II formula price.

The "basic Class II formula price" for the month shall be the basic formula price determined pursuant to § 1065.51 for the second preceding month plus or minus the amount computed pursuant to paragraphs (a) through (d) of this section:

(a) The gross values per hundredweight of milk used to manufacture cheddar cheese and butter-nonfat dry milk shall be computed, using price data determined pursuant to § 1065.20 and yield factors in effect under the Dairy Price Support Program authorized by the Agricultural Act of 1949, as amended, for the first 15 days of the preceding month and, separately, for the first 15 days of the second preceding month as follows:

(1) The gross value of milk used to manufacture cheddar cheese shall be the sum of the following computations:

(i) Multiply the cheddar cheese price by the yield factor used under the Price Support Program for cheddar cheese;

(ii) Multiply the butter price by the yield factor used under the Price Support Program for determining the butterfat component of the whey value in the cheese price computation; and

(iii) Subtract from the edible whey price the processing cost used under the Price Support Program for edible whey and multiply any positive difference by the yield factor used under the Price Support Program for edible whey.

(2) The gross value of milk used to manufacture butter-nonfat dry milk shall be the sum of the following computations:

(i) Multiply the butter price by the yield factor used under the Price Support Program for butter; and

(ii) Multiply the nonfat dry milk price by the yield factor used under the Price Support Program for nonfat dry milk.

(b) Determine the amounts by which the gross value per hundredweight of milk used to manufacture cheddar cheese and the gross value per hundredweight of milk used to manufacture butter-nonfat dry milk for the first 15 days of the preceding month exceed or are less than the respective gross values for the first 15 days of the second preceding month.

(c) Compute weighting factors to be applied to the changes in gross values determined pursuant to paragraph (b) of this section by determining the relative proportion that the data included in each of the following subparagraphs is of the total of the data represented in paragraph (c)(1) and (2) of this section:

(1) Combine the total American cheese production for the States of Minnesota and Wisconsin, as reported by the Economics and Statistics Service of the Department for the third preceding month, and divide by the yield factor used under the Price Support Program for cheddar cheese to determine the quantity of milk used in the production of American cheddar cheese; and

(2) Combine the total nonfat dry milk production for the States of Minnesota and Wisconsin, as reported by the Economics and Statistics Service of the Department for the third preceding month, and divide by the yield factor used under the Price Support Program for nonfat dry milk to determine the quantity of milk used in the production of butter-nonfat dry milk.

(d) Compute a weighted average of the changes in gross values per hundredweight of milk determined pursuant to paragraph (b) of this section in accordance with the relative

proportions of milk determined pursuant to paragraph (c) of this section.

4. Section 1065.53 is revised to read as follows:

§ 1065.53 Announcement of class prices.

The market administrator shall announce publicly on or before the fifth day of each month the Class I price for the following month, the Class III price for the preceding month and, for each month after the first month in which this section is effective, the final Class II price for the preceding month; and on or before the 15th day of each month the tentative Class II price for the following month.

PART 1068—MILK IN THE UPPER MIDWEST MARKETING AREA

1. Section 1068.19 is added and reserved and a new § 1068.20 is added to read as follows:

§ 1068.19 [Reserved]

§ 1068.20 Product prices.

The following product prices shall be used in calculating the basic Class II formula price pursuant to § 1068.51a:

(a) *Butter price.* "Butter price" means the simple average, for the first 15 days of the month, of the daily prices per pound of Grade A (92-score) butter. The prices used shall be those of the Chicago Mercantile Exchange as reported and published weekly by the Dairy Division, Agricultural Marketing Service. The average shall be computed by the Director of the Dairy Division, using the price reported each week as the daily price for that day and for each following work-day until the next price is reported. A work-day is each Monday through Friday, except national holidays. For any week that the Exchange does not meet to establish a price, the price for the following week shall be the last price that was established.

(b) *Cheddar cheese price.* "Cheddar cheese price" means the simple average, for the first 15 days of the month, of the daily prices per pound of cheddar cheese in 40-pound blocks. The prices used shall be those of the National Cheese Exchange (Green Bay, WI), as reported and published weekly by the Dairy Division, Agricultural Marketing Service. The average shall be computed by the Director of the Dairy Division, using the price reported each week as the daily price for that day and for each following work-day until the next price is reported. A work-day is each Monday through Friday except national holidays. For any week that the Exchange does not meet to establish a price, the price

for the following week shall be the last price that was established.

(c) *Nonfat dry milk price.* "Nonfat dry milk price" means the simple average, for the first 15 days of the month, of the daily prices per pound of nonfat dry milk, which average shall be computed by the Director of the Dairy Division as follows:

(1) The prices used shall be the prices (using the midpoint of any price range as one price) of high heat, low heat and Grade A nonfat dry milk, respectively, for the Central States production area, as reported and published weekly by the Dairy Division, Agricultural Marketing Service.

(2) For each week, determine the simple average of the prices reported for the three types of nonfat dry milk. Such average shall be the daily price for the day that such prices are reported and for each preceding work-day until the day such prices were previously reported. A work-day is each Monday through Friday except national holidays.

(3) Add the prices determined in paragraph (c)(2) of this section for the first 15 days of the month and divide by the number of days for which there is a daily price.

(d) *Edible whey price.* "Edible whey price" means the simple average, for the first 15 days of the month, of the daily prices per pound of edible whey powder (nonhygroscopic). The prices used shall be the prices (using the midpoint of any price range as one price) of edible whey powder for the Central States production area, as reported and published weekly by the Dairy Division, Agricultural Marketing Service. The average shall be computed by the Director of the Dairy Division, using the price reported each week as the daily price for that day and for each preceding work-day until the day such price was previously reported. A work-day is each Monday through Friday except national holidays.

2. Section 1068.50(b) is revised to read as follows:

§ 1068.50 Class prices.

(b) *Class II price.* A tentative Class II price shall be computed by the Director of the Dairy Division and transmitted to the market administrator on or before the 15th day of the preceding month. The tentative Class II price shall be the basic Class II formula price computed pursuant to § 1068.51a for the month plus the amount that the value computed pursuant to paragraph (b)(1) of this section exceeds the value computed pursuant to paragraph (b)(2) of this section, except that, for each month

after the first month in which this paragraph is effective, the final Class II price shall be not less than the Class III price.

(1) Determine for the most recent 12-month period the simple average (rounded to the nearest cent) of the basic formula prices computed pursuant to § 1068.51 and add 10 cents; and

(2) Determine for the same 12-month period as specified in paragraph (b)(1) of this section the simple average (rounded to the nearest cent) of the basic Class II formula prices computed pursuant to § 1068.51a.

3. A new § 1068.51a is added to read as follows:

§ 1068.51a Basic Class II formula price.

The "basic Class II formula price" for the month shall be the basic formula price determined pursuant to § 1068.51 for the second preceding month plus or minus the amount computed pursuant to paragraphs (a) through (d) of this section:

(a) The gross values per hundredweight of milk used to manufacture cheddar cheese and butter-nonfat dry milk shall be computed, using price data determined pursuant to § 1068.20 and yield factors in effect under the Dairy Price Support Program authorized by the Agricultural Act of 1949, as amended, for the first 15 days of the preceding month and, separately, for the first 15 days of the second preceding month as follows:

(1) The gross value of milk used to manufacture cheddar cheese shall be the sum of the following computations:

(i) Multiply the cheddar cheese price by the yield factor used under the Price Support Program for cheddar cheese;

(ii) Multiply the butter price by the yield factor used under the Price Support Program for determining the butterfat component of the whey value in the cheese price computation; and

(iii) Subtract from the edible whey price the processing cost used under the Price Support Program for edible whey and multiply any positive difference by the yield factor used under the Price Support Program for edible whey.

(2) The gross value of milk used to manufacture butter-nonfat dry milk shall be the sum of the following computations:

(i) Multiply the butter price by the yield factor used under the Price Support Program for butter; and

(ii) Multiply the nonfat dry milk price by the yield factor used under the Price Support Program for nonfat dry milk.

(b) Determine the amounts by which the gross value per hundredweight of

milk used to manufacture cheddar cheese and the gross value per hundredweight of milk used to manufacture butter-nonfat dry milk for the first 15 days of the preceding month exceed or are less than the respective gross values for the first 15 days of the second preceding month.

(c) Compute weighting factors to be applied to the changes in gross values determined pursuant to paragraph (b) of this section by determining the relative proportion that the data included in each of the following subparagraphs is of the total of the data represented in paragraph (c)(1) and (2) of this section:

(1) Combine the total American cheese production for the States of Minnesota and Wisconsin, as reported by the Economics and Statistics Service of the Department for the third preceding month, and divide by the yield factor used under the Price Support Program for cheddar cheese to determine the quantity of milk used in the production of American cheddar cheese; and

(2) Combine the total nonfat dry milk production for the States of Minnesota and Wisconsin, as reported by the Economics and Statistics Service of the Department for the third preceding month, and divide by the yield factor used under the Price Support program for nonfat dry milk to determine the quantity of milk used in the production of butter-nonfat dry milk.

(d) Compute a weighted average of the changes in gross values per hundredweight of milk determined pursuant to paragraph (b) of this section in accordance with the relative proportions of milk determined pursuant to paragraph (c) of this section.

4. Section 1068.53 is revised to read as follows:

§ 1068.53 Announcement of class prices.

The market administrator shall announce publicly on or before the fifth day of each month the Class I price for the following month, the Class III price for the preceding month and, for each month after the first month in which this section is effective, the final Class II price for the preceding month; and on or before the 15th day of each month the tentative Class II price for the following month.

PART 1071—MILK IN THE NEOSHO VALLEY MARKETING AREA

1. A new § 1071.20 is added to read as follows:

§ 1071.20 Product prices.

The following product prices shall be used in calculating the basic Class II formula price pursuant to § 1071.51a:

(a) *Butter price.* "Butter price" means the simple average, for the first 15 days of the month, of the daily prices per pound of Grade A (92-score) butter. The prices used shall be those of the Chicago Mercantile Exchange as reported and published weekly by the Dairy Division, Agricultural Marketing Service. The average shall be computed by the Director of the Dairy Division, using the price reported each week as the daily price for that day and for each following work-day until the next price is reported. A work-day is each Monday through Friday, except national holidays. For any week that the Exchange does not meet to establish a price, the price for the following week shall be the last price that was established.

(b) *Cheddar cheese price.* "Cheddar cheese price" means the simple average, for the first 15 days of the month, of the daily prices per pound of cheddar cheese in 40-pound blocks. The prices used shall be those of the National Cheese Exchange (Green Bay, WI), as reported and published weekly by the Dairy Division, Agricultural Marketing Service. The average shall be computed by the Director of the Dairy Division, using the price reported each week as the daily price for that day and for each following work-day until the next price is reported. A work-day is each Monday through Friday except national holidays. For any week that the Exchange does not meet to establish a price, the price for the following week shall be the last price that was established.

(c) *Nonfat dry milk price.* "Nonfat dry milk price" means the simple average, for the first 15 days of the month, of the daily prices per pound of nonfat dry milk, which average shall be computed by the Director of the Dairy Division as follows:

(1) The prices used shall be the prices (using the midpoint of any price range as one price) of high heat, low heat and Grade A nonfat dry milk, respectively, for the Central States production area, as reported and published weekly by the Dairy Division, Agricultural Marketing Service.

(2) For each week, determine the simple average of the prices reported for the three types of nonfat dry milk. Such average shall be the daily price for the day that such prices are reported and for each preceding work-day until the day such prices were previously reported. A work-day is each Monday through Friday except national holidays.

(3) Add the prices determined in paragraph (c)(2) of this section for the first 15 days of the month and divide by the number of days for which there is a daily price.

(d) *Edible whey price.* "Edible whey price" means the simple average, for the first 15 days of the month, of the daily prices per pound of edible whey powder (nonhygroscopic). The prices used shall be the prices (using the midpoint of any price range as one price) of edible whey powder for the Central States production area, as reported and published weekly by the Dairy Division, Agricultural Marketing Service. The average shall be computed by the Director of the Dairy Division, using the price reported each week as the daily price for that day and for each preceding work-day until the day such price was previously reported. A work-day is each Monday through Friday except national holidays.

2. Section 1071.50(b) is revised to read as follows:

§ 1071.50 Class prices.

• • • • •

(b) *Class II price.* A tentative Class II price shall be computed by the Director of the Dairy Division and transmitted to the market administrator on or before the 15th day of the preceding month. The tentative Class II price shall be the basic Class II formula price computed pursuant to § 1071.51a for the month plus the amount that the value computed pursuant to paragraph (b)(1) of this section exceeds the value computed pursuant to paragraph (b)(2) of this section, except that, for each month after the first month in which this paragraph is effective, the final Class II price shall be not less than the Class III price.

(1) Determine for the most recent 12-month period the simple average (rounded to the nearest cent) of the basic formula prices computed pursuant to § 1071.51 and add 10 cents; and

(2) Determine for the same 12-month period as specified in paragraph (b)(1) of this section the simple average (rounded to the nearest cent) of the basic Class II formula prices computed pursuant to § 1071.51a.

• • • • •

3. A new § 1071.51a is added to read as follows:

§ 1071.51a Basic Class II formula price.

The "basic Class II formula price" for the month shall be the basic formula price determined pursuant to § 1071.51 for the second preceding month plus or minus the amount computed pursuant to

paragraphs (a) through (d) of this section:

(a) The gross values per hundredweight of milk used to manufacture cheddar cheese and butter-nonfat dry milk shall be computed, using price data determined pursuant to § 1071.20 and yield factors in effect under the Dairy Price Support Program authorized by the Agricultural Act of 1949, as amended, for the first 15 days of the preceding month and, separately, for the first 15 days of the second preceding month as follows:

(1) The gross value of milk used to manufacture cheddar cheese shall be the sum of the following computations:

(i) Multiply the cheddar cheese price by the yield factor used under the Price Support Program for cheddar cheese;

(ii) Multiply the butter price by the yield factor used under the Price Support Program for determining the butterfat component of the whey value in the cheese price computation; and

(iii) Subtract from the edible whey price the processing cost used under the Price Support Program for edible whey and multiply any positive difference by the yield factor used under the Price Support Program for edible whey.

(2) The gross value of milk used to manufacture butter-nonfat dry milk shall be the sum of the following computations:

(i) Multiply the butter price by the yield factor used under the Price Support Program for butter; and

(ii) Multiply the nonfat dry milk price by the yield factor used under the Price Support Program for nonfat dry milk.

(b) Determine the amounts by which the gross value per hundredweight of milk used to manufacture cheddar cheese and the gross value per hundredweight of milk used to manufacture butter-nonfat dry milk for the first 15 days of the preceding month exceed or are less than the respective gross values for the first 15 days of the second preceding month.

(c) Compute weighting factors to be applied to the changes in gross values determined pursuant to paragraph (b) of this section by determining the relative proportion that the data included in each of the following subparagraphs is of the total of the data represented in paragraph (c)(1) and (2) of this section:

(1) Combine the total American cheese production for the States of Minnesota and Wisconsin, as reported by the Economics and Statistics Service of the Department for the third preceding month, and divide by the yield factor used under the Price Support Program for cheddar cheese to determine the quantity of milk used in

the production of American cheddar cheese; and

(2) Combine the total nonfat dry milk production for the States of Minnesota and Wisconsin, as reported by the Economics and Statistics Service of the Department for the third preceding month, and divide by the yield factor used under the Price Support Program for nonfat dry milk to determine the quantity of milk used in the production of butter-nonfat dry milk.

(d) Compute a weighted average of the changes in gross values per hundredweight of milk determined pursuant to paragraph (b) of this section in accordance with the relative proportions of milk determined pursuant to paragraph (c) of this section.

4. Section 1071.53 is revised to read as follows:

§ 1071.53 Announcement of class prices.

The market administrator shall announce publicly on or before the fifth day of each month the Class I price for the following month, the Class III price for the preceding month and, for each month after the first month in which this section is effective, the final Class II price for the preceding month; and on or before the 15th day of each month the tentative Class II price for the following month.

PART 1073—MILK IN THE WICHITA, KANSAS MARKETING AREA

1. Section 1073.19 is added and reserved and a new § 1073.20 is added to read as follows:

§ 1073.19 [Reserved]

§ 1073.20 Product prices.

The following product prices shall be used in calculating the basic Class II formula price pursuant to § 1073.51a:

(a) *Butter price.* "Butter price" means the simple average, for the first 15 days of the month, of the daily prices per pound of Grade A (92-score) butter. The prices used shall be those of the Chicago Mercantile Exchange as reported and published weekly by the Dairy Division, Agricultural Marketing Service. The average shall be computed by the Director of the Dairy Division, using the price reported each week as the daily price for that day and for each following work-day until the next price is reported. A work-day is each Monday through Friday, except national holidays. For any week that the Exchange does not meet to establish a price, the price for the following week shall be the last price that was established.

(b) *Cheddar cheese price.* "Cheddar cheese price" means the simple average,

for the first 15 days of the month, of the daily prices per pound of cheddar cheese in 40-pound blocks. The prices used shall be those of the National Cheese Exchange (Green Bay, WI), as reported and published weekly by the Dairy Division, Agricultural Marketing Service. The average shall be computed by the Director of the Dairy Division, using the price reported each week as the daily price for that day and for each following work-day until the next price is reported. A work-day is each Monday through Friday except national holidays. For any week that the Exchange does not meet to establish a price, the price for the following week shall be the last price that was established.

(c) *Nonfat dry milk price.* "Nonfat dry milk price" means the simple average, for the first 15 days of the month, of the daily prices per pound of nonfat dry milk, which average shall be computed by the Director of the Dairy Division as follows:

(1) The prices used shall be prices (using the midpoint of any price range as one price) of high heat, low heat and Grade A nonfat dry milk, respectively, for the Central States production area, as reported and published weekly by the Dairy Division, Agricultural Marketing Service.

(2) For each week, determine the simple average of the prices reported for the three types of nonfat dry milk. Such average shall be the daily price for the day that such prices are reported and for each preceding work-day until the day such prices were previously reported. A work-day is each Monday through Friday except national holidays.

(3) Add the prices determined in paragraph (c)(2) of this section for the first 15 days of the month and divide by the number of days for which there is a daily price.

(d) *Edible whey price.* "Edible whey price" means the simple average, for the first 15 days of the month, of the daily prices per pound of edible whey powder (nonhygroscopic). The prices used shall be the prices (using the midpoint of any price range as one price) of edible whey powder for the Central States production area, as reported and published weekly by the Dairy Division, Agricultural Marketing Service. The average shall be computed by the Director of the Dairy Division, using the price reported each week as the daily price for that day and for each preceding work-day until the day such price was previously reported. A work-day is each Monday through Friday, except national holidays.

2. Section 1073.50(b) is revised to read as follows:

§ 1073.50 Class prices.

(b) *Class II price.* A tentative Class II price shall be computed by the Director of the Dairy Division and transmitted to the market administrator on or before the 15th day of the preceding month. The tentative Class II price shall be the basic Class II formula price computed pursuant to § 1073.51a for the month plus the amount that the value computed pursuant to paragraph (b)(1) of this section exceeds the value computed pursuant to paragraph (b)(2) of this section, except that, for each month after the first month in which this paragraph is effective, the final Class II price shall be not less than the Class III price.

(1) Determine for the most recent 12-month period the simple average (rounded to the nearest cent) of the basic formula prices computed pursuant to § 1073.51 and add 10 cents; and

(2) Determine for the same 12-month period as specified in paragraph (b)(1) of this section the simple average (rounded to the nearest cent) of the basic Class II formula prices computed pursuant to § 1073.51a.

3. A new § 1073.51a is added to read as follows:

§ 1073.51a Basic Class II formula price.

The "basic Class II formula price" for the month shall be the basic formula price determined pursuant to § 1073.51 for the second preceding month plus or minus the amount computed pursuant to paragraphs (a) through (d) of this section:

(a) The gross values per hundredweight of milk used to manufacture cheddar cheese and butter-nonfat dry milk shall be computed, using price data determined pursuant to § 1073.20 and yield factors in effect under the Dairy Price Support Program authorized by the Agricultural Act of 1949, as amended, for the first 15 days of the preceding month and, separately, for the first 15 days of the second preceding month as follows:

(1) The gross value of milk used to manufacture cheddar cheese shall be the sum of the following computations:

(i) Multiply the cheddar cheese price by the yield factor used under the Price Support Program for cheddar cheese;

(ii) Multiply the butter price by the yield factor used under the Price Support Program for determining the butterfat component of the whey value in the cheese price computation; and

(iii) Subtract from the edible whey price the processing cost used under the Price Support Program for edible whey and multiply any positive difference by

the yield factor used under the Price Support Program for edible whey.

(2) The gross value of milk used to manufacture butter-nonfat dry milk shall be the sum of the following computations:

(i) Multiply the butter price by the yield factor used under the Price Support Program for butter; and

(ii) Multiply the nonfat dry milk price by the yield factor used under the Price Support Program for nonfat dry milk.

(b) Determine the amounts by which the gross value per hundredweight of milk used to manufacture cheddar cheese and the gross value per hundredweight of milk used to manufacture butter-nonfat dry milk for the first 15 days of the preceding month exceed or are less than the respective gross values for the first 15 days of the second preceding month.

(c) Compute weighting factors to be applied to the changes in gross values determined pursuant to paragraph (b) of this section by determining the relative proportion that the data included in each of the following subparagraphs is of the total of the data represented in paragraph (c) (1) and (2) of this section:

(1) Combine the total American cheese production for the States of Minnesota and Wisconsin, as reported by the Economics and Statistics Service of the Department for the third preceding month, and divide by the yield factor used under the Price Support Program for cheddar cheese to determine the quantity of milk used in the production of American cheddar cheese; and

(2) Combine the total nonfat dry milk production for the States of Minnesota and Wisconsin, as reported by the Economics and Statistics Service of the Department for the third preceding month, and divide by the yield factor used under the Price Support Program for nonfat dry milk to determine the quantity of milk used in the production of butter-nonfat dry milk.

(d) Compute a weighted average of the changes in gross values per hundredweight of milk determined pursuant to paragraph (b) of this section in accordance with the relative proportions of milk determined pursuant to paragraph (c) of this section.

4. Section 1073.53 is revised to read as follows:

§ 1073.53 Announcement of class prices.

The market administrator shall announce publicly on or before the fifth day of each month the Class I price for the following month, the Class III price for the preceding month and, for each month after the first month in which this

section is effective, the final Class II price for the preceding month; and on or before the 15th day of each month the tentative Class II price for the following month.

PART 1076—MILK IN THE EASTERN SOUTH DAKOTA MARKETING AREA

1. Section 1076.19 is added and reserved and a new § 1076.20 is added to read as follows:

§ 1076.19 [Reserved]**§ 1076.20 Product prices.**

The following product prices shall be used in calculating the basic Class II formula price pursuant to § 1076.51a:

(a) *Butter price.* "Butter price" means the simple average, for the first 15 days of the month, of the daily prices per pound of Grade A (92-score) butter. The prices used shall be those of the Chicago Mercantile Exchange as reported and published weekly by the Dairy Division, Agricultural Marketing Service. The average shall be computed by the Director of the Dairy Division, using the price reported each week as the daily price for that day and for each following work-day until the next price is reported. A work-day is each Monday through Friday, except national holidays. For any week that the Exchange does not meet to establish a price, the price for the following week shall be the last price that was established.

(b) *Cheddar cheese price.* "Cheddar cheese price" means the simple average, for the first 15 days of the month, of the daily prices per pound of cheddar cheese in 40-pound blocks. The prices used shall be those of the National Cheese Exchange (Green Bay, WI), as reported and published weekly by the Dairy Division, Agricultural Marketing Service. The average shall be computed by the Director of the Dairy Division, using the price reported each week as the daily price for that day and for each following work-day until the next price is reported. A work-day is each Monday through Friday except national holidays. For any week that the Exchange does not meet to establish a price, the price for the following week shall be the last price that was established.

(c) *Nonfat dry milk price.* "Nonfat dry milk price" means the simple average, for the first 15 days of the month, of the daily prices per pound of nonfat dry milk, which average shall be computed by the Director of the Dairy Division as follows:

(1) The prices used shall be the prices (using the midpoint of any price range as one price) of high heat, low heat and

Grade A nonfat dry milk, respectively, for the Central States production area, as reported and published weekly by the Dairy Division, Agricultural Marketing Service.

(2) For each week, determine the simple average of the prices reported for the three types of nonfat dry milk. Such average shall be the daily price for the day that such prices are reported and for each preceding work-day until the day such prices were previously reported. A work-day is each Monday through Friday except national holidays.

(3) Add the prices determined in paragraph (c)(2) of this section for the first 15 days of the month and divide by the number of days for which there is a daily price.

(d) *Edible whey price.* "Edible whey price" means the simple average, for the first 15 days of the month, of the daily prices per pound of edible whey powder (nonhygroscopic). The prices used shall be the prices (using the midpoint of any price range as one price) of edible whey powder for the Central States production area, as reported and published weekly by the Dairy Division, Agricultural Marketing Service. The average shall be computed by the Director of the Dairy Division, using the price reported each week as the daily price for that day and for each preceding work-day until the day such price was previously reported. A work-day is each Monday through Friday except national holidays.

2. Section 1076.50(b) is revised to read as follows:

§ 1076.50 Class prices.

(b) *Class II price.* A tentative Class II price shall be computed by the Director of the Dairy Division and transmitted to the market administrator on or before the 15th day of the preceding month. The tentative Class II price shall be the basic Class II formula price computed pursuant to § 1076.51a for the month plus the amount that the value computed pursuant to paragraph (b)(1) of this section exceeds the value computed pursuant to paragraph (b)(2) of this section, except that, for each month after the first month in which this paragraph is effective, the final Class II price shall be not less than the Class III price.

(1) Determine for the most recent 12-month period the simple average (rounded to the nearest cent) of the basic formula prices computed pursuant to § 1076.51 and add 10 cents; and

(2) Determine for the same 12-month period as specified in paragraph (b)(1) of this section the simple average (rounded to the nearest cent) of the basic Class II

formula prices computed pursuant to § 1076.51a.

3. A new § 1076.51a is added to read as follows:

§ 1076.51a Basic Class II formula price.

The "basic Class II formula price" for the month shall be the basic formula price determined pursuant to § 1076.51 for the second preceding month plus or minus the amount computed pursuant to paragraphs (a) through (d) of this section:

(a) The gross values per hundredweight of milk used to manufacture cheddar cheese and butter-nonfat dry milk shall be computed, using price data determined pursuant to § 1076.20 and yield factor in effect under the Dairy Price Support Program authorized by the Agricultural Act of 1949, as amended, for the first 15 days of the preceding month and, separately, for the first 15 days of the second preceding month as follows:

(1) The gross value of milk used to manufacture cheddar cheese shall be the sum of the following computations:

(i) Multiply the cheddar cheese price by the yield factor used under the Price Support Program for cheddar cheese;

(ii) Multiply the butter price by the yield factor used under the Price Support Program for determining the butterfat component of the whey value in the cheese price computation; and

(iii) Subtract from the edible whey price the processing cost used under the Price Support Program for edible whey and multiply any positive difference by the yield factor used under the Price Support Program for edible whey.

(2) The gross value of milk used to manufacture butter-nonfat dry milk shall be the sum of the following computations:

(i) Multiply the butter price by the yield factor used in the Price Support Program for butter; and

(ii) Multiply the nonfat dry milk price by the yield factor used under the Price Support Program for nonfat dry milk.

(b) Determine the amounts by which the gross value per hundredweight of milk used to manufacture cheddar cheese and the gross value per hundredweight of milk used to manufacture butter-nonfat dry milk for the first 15 days of the preceding month exceed or are less than the respective gross values for the first 15 days of the second preceding month.

(c) Compute weighting factors to be applied to the changes in gross values determined pursuant to paragraph (b) of this section by determining the relative proportion that the data included in each of the following subparagraphs is

of the total of the data represented in paragraph (c) (1) and (2) of this section:

(1) Combine the total American cheese production for the States of Minnesota and Wisconsin, as reported by the Economics and Statistics Service of the Department for the third preceding month, and divide by the yield factor used under the Price Support Program for cheddar cheese to determine the quantity of milk used in the production of American cheddar cheese; and

(2) Combine the total nonfat dry milk production for the States of Minnesota and Wisconsin, as reported by the Economics and Statistics Service of the Department for the third preceding month, and divide by the yield factor used under the Price Support Program for nonfat dry milk to determine the quantity of milk used in the production of butter-nonfat dry milk.

(d) Compute a weighted average of the changes in gross values per hundredweight of milk determined pursuant to paragraph (b) of this section in accordance with the relative proportions of milk determined pursuant to paragraph (c) of this section.

4. Section 1076.53 is revised to read as follows:

§ 1076.53 Announcement of class prices.

The market administrator shall announce publicly on or before the fifth day of each month the Class I price for the following month, the Class III price for the preceding month and, for each month after the first month in which this section is effective, the final Class II price for the preceding month; and on or before the 15th day of each month the tentative Class II price for the following month.

PART 1079—MILK IN THE IOWA MARKETING AREA

1. Section 1079.19 is added and reserved and a new § 1079.20 is added to read as follows:

§ 1079.19 [Reserved]

§ 1079.20 Product prices.

The following product prices shall be used in calculating the basic Class II formula price pursuant to § 1079.51a:

(a) *Butter price.* "Butter price" means the simple average, for the first 15 days of the month, of the daily prices per pound of Grade A (92-score) butter. The prices used shall be those of the Chicago Mercantile Exchange as reported and published weekly by the Dairy Division, Agricultural Marketing Service. The average shall be computed by the Director of the Dairy Division, using the

price reported each week as the daily price for that day and for each following work-day until the next price is reported. A work-day is each Monday through Friday, except national holidays. For any week that the Exchange does not meet to establish a price, the price for the following week shall be the last price that was established.

(b) *Cheddar cheese price.* "Cheddar cheese price" means the simple average, for the first 15 days of the month, of the daily prices per pound of cheddar cheese in 40-pound blocks. The prices used shall be those of the National Cheese Exchange (Green Bay, WI), as reported and published weekly by the Dairy Division, Agricultural Marketing Service. The average shall be computed by the Director of the Dairy Division, using the price reported each week as the daily price for that day and for each following work-day until the next price is reported. A work-day is each Monday through Friday except national holidays. For any week that the Exchange does not meet to establish a price, the price for the following week shall be the last price that was established.

(c) *Nonfat dry milk price.* "Nonfat dry milk price" means the simple average, for the first 15 days of the month, of the daily prices per pound of nonfat dry milk, which average shall be computed by the Director of the Dairy Division as follows:

(1) The prices used shall be the prices (using the midpoint of any price range as one price) of high heat, low heat and Grade A nonfat dry milk, respectively, for the Central States production area, as reported and published weekly by the Dairy Division, Agricultural Marketing Service.

(2) For each week, determine the simple average of the prices reported for the three types of nonfat dry milk. Such average shall be the daily price for the day that such prices are reported and for each preceding work-day until the day such prices were previously reported. A work-day is each Monday through Friday except national holidays.

(3) Add the prices determined in paragraph (c)(2) of this section for the first 15 days of the month and divide by the number of days for which there is a daily price.

(d) *Edible whey price.* "Edible whey price" means the simple average, for the first 15 days of the month, of the daily prices per pound of edible whey powder (nonhygroscopic). The prices used shall be the prices (using the midpoint of any price range as one price) of edible whey powder for the Central States production area, as reported and published weekly by the Dairy Division,

Agricultural Marketing Service. The average shall be computed by the Director of the Dairy Division, using the price reported each week as the daily price for that day and for each preceding work-day until the day such price was previously reported. A work-day is each Monday through Friday except national holidays.

2. Section 1079.50(b) is revised to read as follows:

§ 1079.50 Class prices.

* * *

(b) *Class II price.* A tentative Class II price shall be computed by the Director of the Dairy Division and transmitted to the market administrator on or before the 15th day of the preceding month. The tentative Class II price shall be the basic Class II formula price computed pursuant to § 1079.51a for the month plus the amount that the value computed pursuant to paragraph (b)(1) of this section exceeds the value computed pursuant to paragraph (b)(2) of this section, except that, for each month after the first month in which this paragraph is effective, the final Class II price shall be not less than the Class III price.

(1) Determine for the most recent 12-month period the simple average (rounded to the nearest cent) of the basic formula prices computed pursuant to § 1079.51 and add 10 cents; and

(2) Determine for the same 12-month period as specified in paragraph (b)(1) of this section the simple average (rounded to the nearest cent) of the basic Class II formula prices computed pursuant to § 1079.51a.

* * *

3. A new § 1079.51a is added to read as follows:

§ 1079.51a Basic Class II formula price.

The "basic Class II formula price" for the month shall be the basic formula price determined pursuant to § 1079.51 for the second preceding month plus or minus the amount computed pursuant to paragraphs (a) through (d) of this section:

(a) The gross values per hundredweight of milk used to manufacture cheddar cheese and butter-nonfat dry milk shall be computed, using price data determined pursuant to § 1079.20 and yield factors in effect under the Dairy Price Support Program authorized by the Agricultural Act of 1949, as amended, for the first 15 days of the preceding month and, separately, for the first 15 days of the second preceding month as follows:

(1) The gross value of milk used to manufacture cheddar cheese shall be the sum of the following computations:

(i) Multiply the cheddar cheese price by the yield factor used under the Price Support Program for cheddar cheese;

(ii) Multiply the butter price by the yield factor used under the Price Support Program for determining the butterfat component of the whey value in the cheese price computation; and

(iii) Subtract from the edible whey price the processing cost used under the Price Support Program for edible whey and multiply any positive difference by the yield factor used under the Price Support Program for edible whey.

(2) The gross value of milk used to manufacture butter-nonfat dry milk shall be the sum of the following computations:

(i) Multiply the butter price by the yield factor used under the Price Support Program for butter; and

(ii) Multiply the nonfat dry milk price by the yield factor used under the Price Support Program for nonfat dry milk.

(b) Determine the amounts by which the gross value per hundredweight of milk used to manufacture cheddar cheese and the gross value per hundredweight of milk used to manufacture butter-nonfat dry milk for the first 15 days of the preceding month exceed or are less than the respective gross values for the first 15 days of the second preceding month.

(c) Compute weighting factors to be applied to the changes in gross values determined pursuant to paragraph (b) of this section by determining the relative proportion that the data included in each of the following subparagraphs is of the total of the data represented in paragraph (c) (1) and (2) of this section:

(1) Combine the total American cheese production for the States of Minnesota and Wisconsin, as reported by the Economics and Statistics Service of the Department for the third preceding month, and divide by the yield factor used under the Price Support Program for cheddar cheese to determine the quantity of milk used in the production of American cheddar cheese; and

(2) Combine the total nonfat dry milk production for the States of Minnesota and Wisconsin, as reported by the Economics and Statistics Service of the Department for the third preceding month, and divide by the yield factor used under the Price Support program for nonfat dry milk to determine the quantity of milk used in the production of butter-nonfat dry milk.

(d) Compute a weighted average of the changes in gross values per

hundredweight of milk determined pursuant to paragraph (b) of this section in accordance with the relative proportions of milk determined pursuant to paragraph (c) of this section.

4. Section 1079.53 is revised to read as follows:

§ 1079.53 Announcement of class prices.

The market administrator shall announce publicly on or before the fifth day of each month the Class I price for the following month, the Class III price for the preceding month and, for each month after the first month in which this section is effective, the final Class II price for the preceding month; and on or before the 15th day of each month the tentative Class II price for the following month.

PART 1094—MILK IN THE NEW ORLEANS-MISSISSIPPI MARKETING AREA

1. Section 1094.19 is added and reserved and a new § 1094.20 is added to read as follows:

§ 1094.19 [Reserved]

§ 1094.20 Product prices.

The following product prices shall be used in calculating the basic Class II formula price pursuant to § 1094.51a:

(a) *Butter price.* "Butter price" means the simple average, for the first 15 days of the month, of the daily prices per pound of Grade A (92-score) butter. The prices used shall be those of the Chicago Mercantile Exchange as reported and published weekly by the Dairy Division, Agricultural Marketing Service. The average shall be computed by the Director of the Dairy Division, using the price reported each week as the daily price for that day and for each following work-day until the next price is reported. A work-day is each Monday through Friday, except national holidays. For any week that the Exchange does not meet to establish a price, the price for the following week shall be the last price that was established.

(b) *Cheddar cheese price.* "Cheddar cheese price" means the simple average, for the first 15 days of the month, of the daily prices per pound of cheddar cheese in 40-pound blocks. The prices used shall be those of the National Cheese Exchange (Green Bay, WI), as reported and published weekly by the Dairy Division, Agricultural Marketing Service. The average shall be computed by the Director of the Dairy Division, using the price reported each week as the daily price for that day and for each following work-day until the next price is reported. A work-day is each Monday

through Friday except national holidays. For any week that the Exchange does not meet to establish a price, the price for the following week shall be the last price that was established.

(c) *Nonfat dry milk price.* "Nonfat dry milk price" means the simple average, for the first 15 days of the month, of the daily prices per pound of nonfat dry milk, which average shall be computed by the Director of the Dairy Division as follows:

(1) The prices used shall be the prices (using the midpoint of any price range as one price) of high heat, low heat and Grade A nonfat dry milk, respectively, for the Central States production area, as reported and published weekly by the Dairy Division, Agricultural Marketing Service.

(2) For each week, determine the simple average of the prices reported for the three types of nonfat dry milk. Such average shall be the daily price for the day that such prices are reported and for each preceding work-day until the day such prices were previously reported. A work-day is each Monday through Friday except national holidays.

(3) Add the prices determined in paragraph (c)(2) of this section for the first 15 days of the month and divide by the number of days for which there is a daily price.

(d) *Edible whey price.* "Edible whey price" means the simple average, for the first 15 days of the month, of the daily prices per pound of edible whey powder (nonhygroscopic). The prices used shall be the prices (using the midpoint of any price range as one price) of edible whey powder for the Central States production area, as reported and published weekly by the Dairy Division, Agricultural Marketing Service. The average shall be computed by the Director of the Dairy Division, using the price reported each week as the daily price for that day and for each preceding work-day until the day such price was previously reported. A work-day is each Monday through Friday except national holidays.

2. Section 1094.50(b) is revised to read as follows:

§ 1094.50 Class prices.

(b) *Class II price.* A tentative Class II price shall be computed by the Director of the Dairy Division and transmitted to the market administrator on or before the 15th day of the preceding month. The tentative Class II price shall be the basic Class II formula price computed pursuant to § 1094.51a for the month plus the amount that the value computed pursuant to paragraph (b)(1) of this section exceeds the value computed

pursuant to paragraph (b)(2) of this section, except that, for each month after the first month in which this paragraph is effective, the final Class II price shall be not less than the Class III price.

(1) Determine for the most recent 12-month period the simple average (rounded to the nearest cent) of the basic formula prices computed pursuant to § 1094.51 and add 10 cents; and

(2) Determine for the same 12-month period as specified in paragraph (b)(1) of this section the simple average (rounded to the nearest cent) of the basic Class II formula prices computed pursuant to § 1094.51a.

3. A new § 1094.51a is added to read as follows:

§ 1094.51a Basic Class II formula price.

The "basic Class II formula price" for the month shall be the basic formula price determined pursuant to § 1094.51 for the second preceding month plus or minus the amount computed pursuant to paragraphs (a) through (d) of this section:

(a) The gross values per hundredweight of milk used to manufacture cheddar cheese and butter-nonfat dry milk shall be computed, using price data determined pursuant to § 1094.20 and yield factors in effect under the Dairy Price Support Program authorized by the Agricultural Act of 1949, as amended, for the first 15 days of the preceding month and, separately, for the first 15 days of the second preceding month as follows:

(1) The gross value of milk used to manufacture cheddar cheese shall be the sum of the following computations:

(i) Multiply the cheddar cheese price by the yield factor used under the Price Support Program for cheddar cheese;

(ii) Multiply the butter price by the yield factor used under the Price Support Program for determining the butterfat component of the whey value in the cheese price computation; and

(iii) Subtract from the edible whey price the processing cost used under the Price Support Program for edible whey and multiply any positive difference by the yield factor under the Price Support Program for edible whey.

(2) The gross value of milk used to manufacture butter-nonfat dry milk shall be the sum of the following computations:

(i) Multiply the butter price by the yield factor used under the Price Support Program for butter; and

(ii) Multiply the nonfat dry milk price by the yield factor used under the Price Support Program for nonfat dry milk.

(b) Determine the amounts by which the gross value per hundredweight of milk used to manufacture cheddar cheese and the gross value per hundredweight of milk used to manufacture butter-nonfat dry milk for the first 15 days of the preceding month exceed or are less than the respective gross values for the first 15 days of the second preceding month.

(c) Compute weighting factors to be applied to the changes in gross values determined pursuant to paragraph (b) of this section by determining the relative proportion that the data included in each of the following subparagraphs is of the total of the data represented in paragraph (c) (1) and (2) of this section:

(1) Combine the total American cheese production for the States of Minnesota and Wisconsin, as reported by the Economics and Statistics Service of the Department for the third preceding month, and divide by the yield factor used under the Price Support Program for cheddar cheese to determine the quantity of milk used in the production of American cheddar cheese; and

(2) Combine the total nonfat dry milk production for the States of Minnesota and Wisconsin, as reported by the Economics and Statistics Service of the Department for the third preceding month, and divide by the yield factor used under the Price Support Program for nonfat dry milk to determine the quantity of milk used in the production of butter-nonfat dry milk.

(d) Compute a weighted average of the changes in gross values per hundredweight of milk determined pursuant to paragraph (b) of this section in accordance with the relative proportions of milk determined pursuant to paragraph (c) of this section.

4. Section 1094.53 is revised to read as follows:

§ 1094.53 Announcement of class prices.

The market administrator shall announce publicly on or before the fifth day of each month the Class I price for the following months, the Class III price for the preceding month and, for each month after the first month in which this section is effective, the final Class II price for the preceding month; and on or before the 15th day of each month the tentative Class II price for the following month.

PART 1096—MILK IN THE GREATER LOUISIANA MARKETING AREA

1. Section 1096.19 is added and reserved and a new § 1096.20 is added to read as follows:

§ 1096.19 [Reserved]

§ 1096.20 Product prices.

The following product prices shall be used in calculating the basic Class II formula price pursuant to § 1096.51a:

(a) *Butter price.* "Butter price" means the simple average, for the first 15 days of the month, of the daily prices per pound of Grade A (92-score) butter. The prices used shall be those of the Chicago Mercantile Exchange as reported and published weekly by the Dairy Division, Agricultural Marketing Service. The average shall be computed by the Director of the Dairy Division, using the price reported each week as the daily price for that day and for each following work-day until the next price is reported. A work-day is each Monday through Friday, except national holidays. For any week that the Exchange does not meet to establish a price, the price for the following week shall be the last price that was established.

(b) *Cheddar cheese price.* "Cheddar cheese price" means the simple average, for the first 15 days of the month, of the daily prices per pound of cheddar cheese in 40-pound blocks. The prices used shall be those of the National Cheese Exchange (Green Bay, WI), as reported and published weekly by the Dairy Division, Agricultural Marketing Service. The average shall be computed by the Director of the Dairy Division, using the price reported each week as the daily price for that day and for each following work-day until the next price is reported. A work-day is each Monday through Friday except national holidays. For any week that the Exchange does not meet to establish a price, the price for the following week shall be the last price that was established.

(c) *Nonfat dry milk price.* "Nonfat dry milk price" means the simple average, for the first 15 days of the month, of the daily prices per pound of nonfat dry milk, which average shall be computed by the Director of the Dairy Division as follows:

(1) The prices used shall be the prices (using the midpoint of any price range as one price) of high heat, low heat and Grade A nonfat dry milk, respectively, for the Central States production area, as reported and published weekly by the Dairy Division, Agricultural Marketing Service.

(2) For each week, determine the simple average of the prices reported for the three types of nonfat dry milk. Such average shall be the daily price for the day that such prices are reported and for each preceding work-day until the day such prices were previously reported. A

work-day is each Monday through Friday except national holidays.

(3) Add the prices determined in paragraph (c)(2) of this section for the first 15 days of the month and divide by the number of days for which there is a daily price.

(d) *Edible whey price.* "Edible whey price" means the simple average, for the first 15 days of the month, of the daily prices per pound of edible whey powder (nonhygroscopic). The prices used shall be the prices (using the midpoint of any price range as one price) of edible whey powder for the Central States production area, as reported and published weekly by the Dairy Division, Agricultural Marketing Service. The average shall be computed by the Director of the Dairy Division, using the price reported each week as the daily price for that day and for each preceding work-day until the day such price was previously reported. A work-day is each Monday through Friday except national holidays.

2. Section 1096.50(b) is revised to read as follows:

§ 1096.50 Class prices.

(b) *Class II price.* A tentative Class II price shall be computed by the Director of the Dairy Division and transmitted to the market administrator on or before the 15th day of the preceding month. The tentative Class II price shall be the basic Class II formula price computed pursuant to § 1096.51a for the month plus the amount that the value computed pursuant to paragraph (b)(1) of this section exceeds the value computed pursuant to paragraph (b)(2) of this section, except that, for each month after the first month in which this paragraph is effective, the final Class II price shall be not less than the Class III price.

(1) Determine for the most recent 12-month period the simple average (rounded to the nearest cent) of the basic formula prices computed pursuant to § 1096.51 and add 10 cents; and

(2) Determine for the same 12-month period as specified in paragraph (b)(1) of this section the simple average (rounded to the nearest cent) of the basic Class II formula prices computed pursuant to § 1096.51a.

3. A new § 1096.51a is added as follows:

§ 1096.51a Basic Class II formula price.

The "basic Class II formula price" for the month shall be the basic formula price determined pursuant to § 1096.51 for the second preceding month plus or

minus the amount computed pursuant to paragraphs (a) through (d) of this section:

(a) The gross values per hundredweight of milk used to manufacture cheddar cheese and butter-nonfat dry milk shall be computed, using price data determined pursuant to § 1096.20 and yield factors in effect under the Dairy Price Support Program authorized by the Agricultural Act of 1949, as amended, for the first 15 days of the preceding month and, separately, for the first 15 days of the second preceding month as follows:

(1) The gross value of milk used to manufacture cheddar cheese shall be the sum of the following computations:

(i) Multiply the cheddar cheese price by the yield factor used under the Price Support Program for cheddar cheese;

(ii) Multiply the butter price by the yield factor used under the Price Support Program for determining the butterfat component of the whey value in the cheese price computation; and

(iii) Subtract from the edible whey price the processing cost used under the Price Support Program for edible whey and multiply any positive difference by the yield factor used under the Price Support Program for edible whey.

(2) The gross value of milk used to manufacture butter-nonfat dry milk shall be the sum of the following computations:

(i) Multiply the butter price by the yield factor used under the Price Support Program for butter; and

(ii) Multiply the nonfat dry milk price by the yield factor used under the Price Support Program for nonfat dry milk.

(b) Determine the amounts by which the gross value per hundredweight of milk used to manufacture cheddar cheese and the gross value per hundredweight of milk used to manufacture butter-nonfat dry milk for the first 15 days of the preceding month exceed or are less than the respective gross values for the first 15 days of the second preceding month.

(c) Compute weighting factors to be applied to the changes in gross values determined pursuant to paragraph (b) of this section by determining the relative proportion that the data included in each of the following subparagraphs is of the total of the data represented in paragraph (c) (1) and (2) of this section:

(1) Combine the total American cheese production for the States of Minnesota and Wisconsin, as reported by the Economics and Statistics Service of the Department for the third preceding month, and divide by the yield factor used under the Price Support Program for cheddar cheese to determine the quantity of milk used in

the production of American cheddar cheese; and

(2) Combine the total nonfat dry milk production for the States of Minnesota and Wisconsin, as reported by the Economics and Statistics Service of the Department for the third preceding month, and divide by the yield factor used under the Price Support program for nonfat dry milk to determine the quantity of milk used in the production of butter-nonfat dry milk.

(d) Compute a weighted average of the changes in gross values per hundredweight of milk determined pursuant to paragraph (b) of this section in accordance with the relative proportions of milk determined pursuant to paragraph (c) of this section.

4. Section 1096.53 is revised to read as follows:

§ 1096.53 Announcement of class prices.

The market administrator shall announce publicly on or before the fifth day of each month the Class I price for the following month, the Class III price for the preceding month and, for each month after the first month in which this section is effective, the final Class II price for the preceding month; and on or before the 15th day of each month the tentative Class II price for the following month.

PART 1097—MILK IN THE MEMPHIS, TENNESSEE MARKETING AREA

1. Section 1097.19 is added and reserved and a new § 1097.20 is added to read as follows:

§ 1097.19 [Reserved]

§ 1097.20 Product prices.

The following product prices shall be used in calculating the basic Class II formula price pursuant to § 1097.51a:

(a) *Butter price.* "Butter price" means the simple average, for the first 15 days of the month, of the daily prices per pound of Grade A (92-score) butter. The prices used shall be those of the Chicago Mercantile Exchange as reported and published weekly by the Dairy Division, Agricultural Marketing Service. The average shall be computed by the Director of the Dairy Division, using the price reported each week as the daily price for that day and for each following work-day until the next price is reported. A work-day is each Monday through Friday, except national holidays. For any week that the Exchange does not meet to establish a price, the price for the following week shall be the last price that was established.

(b) *Cheddar cheese price.* "Cheddar cheese price" means the simple average,

for the first 15 days of the month, of the daily prices per pound of cheddar cheese in 40-pound blocks. The prices used shall be those of the National Cheese Exchange (Green Bay, WI), as reported and published weekly by the Dairy Division, Agricultural Marketing Service. The average shall be computed by the Director of the Dairy Division, using the price reported each week as the daily price for that day and for each following work-day until the next price is reported. A work-day is each Monday through Friday except national holidays. For any week that the Exchange does not meet to establish a price, the price for the following week shall be the last price that was established.

(c) *Nonfat dry milk price.* "Nonfat dry milk price" means the simple average, for the first 15 days of the month, of the daily prices per pound of nonfat dry milk, which average shall be computed by the Director of the Dairy Division as follows:

(1) The prices used shall be the prices (using the midpoint of any price range as one price) of high heat, low heat and Grade A nonfat dry milk, respectively, for the Central States production area, as reported and published weekly by the Dairy Division, Agricultural Marketing Service.

(2) For each week, determine the simple average of the prices reported for the three types of nonfat dry milk. Such average shall be the daily price for the day that such prices are reported and for each preceding work-day until the day such prices were previously reported. A work-day is each Monday through Friday except national holidays.

(3) Add the prices determined in paragraph (c)(2) of this section for the first 15 days of the month and divide by the number of days for which there is a daily price.

(d) *Edible whey price.* "Edible whey price" means the simple average, for the first 15 days of the month, of the daily prices per pound of edible whey powder (nonhygroscopic). The prices used shall be the prices (using the midpoint of any price range as one price) of edible whey powder for the Central States production area, as reported and published weekly by the Dairy Division, Agricultural Marketing Service. The average shall be computed by the Director of the Dairy Division, using the price reported each week as the daily price for that day and for each preceding work-day until the day such price was previously reported. A work-day is each Monday through Friday except national holidays.

2. Section 1097.50(b) is revised to read as follows:

§ 1097.50 Class prices.

(b) *Class II price.* A tentative Class II price shall be computed by the Director of the Dairy Division and transmitted to the market administrator on or before the 15th day of the preceding month. The tentative Class II price shall be the basic Class II formula price computed pursuant to § 1097.51a for the month plus the amount that the value computed pursuant to paragraph (b)(1) of this section exceeds the value computed pursuant to paragraph (b)(2) of this section, except that, for each month after the first month in which this paragraph is effective, the final Class II price shall be not less than the Class III price.

(1) Determine for the most recent 12-month period the simple average (rounded to the nearest cent) of the basic formula prices computed pursuant to § 1097.51 and add 10 cents; and

(2) Determine for the same 12-month period as specified in paragraph (b)(1) of this section the simple average (rounded to the nearest cent) of the basic Class II formula prices computed pursuant to § 1097.51a.

3. A new § 1097.51a is added to read as follows:

§ 1097.51a Basic Class II formula price.

The "basic Class II formula price" for the month shall be the basic formula price determined pursuant to § 1097.51 for the second preceding month plus or minus the amount computed pursuant to paragraphs (a) through (d) of this section:

(a) The gross values per hundredweight of milk used to manufacture cheddar cheese and butter-nonfat dry milk shall be computed, using price data determined pursuant to § 1097.20 and yield factors in effect under the Dairy Price Support Program authorized by the Agricultural Act of 1949, as amended, for the first 15 days of the preceding month and, separately, for the first 15 days of the second preceding month as follows:

(1) The gross value of milk used to manufacture cheddar cheese shall be the sum of the following computations:

(i) Multiply the cheddar cheese price by the yield factor used under the Price Support Program for cheddar cheese;

(ii) Multiply the butter price by the yield factor used under the Price Support Program for determining the butterfat component of the whey value in the cheese price computation; and

(iii) Subtract from the edible whey price the processing cost used under the Price Support Program for edible whey and multiply any positive difference by the yield factor used under the Price Support Program for edible whey.

(2) The gross value of milk used to manufacture butter-nonfat dry milk shall be the sum of the following computations:

(i) Multiply the butter price by the yield factor used under the Price Support Program for butter; and

(ii) Multiply the nonfat dry milk price by the yield factor used under the Price Support Program for nonfat dry milk.

(b) Determine the amounts by which the gross value per hundredweight of milk used to manufacture cheddar cheese and the gross value per hundredweight of milk used to manufacture butter-nonfat dry milk for the first 15 days of the preceding month exceed or are less than the respective gross values for the first 15 days of the second preceding month.

(c) Compute weighting factors to be applied to the changes in gross values determined pursuant to paragraph (b) of this section by determining the relative proportion that the data included in each of the following subparagraphs is of the total of the data represented in paragraph (c) (1) and (2) of this section:

(1) Combine the total American cheese production for the States of Minnesota and Wisconsin, as reported by the Economics and Statistics Service of the Department for the third preceding month, and divide by the yield factor used under the Price Support Program for cheddar cheese to determine the quantity of milk used in the production of American cheddar cheese; and

(2) Combine the total nonfat dry milk production for the States of Minnesota and Wisconsin, as reported by the Economics and Statistics Service of the Department for the third preceding month, and divide by the yield factor used under the Price Support Program for nonfat dry milk to determine the quantity of milk used in the production of butter-nonfat dry milk.

(d) Compute a weighted average of the changes in gross values per hundredweight of milk determined pursuant to paragraph (b) of this section in accordance with the relative proportions of milk determined pursuant to paragraph (c) of this section.

4. Section 1097.53 is revised to read as follows:

§ 1097.53 Announcement of class prices.

The market administrator shall announce publicly on or before the fifth

day of each month the Class I price for the following month, the Class III price for the preceding month and, for each month after the first month in which this section is effective, the final Class II price for the preceding month; and on or before the 15th day of each month the tentative Class II price for the following month.

PART 1098—MILK IN THE NASHVILLE, TENNESSEE MARKETING AREA

1. Section 1098.19 is added and reserved and a new § 1098.20 is added to read as follows:

§ 1098.19 [Reserved]

§ 1098.20 Product prices.

The following product prices shall be used in calculating the basic Class II formula price pursuant to § 1098.51a:

(a) *Butter price.* "Butter price" means the simple average, for the first 15 days of the month, of the daily prices per pound of Grade A (92-score) butter. The prices used shall be those of the Chicago Mercantile Exchange as reported and published weekly by the Dairy Division, Agricultural Marketing Service. The average shall be computed by the Director of the Dairy Division, using the price reported each week as the daily price for that day and for each following work-day until the next price is reported. A work-day is each Monday through Friday, except national holidays. For any week that the Exchange does not meet to establish a price, the price for the following week shall be the last price that was established.

(b) *Cheddar cheese price.* "Cheddar cheese price" means the simple average, for the first 15 days of the month, of the daily prices per pound of cheddar cheese in 40-pound blocks. The prices used shall be those of the National Cheese Exchange (Green Bay, WI), as reported and published weekly by the Dairy Division, Agricultural Marketing Service. The average shall be computed by the Director of the Dairy Division, using the price reported each week as the daily price for that day and for each following work-day until the next price is reported. A work-day is each Monday through Friday except national holidays. For any week that the Exchange does not meet to establish a price, the price for the following week shall be the last price that was established.

(c) *Nonfat dry milk price.* "Nonfat dry milk price" means the simple average, for the first 15 days of the month, of the daily prices per pound of nonfat dry milk, which average shall be computed

by the Director of the Dairy Division as follows:

(1) The prices used shall be the prices (using the midpoint of any price range as one price) of high heat, low heat and Grade A nonfat dry milk, respectively, for the Central States production area, as reported and published weekly by the Dairy Division, Agricultural Marketing Service.

(2) For each week, determine the simple average of the prices reported for the three types of nonfat dry milk. Such average shall be the daily price for the day that such prices are reported and for each preceding work-day until the day such prices were previously reported. A work-day is each Monday through Friday except national holidays.

(3) Add the prices determined in paragraph (c)(2) of this section for the first 15 days of the month and divide by the number of days for which there is a daily price.

(d) *Edible whey price.* "Edible whey price" means the simple average, for the first 15 days of the month, of the daily prices per pound of edible whey powder (nonhygroscopic). The prices used shall be the prices (using the midpoint of any price range as one price) of edible whey powder for the Central States production area, as reported and published weekly by the Dairy Division, Agricultural Marketing Service. The average shall be computed by the Director of the Dairy Division, using the price reported each week as the daily price for that day and for each preceding work-day until the day such price was previously reported. A work-day is each Monday through Friday except national holidays.

2. Section 1098.50(b) is revised to read as follows:

§ 1098.50 Class prices.

(b) *Class II price.* A tentative Class II price shall be computed by the Director of the Dairy Division and transmitted to the market administrator on or before the 15th day of the preceding month. The tentative Class II price shall be the basic Class II formula price computed pursuant to § 1098.51a for the month plus the amount that the value computed pursuant to paragraph (b)(1) of this section exceeds the value computed pursuant to paragraph (b)(2) of this section, except that, for each month after the first month in which this paragraph is effective, the final Class II price shall be not less than the Class III price.

(1) Determine for the most recent 12-month period the simple average (rounded to the nearest cent) of the

basic formula prices computed pursuant to § 1098.51 and add 10 cents; and

(2) Determine for the same 12-month period as specified in paragraph (b)(1) of this section the simple average (rounded to the nearest cent) of the basic Class II formula prices computed pursuant to § 1098.51a.

3. A new § 1098.51a is added to read as follows:

§ 1098.51a Basic Class II formula price.

The "basic Class II formula price" for the month shall be the basic formula price determined pursuant to § 1098.51 for the second preceding month plus or minus the amount computed pursuant to paragraphs (a) through (d) of this section:

(a) The gross values per hundredweight of milk used to manufacture cheddar cheese and butter-nonfat dry milk shall be computed, using price data determined pursuant to § 1098.20 and yield factors in effect under the Dairy Price Support Program authorized by the Agricultural Act of 1949, as amended, for the first 15 days of the preceding month and, separately, for the first 15 days of the second preceding month as follows:

(1) The gross value of milk used to manufacture cheddar cheese shall be the sum of the following computations:

(i) Multiply the cheddar cheese price by the yield factor used under the Price Support Program for cheddar cheese;

(ii) Multiply the butter price by the yield factor used under the Price Support Program for determining the butterfat component of the whey value in the cheese price computation; and

(iii) Subtract from the edible whey price the processing cost used under the Price Support Program for edible whey and multiply any positive difference by the yield factor used under the Price Support Program for edible whey.

(2) The gross value of milk used to manufacture butter-nonfat dry milk shall be the sum of the following computations:

(i) Multiply the butter price by the yield factor used under the Price Support Program for butter; and

(ii) Multiply the nonfat dry milk price by the yield factor used under the Price Support Program for nonfat dry milk.

(b) Determine the amounts by which the gross value per hundredweight of milk used to manufacture cheddar cheese and the gross value per hundredweight of milk used to manufacture butter-nonfat dry milk for the first 15 days of the preceding month exceed or are less than the respective gross values for the first 15 days of the second preceding month.

(c) Compute weighting factors to be applied to the changes in gross values determined pursuant to paragraph (b) of this section by determining the relative proportion that the data included in each of the following subparagraphs is of the total of the data represented in paragraph (c) (1) and (2) of this section:

(1) Combine the total American cheese production for the States of Minnesota and Wisconsin, as reported by the Economics and Statistics Service of the Department for the third preceding month, and divide by the yield factor used under the Price Support Program for cheddar cheese to determine the quantity of milk used in the production of American cheddar cheese; and

(2) Combine the total nonfat dry milk production for the States of Minnesota and Wisconsin, as reported by the Economics and Statistics Service of the Department for the third preceding month, and divide by the yield factor used under the Price Support program for nonfat dry milk to determine the quantity of milk used in the production of butter-nonfat dry milk.

(d) Compute a weighted average of the changes in gross values per hundredweight of milk determined pursuant to paragraph (b) of this section in accordance with the relative proportions of milk determined pursuant to paragraph (c) of this section.

4. Section 1098.53 is revised to read as follows:

§ 1098.53 Announcement of class prices.

The market administrator shall announce publicly on or before the fifth day of each month the Class I price for the following month, the Class III price for the preceding month and, for each month after the first month in which this section is effective, the final Class II price for the preceding month; and on or before the 15th day of each month the tentative Class II price for the following month.

PART 1099—MILK IN THE PADUCAH, KENTUCKY MARKETING AREA

1. Section 1099.19 is added and reserved and a new § 1099.20 is added to read as follows:

§ 1099.19 [Reserved]

§ 1099.20 Product prices.

The following product prices shall be used in calculating the basic Class II formula price pursuant to § 1099.51a:

(a) *Butter price.* "Butter price" means the simple average, for the first 15 days of the month, of the daily prices per pound of Grade A (92-score) butter. The

prices used shall be those of the Chicago Mercantile Exchange as reported and published weekly by the Dairy Division, Agricultural Marketing Service. The average shall be computed by the Director of the Dairy Division, using the price reported each week as the daily price for that day and for each following work-day until the next price is reported. A work-day is each Monday through Friday, except national holidays. For any week that the Exchange does not meet to establish a price, the price for the following week shall be the last price that was established.

(b) *Cheddar cheese price.* "Cheddar cheese price" means the simple average, for the first 15 days of the month, of the daily prices per pound of cheddar cheese in 40-pound blocks. The prices used shall be those of the National Cheese Exchange (Green Bay, WI), as reported and published weekly by the Dairy Division, Agricultural Marketing Service. The average shall be computed by the Director of the Dairy Division, using the price reported each week as the daily price for that day and for each following work-day until the next price is reported. A work-day is each Monday through Friday, except national holidays. For any week that the Exchange does not meet to establish a price, the price for the following week shall be the last price that was established.

(c) *Nonfat dry milk price.* "Nonfat dry milk price" means the simple average, for the first 15 days of the month, of the daily prices per pound of nonfat dry milk, which average shall be computed by the Director of the Dairy Division as follows:

(1) The prices used shall be the prices (using the midpoint of any price range as one price) of high heat, low heat and Grade A nonfat dry milk, respectively, for the Central States production area, as reported and published weekly by the Dairy Division, Agricultural Marketing Service.

(2) For each week, determine the simple average of the prices reported for the three types of nonfat dry milk. Such average shall be the daily price for the day that such prices are reported and for each preceding work-day until the day such prices were previously reported. A work-day is each Monday through Friday except national holidays.

(3) Add the prices determined in paragraph (c)(2) of this section for the first 15 days of the month and divide by the number of days for which there is a daily price.

(d) *Edible whey price.* "Edible whey price" means the simple average, for the first 15 days of the month, of the daily

prices per pound of edible whey powder (nonhygroscopic). The prices used shall be the prices (using the midpoint of any price range as one price) of edible whey powder for the Central States production area, as reported and published weekly by the Dairy Division, Agricultural Marketing Service. The average shall be computed by the Director of the Dairy Division, using the price reported each week as the daily price for that day and for each preceding work-day until the day such price was previously reported. A work-day is each Monday through Friday, except national holidays.

2. Section 1099.50(b) is revised to read as follows:

§ 1099.50 Class prices.

(b) *Class II price.* A tentative Class II price shall be computed by the Director of the Dairy Division and transmitted to the market administrator on or before the 15th day of the preceding month. The tentative Class II price shall be the basic Class II formula price computed pursuant to § 1099.51a for the month plus the amount that the value computed pursuant to paragraph (b)(1) of this section exceeds the value computed pursuant to paragraph (b)(2) of this section, except that, for each month after the first month in which this paragraph is effective, the final Class II price shall be not less than the Class III price.

(1) Determine for the most recent 12-month period the simple average (rounded to the nearest cent) of the basic formula prices computed pursuant to § 1099.51 and add 10 cents; and

(2) Determine for the same 12-month period as specified in paragraph (b)(1) of this section the simple average (rounded to the nearest cent) of the basic Class II formula prices computed pursuant to § 1099.51a.

3. A new § 1099.51a is added to read as follows:

§ 1099.51a Basic Class II formula price.

The "basic Class II formula price" for the month shall be the basic formula price determined pursuant to § 1099.51 for the second preceding month plus or minus the amount computed pursuant to paragraphs (a) through (d) of this section:

(a) The gross values per hundredweight of milk used to manufacture cheddar cheese and butter-nonfat dry milk shall be computed, using price data determined pursuant to § 1099.20 and yield factors in effect under the Dairy Price Support Program

authorized by the Agricultural Act of 1949, as amended, for the first 15 days of the preceding month and, separately, for the first 15 days of the second preceding month as follows:

(1) The gross value of milk used to manufacture cheddar cheese shall be the sum of the following computations:

(i) Multiply the cheddar cheese price by the yield factor used under the Price Support Program for cheddar cheese;

(ii) Multiply the butter price by the yield factor used under the Price Support Program for determining the butterfat component of the whey value in the cheese price computation; and

(iii) Subtract from the edible whey price the processing cost used under the Price Support Program for edible whey and multiply any positive difference by the yield factor under the Price Support Program for edible whey.

(2) The gross value of milk used to manufacture butter-nonfat dry milk shall be the sum of the following computations:

(i) Multiply the butter price by the yield factor used under the Price Support Program for butter; and

(ii) Multiply the nonfat dry milk price by the yield factor used under the Price Support Program for nonfat dry milk.

(b) Determine the amounts by which the gross value per hundredweight of milk used to manufacture cheddar cheese and the gross value per hundredweight of milk used to manufacture butter-nonfat dry milk for the first 15 days of the preceding month exceed or are less than the respective gross values for the first 15 days of the second preceding month.

(c) Compute weighting factors to be applied to the changes in gross values determined pursuant to paragraph (b) of this section by determining the relative proportion that the data included in each of the following subparagraphs is of the total of the data represented in paragraph (c) (1) and (2) of this section:

(1) Combine the total American cheese production for the States of Minnesota and Wisconsin, as reported by the Economics and Statistics Service of the Department for the third preceding month, and divide by the yield factor used under the Price Support Program for cheddar cheese to determine the quantity of milk used in the production of American cheddar cheese; and

(2) Combine the total nonfat dry milk production for the States of Minnesota and Wisconsin, as reported by the Economics and Statistics Service of the Department for the third preceding month, and divide by the yield factor used under the Price Support Program

for nonfat dry milk to determine the quantity of milk used in the production of butter-nonfat dry milk.

(d) Compute a weighted average of the changes in gross values per hundredweight of milk determined pursuant to paragraph (b) of this section in accordance with the relative proportions of milk determined pursuant to paragraph (c) of this section.

4. Section 1099.53 is revised to read as follows:

§ 1099.53 Announcement of class prices.

The market administrator shall announce publicly on or before the fifth day of each month the Class I price for the following month, the Class III price for the preceding month and, for each month after the first month in which this section is effective, the final Class II price for the preceding month; and on or before the 15th day of each month the tentative Class II price for the following month.

PART 1102—MILK IN THE FORT SMITH, ARKANSAS MARKETING AREA

1. Section 1102.19 is added and reserved and a new § 1102.20 is added to read as follows:

§ 1102.19 [Reserved]

§ 1102.20 Product prices.

The following product prices shall be used in calculating the basic Class II formula price pursuant to § 1102.51a:

(a) *Butter price.* "Butter price" means the simple average, for the first 15 days of the month, of the daily prices per pound of Grade A (92-score) butter. The prices used shall be those of the Chicago Mercantile Exchange as reported and published weekly by the Dairy Division, Agricultural Marketing Service. The average shall be computed by the Director of the Dairy Division, using the price reported each week as the daily price for that day and for each following work-day until the next price is reported. A work-day is each Monday through Friday, except national holidays. For any week that the Exchange does not meet to establish a price, the price for the following week shall be the last price that was established.

(b) *Cheddar cheese price.* "Cheddar cheese price" means the simple average, for the first 15 days of the month, of the daily prices per pound of cheddar cheese in 40-pound blocks. The prices used shall be those of the National Cheese Exchange (Green Bay, WI), as reported and published weekly by the Dairy Division, Agricultural Marketing Service. The average shall be computed

by the Director of the Dairy Division, using the price reported each week as the daily price for that day and for each following work-day until the next price is reported. A work-day is each Monday through Friday except national holidays. For any week that the Exchange does not meet to establish a price, the price for the following week shall be the last price that was established.

(c) *Nonfat dry milk price.* "Nonfat dry milk price" means the simple average, for the first 15 days of the month, of the daily prices per pound of nonfat dry milk, which average shall be computed by the Director of the Dairy Division as follows:

(1) The prices used shall be the prices (using the midpoint of any price range as one price) of high heat, low heat, and Grade A nonfat dry milk, respectively, for the Central States production area, as reported and published weekly by the Dairy Division, Agricultural Marketing Service.

(2) For each week, determine the simple average of the prices reported for the three types of nonfat dry milk. Such average shall be the daily price for the day that such prices are reported and for each preceding work-day until the day such prices were previously reported. A work-day is each Monday through Friday except national holidays.

(3) Add the prices determined in paragraph (c)(2) of this section for the first 15 days of the month and divide by the number of days for which there is a daily price.

(d) *Edible whey price.* "Edible whey price" means the simple average, for the first 15 days of the month, of the daily prices per pound of edible whey powder (nonhygroscopic). The prices used shall be the prices (using the midpoint of any price range as one price) of edible whey powder for the Central States production area, as reported and published weekly by the Dairy Division, Agricultural Marketing Service. The average shall be computed by the Director of the Dairy Division, using the price reported each week as the daily price for that day and for each preceding work-day until the day such price was previously reported. A work-day is each Monday through Friday except national holidays.

2. Section 1102.50(b) is revised to read as follows:

§ 1102.50 Class prices.

(b) *Class II price.* A tentative Class II price shall be computed by the Director of the Dairy Division and transmitted to the market administrator on or before the 15th day of the preceding month. The

tentative Class II price shall be the basic Class II formula price computed pursuant to § 1102.51a for the month plus the amount that the value computed pursuant to paragraph (b)(1) of this section exceeds the value computed pursuant to paragraph (b)(2) of this section, except that, for each month after the first month in which this paragraph is effective, the final Class II price shall be not less than the Class III price.

(1) Determine for the most recent 12-month period the simple average (rounded to the nearest cent) of the basic formula prices computed pursuant to § 1102.51 and add 10 cents; and

(2) Determine for the same 12-month period as specified in paragraph (b)(1) of this section the simple average (rounded to the nearest cent) of the basic Class II formula prices computed pursuant to § 1102.51a.

3. A new § 1102.51a is added to read as follows:

§ 1102.51a Basic Class II formula price.

The "basic Class II formula price" for the month shall be the basic formula price determined pursuant to § 1102.51 for the second preceding month plus or minus the amount computed pursuant to paragraphs (a) through (d) of this section:

(a) The gross values per hundredweight of milk used to manufacture cheddar cheese and butter-nonfat dry milk shall be computed, using price data determined pursuant to § 1102.20 and yield factors in effect under the Dairy Price Support Program authorized by the Agricultural Act of 1949, as amended, for the first 15 days of the preceding month and, separately, for the first 15 days of the second preceding month as follows:

(1) The gross value of milk used to manufacture cheddar cheese shall be the sum of the following computations:

(i) Multiply the cheddar cheese price by the yield factor used under the Price Support Program for cheddar cheese;

(ii) Multiply the butter price by the yield factor used under the Price Support Program for determining the butterfat component of the whey value in the cheese price computation; and

(iii) Subtract from the edible whey price the processing cost used under the Price Support Program for edible whey and multiply any positive difference by the yield factor used under the Price Support Program for edible whey.

(2) The gross value of milk used to manufacture butter-nonfat dry milk shall

be the sum of the following computations:

(i) Multiply the butter price by the yield factor used under the Price Support Program for butter; and

(ii) Multiply the nonfat dry milk price by the yield factor used under the Price Support Program for nonfat dry milk.

(b) Determine the amounts by which the gross value per hundredweight of milk used to manufacture cheddar cheese and the gross value per hundredweight of milk used to manufacture butter-nonfat dry milk for the first 15 days of the preceding month exceed or are less than the respective gross values for the first 15 days of the second preceding month.

(c) Compute weighting factors to be applied to the changes in gross values determined pursuant to paragraph (b) of this section by determining the relative proportion that the data included in each of the following subparagraphs is of the total of the data represented in paragraph (c) (1) and (2) of this section:

(1) Combine the total American cheese production for the States of Minnesota and Wisconsin, as reported by the Economics and Statistics Service of the Department for the third preceding month, and divide by the yield factor used under the Price Support Program for cheddar cheese to determine the quantity of milk used in the production of American cheddar cheese; and

(2) Combine the total nonfat dry milk production for the States of Minnesota and Wisconsin, as reported by the Economics and Statistics Service of the Department for the third preceding month, and divide by the yield factor used under the Price Support Program for nonfat dry milk to determine the quantity of milk used in the production of butter-nonfat dry milk.

(d) Compute a weighted average of the changes in gross values per hundredweight of milk determined pursuant to paragraph (b) of this section in accordance with the relative proportions of milk determined pursuant to paragraph (c) of this section.

4. Section 1102.53 is revised to read as follows:

§ 1102.53 Announcement of class prices.

The market administrator shall announce publicly on or before the fifth day of each month the Class I price for the following month, the Class III price for the preceding month and, for each month after the first month in which this section is effective, the final Class II price for the preceding month; and on or before the 15th day of each month the

tentative Class II price for the following month.

PART 1104—MILK IN THE RED RIVER VALLEY MARKETING AREA

1. Section 1104.53 is revised to read as follows:

§ 1104.53 Announcement of class prices.

The market administrator shall announce publicly on or before the fifth day of each month the Class I price for the following month, the Class III price for the preceding month and, for each month after the first month in which this section is effective, the final Class II price for the preceding month; and on or before the 15th day of each month the tentative Class II price for the following month.

PART 1106—MILK IN THE OKLAHOMA METROPOLITAN MARKETING AREA

1. A new § 1106.20 is added to read as follows:

§ 1106.20 Product prices.

The following product prices shall be used in calculating the basic Class II formula price pursuant to § 1106.51a:

(a) *Butter price.* "Butter price" means the simple average, for the first 15 days of the month, of the daily prices per pound of Grade A (92-score) butter. The prices used shall be those of the Chicago Mercantile Exchange as reported and published weekly by the Dairy Division, Agricultural Marketing Service. The average shall be computed by the Director of the Dairy Division, using the price reported each week as the daily price for that day and for each following work-day until the next price is reported. A work-day is each Monday through Friday, except national holidays. For any week that the Exchange does not meet to establish a price, the price for the following week shall be the last price that was established.

(b) *Cheddar cheese price.* "Cheddar cheese price" means the simple average, for the first 15 days of the month, of the daily prices per pound of cheddar cheese in 40-pound blocks. The prices used shall be those of the National Cheese Exchange (Green Bay, WI), as reported and published weekly by the Dairy Division, Agricultural Marketing Service. The average shall be computed by the Director of the Dairy Division, using the price reported each week as the daily price for that day and for each following work-day until the next price is reported. A work-day is each Monday through Friday except national holidays. For any week that the Exchange does not meet to establish a price, the price

for the following week shall be the last price that was established.

(c) *Nonfat dry milk price.* "Nonfat dry milk price" means the simple average, for the first 15 days of the month, of the daily prices per pound of nonfat dry milk, which average shall be computed by the Director of the Dairy Division as follows:

(1) The prices used shall be the prices (using the midpoint of any price range as one price) of high heat, low heat and Grade A nonfat dry milk, respectively, for the Central States production area, as reported and published weekly by the Dairy Division, Agricultural Marketing Service.

(2) For each week, determine the simple average of the prices reported for the three types of nonfat dry milk. Such average shall be the daily price for the day that such prices are reported and for each preceding work-day until the day such prices were previously reported. A work-day is each Monday through Friday except national holidays.

(3) Add the prices determined in paragraph (c)(2) of this section for the first 15 days of the month and divide by the number of days for which there is a daily price.

(d) *Edible whey price.* "Edible whey price" means the simple average, for the first 15 days of the month, of the daily prices per pound of edible whey powder (nonhygroscopic). The prices used shall be the prices (using the midpoint of any price range as one price) of edible whey powder for the Central States production area, as reported and published weekly by the Dairy Division, Agricultural Marketing Service. The average shall be computed by the Director of the Dairy Division, using the price reported each week as the daily price for that day and for each preceding work-day until the day such price was previously reported. A work-day is each Monday through Friday except national holidays.

2. Section 1106.50(b) is revised to read as follows:

§ 1106.50 Class prices.

(b) *Class II price.* A tentative Class II price shall be computed by the Director of the Dairy Division and transmitted to the market administrator on or before the 15th day of the preceding month. The tentative Class II price shall be the basic Class II formula price computed pursuant to § 1106.51a for the month plus the amount that the value computed pursuant to paragraph (b)(1) of this section exceeds the value computed pursuant to paragraph (b)(2) of this section, except that, for each month

after the first month in which this paragraph is effective, the final Class II price shall be not less than the Class III price.

(1) Determine for the most recent 12-month period the simple average (rounded to the nearest cent) of the basic formula prices computed pursuant to § 1106.51 and add 10 cents; and

(2) Determine for the same 12-month period as specified in paragraph (b)(1) of this section the simple average (rounded to the nearest cent) of the basic Class II formula prices computed pursuant to § 1106.51a.

3. A new § 1106.51a is added to read as follows:

§ 1106.51a Basic Class II formula price.

The "basic Class II formula price" for the month shall be the basic formula price determined pursuant to § 1106.51 for the second preceding month plus or minus the amount computed pursuant to paragraphs (a) through (d) of this section:

(a) The gross values per hundredweight of milk used to manufacture cheddar cheese and butter-nonfat dry milk shall be computed, using price data determined pursuant to § 1106.20 and yield factors in effect under the Dairy Price Support Program authorized by the Agricultural Act of 1949, as amended, for the first 15 days of the preceding month and, separately, for the first 15 days of the second preceding month as follows:

(1) The gross value of milk used to manufacture cheddar cheese shall be the sum of the following computations:

(i) Multiply the cheddar cheese price by the yield factor used under the Price Support Program for cheddar cheese;

(ii) Multiply the butter price by the yield factor used under the Price Support Program for determining the butterfat component of the whey value in the cheese price computation; and

(iii) Subtract from the edible whey price the processing cost used under the Price Support Program for edible whey and multiply any positive difference by the yield factor used under the Price Support Program for edible whey.

(2) The gross value of milk used to manufacture butter-nonfat dry milk shall be the sum of the following computations:

(i) Multiply the butter price by the yield factor used under the Price Support Program for butter; and

(ii) Multiply the nonfat dry milk price by the yield factor used under the Price Support Program for nonfat dry milk.

(b) Determine the amounts by which the gross value per hundredweight of milk used to manufacture cheddar

cheese and the gross value per hundredweight of milk used to manufacture butter-nonfat dry milk for the first 15 days of the preceding month exceed or are less than the respective gross values for the first 15 days of the second preceding month.

(c) Compute weighting factors to be applied to the changes in gross values determined pursuant to paragraph (b) of this section by determining the relative proportion that the data included in each of the following subparagraphs is of the total of the data represented in paragraph (c) (1) and (2) of this section:

(1) Combine the total American cheese production for the States of Minnesota and Wisconsin, as reported by the Economics and Statistics Service of the Department for the third preceding month, and divide by the yield factor used under the Price Support Program for cheddar cheese to determine the quantity of milk used in the production of American cheddar cheese; and

(2) Combine the total nonfat dry milk production for the States of Minnesota and Wisconsin, as reported by the Economics and Statistics Service of the Department for the third preceding month, and divide by the yield factor used under the Price Support Program for nonfat dry milk to determine the quantity of milk used in the production of butter-nonfat dry milk.

(d) Compute a weighted average of the changes in gross values per hundredweight of milk determined pursuant to paragraph (b) of this section in accordance with relative proportions of milk determined pursuant to paragraph (c) of this section.

4. Section 1106.53 is revised to read as follows:

§ 1106.53 Announcement of class prices.

The market administrator shall announce publicly on or before the fifth day of each month the Class I price for the following month, the Class III price for the preceding month and, for each month after the first month in which this section is effective, the final Class II price for the preceding month; and on or before the 15th day of each month the tentative Class II price for the following month.

PART 1108—MILK IN THE CENTRAL ARKANSAS MARKETING AREA

1. Section 1108.19 is added and reserved and a new § 1108.20 is added to read as follows:

§ 1108.19 [Reserved]

§ 1108.20 Product prices.

The following product prices shall be used in calculating the basic Class II formula price pursuant to § 1108.51a:

(a) *Butter price.* "Butter price" means the simple average, for the first 15 days of the month, of the daily prices per pound of Grade A (92-score) butter. The prices used shall be those of the Chicago Mercantile Exchange as reported and published weekly by the Dairy Division, Agricultural Marketing Service. The average shall be computed by the Director of the Dairy Division, using the price reported each week as the daily price for that day and for each following work-day until the next price is reported. A work-day is each Monday through Friday, except national holidays. For any week that the Exchange does not meet to establish a price, the price for the following week shall be the last price that was established.

(b) *Cheddar cheese price.* "Cheddar cheese price" means the simple average, for the first 15 days of the month, of the daily prices per pound of cheddar cheese in 40-pound blocks. The prices used shall be those of the National Cheese Exchange (Green Bay, WI), as reported and published weekly by the Dairy Division, Agricultural Marketing Service. The average shall be computed by the Director of the Dairy Division, using the price reported each week as the daily price for that day and for each following work-day until the next price is reported. A work-day is each Monday through Friday except national holidays. For any week that the Exchange does not meet to establish a price, the price for the following week shall be the last price that was established.

(c) *Nonfat dry milk price.* "Nonfat dry milk price" means the simple average, for the first 15 days of the month, of the daily prices per pound of nonfat dry milk, which average shall be computed by the Director of the Dairy Division as follows:

(1) The prices used shall be the prices (using the midpoint of any price range as one price) of high heat, low heat and Grade A nonfat dry milk, respectively, for the Central States production area, as reported and published weekly by the Dairy Division, Agricultural Marketing Service.

(2) For each week, determine the simple average of the prices reported for the three types of nonfat dry milk. Such average shall be the daily price for the day that such prices are reported and for each preceding work-day until the day such prices were previously reported. A

work-day is each Monday through Friday except national holidays.

(3) Add the prices determined in paragraph (c)(2) of the section for the first 15 days of the month and divide by the number of days for which there is a daily price.

(d) *Edible whey price.* "Edible whey price" means the simple average, for the first 15 days of the month, of the daily prices per pound of edible whey powder (nonhygroscopic). The prices used shall be the prices (using the midpoint of any price range as one price) of edible whey powder for the Central States production area, as reported and published weekly by the Dairy Division, Agricultural Marketing Service. The average shall be computed by the Director of the Dairy Division, using the price reported each week as the daily price for that day and for each preceding work-day until the day such price was previously reported. A work-day is each Monday through Friday except national holidays.

2. Section 1108.50(b) is revised to read as follows:

§ 1108.50 Class prices.

(b) *Class II price.* A tentative Class II price shall be computed by the Director of the Dairy Division and transmitted to the market administrator on or before the 15th day of the preceding month. The tentative Class II price shall be the basic Class II formula price computed pursuant to § 1108.51a for the month plus the amount that the value computed pursuant to paragraph (b)(1) of this section exceeds the value computed pursuant to paragraph (b)(2) of this section, except that, for each month after the first month in which this paragraph is effective, the final Class II price shall be not less than the Class III price.

(1) Determine for the most recent 12-month period the simple average (rounded to the nearest cent) of the basic formula prices computed pursuant to § 1108.51 and add 10 cents; and

(2) Determine for the same 12-month period as specified in paragraph (b)(1) of this section the simple average (rounded to the nearest cent) of the basic Class II formula prices computed pursuant to § 1108.51a.

3. A new § 1108.51a is added to read as follows:

§ 1108.51a Basic Class II formula price.

The "basic Class II formula price" for the month shall be the basic formula price determined pursuant to § 1108.51 for the second preceding month plus or

minus the amount computed pursuant to paragraphs (a) through (d) of this section:

(a) The gross values per hundredweight of milk used to manufacture cheddar cheese and butter-nonfat dry milk shall be computed, using price data determined pursuant to § 1108.20 and yield factors in effect under the Dairy Price Support Program authorized by the Agricultural Act of 1949, as amended, for the first 15 days of the preceding month and, separately, for the first 15 days of the second preceding month as follows:

(1) The gross value of milk used to manufacture cheddar cheese shall be the sum of the following computations:

(i) Multiply the cheddar cheese price by the yield factor used under the Price Support Program for cheddar cheese;

(ii) Multiply the butter price by the yield factor used under the Price Support Program for determining the butterfat component of the whey value in the cheese price computation; and

(iii) Subtract from the edible whey price the processing cost used under the Price Support Program for edible whey and multiply any positive difference by the yield factor used under the Price Support Program for edible whey.

(2) The gross value of milk used to manufacture butter-nonfat dry milk shall be the sum of the following computations:

(i) Multiply the butter price by the yield factor used under the Price Support Program for butter; and

(ii) Multiply the nonfat dry milk price by the yield factor used under the Price Support Program for nonfat dry milk.

(b) Determine the amounts by which the gross value per hundredweight of milk used to manufacture cheddar cheese and the gross value per hundredweight of milk used to manufacture butter-nonfat dry milk for the first 15 days of the preceding month exceed or are less than the respective gross values for the first 15 days of the second preceding month.

(c) Compute weighting factors to be applied to the changes in gross values determined pursuant to paragraph (b) of this section by determining the relative proportion that the data included in each of the following subparagraphs is of the total of the data represented in paragraph (c) (1) and (2) of this section:

(1) Combine the total American cheese production for the States of Minnesota and Wisconsin, as reported by the Economics and Statistics Service of the Department for the third preceding month, and divide by the yield factor used under the Price Support Program for cheddar cheese to determine the quantity of milk used in

the production of American cheddar cheese; and

(2) Combine the total nonfat dry milk production for the States of Minnesota and Wisconsin, as reported by the Economics and Statistics Service of the Department for the third preceding month, and divide by the yield factor used under the Price Support Program for nonfat dry milk to determine the quantity of milk used in the production of butter-nonfat dry milk.

(d) Compute a weighted average of the changes in gross values per hundredweight of milk determined pursuant to paragraph (b) of this section in accordance with the relative proportions of milk determined pursuant to paragraph (c) of this section.

4. Section 1108.53 is revised to read as follows:

§ 1108.53 Announcement of class prices.

The market administrator shall announce publicly on or before the fifth day of each month the Class I price for the following month, the Class III price for the preceding month and, for each month after the first month in which this section is effective, the final Class II price for the preceding month; and on or before the 15th day of each month the tentative Class II price for the following month.

PART 1120—MILK IN THE LUBBOCK-PLAINVIEW, TEXAS MARKETING AREA

1. A new § 1120.20 is added to read as follows:

§ 1120.20 Product prices.

The following product prices shall be used in calculating the basic Class II formula price pursuant to § 1120.51a:

(a) *Butter price.* "Butter price" means the simple average, for the first 15 days of the month, of the daily prices per pound of Grade A (92-score) butter. The prices used shall be those of the Chicago Mercantile Exchange as reported and published weekly by the Dairy Division, Agricultural Marketing Service. The average shall be computed by the Director of the Dairy Division, using the price reported each week as the daily price for that day and for each following work-day until the next price is reported. A work-day is each Monday through Friday, except national holidays. For any week that the Exchange does not meet to establish a price, the price for the following week shall be the last price that was established.

(b) *Cheddar cheese price.* "Cheddar cheese price" means the simple average,

for the first 15 days of the month, of the daily prices per pound of cheddar cheese in 40-pound blocks. The prices used shall be those of the National Cheese Exchange (Green Bay, WI), as reported and published weekly by the Dairy Division, Agricultural Marketing Service. The average shall be computed by the Director of the Dairy Division, using the price reported each week as the daily price for that day and for each following work-day until the next price is reported. A work-day is each Monday through Friday except national holidays. For any week that the Exchange does not meet to establish a price, the price for the following week shall be the last price that was established.

(c) *Nonfat dry milk price.* "Nonfat dry milk price" means the simple average, for the first 15 days of the month, of the daily prices per pound of nonfat dry milk, which average shall be computed by the Director of the Dairy Division as follows:

(1) The prices used shall be the prices (using the midpoint of any price range as one price) of high heat, low heat and Grade A nonfat dry milk, respectively, for the Central States production area, as reported and published weekly by the Dairy Division, Agricultural Marketing Service.

(2) For each week, determine the simple average of the prices reported for the three types of nonfat dry milk. Such average shall be the daily price for the day that such prices are reported and for each preceding work-day until the day such prices were previously reported. A work-day is each Monday through Friday except national holidays.

(3) Add the prices determined in paragraph (c)(2) of this section for the first 15 days of the month and divide by the number of days for which there is a daily price.

(d) *Edible whey price.* "Edible whey price" means the simple average, for the first 15 days of the month, of the daily prices per pound of edible whey powder (nonhygroscopic). The prices used shall be the prices (using the midpoint of any price range as one price) of edible whey powder for the Central States production area, as reported and published weekly by the Dairy Division, Agricultural Marketing Service. The average shall be computed by the Director of the Dairy Division, using the price reported each week as the daily price for that day and for each preceding work-day until the day such price was previously reported. A work-day is each Monday through Friday except national holidays.

2. Section 1120.50(b) is revised to read as follows:

§ 1120.50 Class prices.

(b) *Class II price.* A tentative Class II price shall be computed by the Director of the Dairy Division and transmitted to the market administrator on or before the 15th day of the preceding month. The tentative Class II price shall be the basic Class II formula price computed pursuant to § 1120.51a for the month plus the amount that the value computed pursuant to paragraph (b)(1) of this section exceeds the value computed pursuant to paragraph (b)(2) of this section, except that, for each month after the first month in which this paragraph is effective, the final Class II price shall be not less than the Class III price.

(1) Determine for the most recent 12-month period the simple average (rounded to the nearest cent) of the basic formula prices computed pursuant to § 1120.51 and add 10 cents; and

(2) Determine for the same 12-month period as specified in paragraph (b)(1) of this section the simple average (rounded to the nearest cent) of the basic Class II formula prices computed pursuant to § 1120.51a.

3. A new § 1120.51a is added to read as follows:

§ 1120.51a Basic Class II formula price.

The "basic Class II formula price" for the month shall be the basic formula price determined pursuant to § 1120.51 for the second preceding month plus or minus the amount computed pursuant to paragraphs (a) through (d) of this section:

(a) The gross values per hundredweight of milk used to manufacture cheddar cheese and butter-nonfat dry milk shall be computed, using price data determined pursuant to § 1120.20 and yield factors in effect under the Dairy Price Support Program authorized by the Agricultural Act of 1949, as amended, for the first 15 days of the preceding month and, separately, for the first 15 days of the second preceding month as follows:

(1) The gross value of milk used to manufacture cheddar cheese shall be the sum of the following computations:

(i) Multiply the cheddar cheese price by the yield factor used under the Price Support Program for cheddar cheese;

(ii) Multiply the butter price by the yield factor used under the Price Support Program for determining the butterfat component of the whey value in the cheese price computation; and

(iii) Subtract from the edible whey price the processing cost used under the Price Support Program for edible whey and multiply any positive difference by

the yield factor used under the Price Support Program for edible whey.

(2) The gross value of milk used to manufacture butter-nonfat dry milk shall be the sum of the following computations:

(i) Multiply the butter price by the yield factor used under the Price Support Program for butter; and

(ii) Multiply the nonfat dry milk price by the yield factor used under the Price Support Program for nonfat dry milk.

(b) Determine the amounts by which the gross value per hundredweight of milk used to manufacture cheddar cheese and the gross value per hundredweight of milk used to manufacture butter-nonfat dry milk for the first 15 days of the preceding month exceed or are less than the respective gross values for the first 15 days of the second preceding month.

(c) Compute weighting factors to be applied to the changes in gross values determined pursuant to paragraph (b) of this section by determining the relative proportion that the data included in each of the following subparagraphs is of the total of the data represented in paragraph (c) (1) and (2) of this section:

(1) Combine the total American cheese production for the States of Minnesota and Wisconsin, as reported by the Economics and Statistics Service of the Department for the third preceding month, and divide by the yield factor used under the Price Support Program for cheddar cheese to determine the quantity of milk used in the production of American cheddar cheese; and

(2) Combine the total nonfat dry milk production for the States of Minnesota and Wisconsin, as reported by the Economics and Statistics Service of the Department for the third preceding month, and divide by the yield factor used under the Price Support Program for nonfat dry milk to determine the quantity of milk used in the production of butter-nonfat dry milk.

(d) Compute a weighted average of the changes in gross values per hundredweight of milk determined pursuant to paragraph (b) of this section in accordance with the relative proportions of milk determined pursuant to paragraph (c) of this section.

4. Section 1120.53 is revised to read as follows:

§ 1120.53 Announcement of class prices.

The market administrator shall announce publicly on or before the fifth day of each month the Class I price for the following months, the Class III price for the preceding month and, for each month after the first month in which this

section is effective, the final Class II price for the preceding month; and on or before the 15th day of each month the tentative Class II price for the following month.

PART 1126—MILK IN THE TEXAS MARKETING AREA

1. A new § 1126.20 is added to read as follows:

§ 1126.20 Product prices.

The following product prices shall be used in calculating the basic Class II formula price pursuant to § 1126.51a:

(a) *Butter price.* "Butter price" means the simple average, for the first 15 days of the month, of the daily prices per pound of Grade A (92-score) butter. The prices used shall be those of the Chicago Mercantile Exchange as reported and published weekly by the Dairy Division, Agricultural Marketing Service. The average shall be computed by the Director of the Dairy Division, using the price reported each week as the daily price for that day and for each following work-day until the next price is reported. A work-day is each Monday through Friday, except national holidays. For any week that the Exchange does not meet to establish a price, the price for the following week shall be the last price that was established.

(b) *Cheddar cheese price.* "Cheddar cheese price" means the simple average, for the first 15 days of the month, of the daily prices per pound of cheddar cheese in 40-pound blocks. The prices used shall be those of the National Cheese Exchange (Green Bay, WI), as reported and published weekly by the Dairy Division, Agricultural Marketing Service. The average shall be computed by the Director of the Dairy Division, using the price reported each week as the daily price for that day and for each following work-day until the next price is reported. A work-day is each Monday through Friday except national holidays. For any week that the Exchange does not meet to establish a price, the price for the following week shall be the last price that was established.

(c) *Nonfat dry milk price.* "Nonfat dry milk price" means the simple average, for the first 15 days of the month, of the daily prices per pound of nonfat dry milk, which average shall be computed by the Director of the Dairy Division as follows:

(1) The prices used shall be the prices (using the midpoint of any price range as one price) of high heat, low heat and Grade A nonfat dry milk, respectively, for the Central States production area, as reported and published weekly by the

Dairy Division, Agricultural Marketing Service.

(2) For each week, determine the simple average of the prices reported for the three types of nonfat dry milk. Such average shall be the daily price for the day that such prices are reported and for each preceding work-day until the day such prices were previously reported. A work-day is each Monday through Friday except national holidays.

(3) Add the prices determined in paragraph (c)(2) of this section for the first 15 days of the month and divide by the number of days for which there is a daily price.

(d) *Edible whey price.* "Edible whey price" means the simple average, for the first 15 days of the month, of the daily prices per pound of edible whey powder (nonhygroscopic). The prices used shall be the prices (using the midpoint of any price range as one price) of edible whey powder for the Central States production area, as reported and published weekly by the Dairy Division, Agricultural Marketing Service. The average shall be computed by the Director of the Dairy Division, using the price reported each week as the daily price for that day and for each preceding work-day until the day such price was previously reported. A work-day is each Monday through Friday except national holidays.

2. Section 1126.50(b) is revised to read as follows:

§ 1126.50 Class prices.

(b) *Class II price.* A tentative Class II price shall be computed by the Director of the Dairy Division and transmitted to the market administrator on or before the 15th day of the preceding month. The tentative Class II price shall be the basic Class II formula price computed pursuant to § 1126.51a for the month plus the amount that the value computed pursuant to paragraph (b)(1) of this section exceeds the value computed pursuant to paragraph (b)(2) of this section, except that, for each month after the first month in which this paragraph is effective, the final Class II price shall be not less than the Class III price.

(1) Determine for the most recent 12-month period the simple average (rounded to the nearest cent) of the basic formula prices computed pursuant to § 1126.51 and add 10 cents; and

(2) Determine for the same 12-month period as specified in paragraph (b)(1) of this section the simple average (rounded to the nearest cent) of the basic Class II

formula prices computed pursuant to § 1126.51a.

3. A new § 1126.51a is added to read as follows:

§ 1126.51a Basic Class II formula price.

The "basic Class II formula price" for the month shall be the basic formula price determined pursuant to § 1126.51 for the second preceding month plus or minus the amount computed pursuant to paragraphs (a) through (d) of this section:

(a) The gross values per hundredweight of milk used to manufacture cheddar cheese and butter-nonfat dry milk shall be computed, using price data determined pursuant to § 1126.20 and yield factors in effect under the Dairy Price Support Program authorized by the Agricultural Act of 1949, as amended, for the first 15 days of the preceding month and, separately, for the first 15 days of the second preceding month as follows:

(1) The gross value of milk used to manufacture cheddar cheese shall be the sum of the following computations:

(i) Multiply the cheddar cheese price by the yield factor used under the Price Support Program for cheddar cheese;

(ii) Multiply the butter price by the yield factor used under the Price Support Program for determining the butterfat component of the whey value in the cheese price computation; and

(iii) Subtract from the edible whey price the processing cost used under the Price Support Program for edible whey and multiply any positive difference by the yield factor under the Price Support Program for edible whey.

(2) The gross value of milk used to manufacture butter-nonfat dry milk shall be the sum of the following computations:

(i) Multiply the butter price by the yield factor used under the Price Support Program for butter; and

(ii) Multiply the nonfat dry milk price by the yield factor used under the Price Support Program for nonfat dry milk.

(b) Determine the amounts by which the gross value per hundredweight of milk used to manufacture cheddar cheese and the gross value per hundredweight of milk used to manufacture butter-nonfat dry milk for the first 15 days of the preceding month exceed or are less than the respective gross values for the first 15 days of the second preceding month.

(c) Compute weighting factors to be applied to the changes in gross values determined pursuant to paragraph (b) of this section by determining the relative proportion that the data included in

each of the following subparagraphs is of the total of the data represented in paragraph (c) (1) and (2) of this section:

(1) Combine the total American cheese production for the States of Minnesota and Wisconsin, as reported by the Economics and Statistics Service of the Department for the third preceding month, and divide by the yield factor used under the Price Support Program for cheddar cheese to determine the quantity of milk used in the production of American cheddar cheese; and

(2) Combine the total nonfat dry milk production for the States of Minnesota and Wisconsin, as reported by the Economics and Statistics Service of the Department for the third preceding month, and divide by the yield factor used under the Price Support Program for nonfat dry milk to determine the quantity of milk used in the production of butter-nonfat dry milk.

(d) Compute a weighted average of the changes in gross values per hundredweight of milk determined pursuant to paragraph (b) of this section in accordance with the relative proportions of milk determined pursuant to paragraph (c) of this section.

4. Section 1126.53 is revised to read as follows:

§ 1126.53 Announcement of class prices.

The market administrator shall announce publicly on or before the fifth day of each month the Class I price for the following month, the Class III price for the preceding month and, for each month after the first month in which this section is effective, the final Class II price for the preceding month; and on or before the 15th day of each month the tentative Class II price for the following month.

PART 1131—MILK IN THE CENTRAL ARIZONA MARKETING AREA

1. Section 1131.19 is added and reserved and a new § 1131.20 is added to read as follows:

§ 1131.19 [Reserved]

§ 1131.20 Product prices.

The following product prices shall be used in calculating the basic Class II formula price pursuant to § 1131.51a:

(a) *Butter price.* "Butter price" means the simple average, for the first 15 days of the month, of the daily prices per pound of Grade A (92-score) butter. The prices used shall be those of the Chicago Mercantile Exchange as reported and published weekly by the Dairy Division, Agricultural Marketing Service. The average shall be computed by the Director of the Dairy Division, using the

price reported each week as the daily price for that day and for each following work-day until the next price is reported. A work-day is each Monday through Friday, except national holidays. For any week that the Exchange does not meet to establish a price, the price for the following week shall be the last price that was established.

(b) *Cheddar cheese price.* "Cheddar cheese price" means the simple average, for the first 15 days of the month, of the daily prices per pound of cheddar cheese in 40-pound blocks. The prices used shall be those of the National Cheese Exchange (Green Bay, WI), as reported and published weekly by the Dairy Division, Agricultural Marketing Service. The average shall be computed by the Director of the Dairy Division, using the price reported each week as the daily price for that day and for each following work-day until the next price is reported. A work-day is each Monday through Friday, except national holidays. For any week that the Exchange does not meet to establish a price, the price for the following week shall be the last price that was established.

(c) *Nonfat dry milk price.* "Nonfat dry milk price" means the simple average, for the first 15 days of the month, of the daily prices per pound of nonfat dry milk, which average shall be computed by the Director of the Dairy Division as follows:

(1) The prices used shall be the prices (using the midpoint of any price range as one price) of high heat, low heat and Grade A nonfat dry milk, respectively, for the Central States production area, as reported and published weekly by the Dairy Division, Agricultural Marketing Service.

(2) For each week, determine the simple average of the prices reported for the three types of nonfat dry milk. Such average shall be the daily price for the day that such prices are reported and for each preceding work-day until the day such prices were previously reported. A work-day is each Monday through Friday except national holidays.

(3) Add the prices determined in paragraph (c)(2) of this section for the first 15 days of the month and divide by the number of days for which there is a daily price.

(d) *Edible whey price.* "Edible whey price" means the simple average, for the first 15 days of the month, of the daily prices per pound of edible whey powder (nonhygroscopic). The prices used shall be the prices (using the midpoint of any price range as one price) of edible whey powder for the Central States production area, as reported and

published weekly by the Dairy Division, Agricultural Marketing Service. The average shall be computed by the Director of the Dairy Division, using the price reported each week as the daily price for that day and for each preceding work-day until the day such price was previously reported. A work-day is each Monday through Friday, except national holidays.

2. Section 1131.50(b) is revised to read as follows:

§ 1131.50 Class prices.

(b) *Class II price.* A tentative Class II price shall be computed by the Director of the Dairy Division and transmitted to the market administrator on or before the 15th day of the preceding month. The tentative Class II price shall be the basic Class II formula price computed pursuant to § 1131.51a for the month plus the amount that the value computed pursuant to paragraph (b)(1) of this section exceeds the value computed pursuant to paragraph (b)(2) of this section, except that, for each month after the first month in which this paragraph is effective, the final Class II price shall be not less than the Class III price.

(1) Determine for the most recent 12-month period the simple average (rounded to the nearest cent) of the basic formula prices computed pursuant to § 1131.51 and add 10 cents; and

(2) Determine for the same 12-month period as specified in paragraph (b)(1) of this section the simple average (rounded to the nearest cent) of the basic Class II formula prices computed pursuant to § 1131.51a.

3. A new § 1131.51a is added to read as follows:

§ 1131.51a Basic Class II formula price.

The "basic Class II formula price" for the month shall be the basic formula price determined pursuant to § 1131.51 for the second preceding month plus or minus the amount computed pursuant to paragraphs (a) through (d) of this section:

(a) The gross values per hundredweight of milk used to manufacture cheddar cheese and butter-nonfat dry milk shall be computed, using price data determined pursuant to § 1131.20 and yield factors in effect under the Dairy Price Support Program authorized by the Agricultural Act of 1949, as amended, for the first 15 days of the preceding month and, separately, for the first 15 days of the second preceding month as follows:

(1) The gross value of milk used to manufacture cheddar cheese shall be the sum of the following computations:

(i) Multiply the cheddar cheese price by the yield factor used under the Price Support Program for cheddar cheese;

(ii) Multiply the butter price by the yield factor used under the Price Support Program for determining the butterfat component of the whey value in the cheese price computation; and

(iii) Subtract from the edible whey price the processing cost used under the Price Support Program for edible whey and multiply any positive difference by the yield factor used under the Price Support Program for edible whey.

(2) The gross value of milk used to manufacture butter-nonfat dry milk shall be the sum of the following computations:

(i) Multiply the butter price by the yield factor used under the Price Support Program for butter; and

(ii) Multiply the nonfat dry milk price by the yield factor used under the Price Support Program for nonfat dry milk.

(b) Determine the amounts by which the gross value per hundredweight of milk used to manufacture cheddar cheese and the gross value per hundredweight of milk to manufacture butter-nonfat dry milk for the first 15 days of the preceding month exceed or are less than the respective gross values for the first 15 days of the second preceding month.

(c) Compute weighting factors to be applied to the changes in gross values determined pursuant to paragraph (b) of this section by determining the relative proportion that the data included in each of the following subparagraphs is of the total of the data represented in paragraph (c) (1) and (2) of this section:

(1) Combine the total American cheese production for the States of Minnesota and Wisconsin, as reported by the Economics and Statistics Service of the Department for the third preceding month, and divide by the yield factor used under the Price Support Program for cheddar cheese to determine the quality of milk used in the production of American cheddar cheese; and

(2) Combine the total nonfat dry milk production for the States of Minnesota and Wisconsin, as reported by the Economics and Statistics Service of the Department for the third preceding month, and divide by the yield factor used under the Price Support Program for nonfat dry milk to determine the quantity of milk used in the production of butter-nonfat dry milk.

(d) Compute a weighted average of the changes in gross values per hundredweight of milk determined

pursuant to paragraph (b) of this section in accordance with the relative proportions of milk determined pursuant to paragraph (c) of this section.

4. Section 1131.53 is revised to read as follows:

§ 1131.53 Announcement of class prices.

The market administrator shall announce publicly on or before the fifth day of each month the Class I price for the following month, the Class III price for the preceding month and, for each month after the first month in which this section is effective, the final Class II price for the preceding month; and on or before the 15th day of each month the tentative Class II price for the following month.

PART 1132—MILK IN THE TEXAS PANHANDLE MARKETING AREA

1. Section 1132.19 is added and reserved and a new § 1132.20 is added to read as follows:

§ 1132.19 (Reserved)

§ 1132.20 Product prices.

The following product prices shall be used in calculating the basic Class II formula price pursuant to § 1132.51a:

(a) *Butter price.* "Butter price" means the simple average, for the first 15 days of the month, of the daily prices per pound of Grade A (92-score) butter. The prices used shall be those of the Chicago Mercantile Exchange as reported and published weekly by the Dairy Division, Agricultural Marketing Service. The average shall be computed by the Director of the Dairy Division, using the price reported each week as the daily price for that day and for each following work-day until the next price is reported. A work-day is each Monday through Friday, except national holidays. For any week that the Exchange does not meet to establish a price, the price for the following week shall be the last price that was established.

(b) *Cheddar cheese price.* "Cheddar cheese price" means the simple average, for the first 15 days of the month, of the daily prices per pound of cheddar cheese in 40-pound blocks. The prices used shall be those of the National Cheese Exchange (Green Bay, WI), as reported and published weekly by the Dairy Division, Agricultural Marketing Service. The average shall be computed by the Director of the Dairy Division, using the price reported each week as the daily price for that day and for each following work-day until the next price is reported. A work-day is each Monday through Friday except national holidays. For any week that the Exchange does

not meet to establish a price, the price for the following week shall be the last price that was established.

(c) *Nonfat dry milk price.* "Nonfat dry milk price" means the simple average, for the first 15 days of the month, of the daily prices per pound of nonfat dry milk, which average shall be computed by the Director of the Dairy Division as follows:

(1) The prices used shall be the prices (using the midpoint of any price range as one price) of high heat, low heat and Grade A nonfat dry milk, respectively, for the Central States production area, as reported and published weekly by the Dairy Division, Agricultural Marketing Service.

(2) For each week, determine the simple average of the prices reported for the three types of nonfat dry milk. Such average shall be the daily price for the day that such prices are reported and for each preceding work-day until the day such prices were previously reported. A work-day is each Monday through Friday except national holidays.

(3) Add the prices determined in paragraph (c)(2) of this section for the first 15 days of the month and divide by the number of days for which there is a daily price.

(d) *Edible whey price.* "Edible whey price" means the simple average, for the first 15 days of the month, of the daily prices per pound of edible whey powder (nonhygroscopic). The prices used shall be the prices (using the midpoint of any price range as one price) of edible whey powder for the Central States production area, as reported and published weekly by the Dairy Division, Agricultural Marketing Service. The average shall be computed by the Director of the Dairy Division, using the price reported each week as the daily price for that day and for each preceding work-day until the day such price was previously reported. A work-day is each Monday through Friday except national holidays.

2. Section 1132.50(b) is revised to read as follows:

§ 1132.50 Class prices.

(b) *Class II price.* A tentative Class II price shall be computed by the Director of the Dairy Division and transmitted to the market administrator on or before the 15th day of the preceding month. The tentative Class II price shall be the basic Class II formula price computed pursuant to § 1132.51a for the month plus the amount that the value computed pursuant to paragraph (b)(1) of this section exceeds the value computed pursuant to paragraph (b)(2) of this

section, except that, for each month after the first month in which this paragraph is effective, the final Class II price shall be not less than the Class III price.

(1) Determine for the most recent 12-month period the simple average (rounded to the nearest cent) of the basic formula prices computed pursuant to § 1132.51 and add 10 cents; and

(2) Determine for the same 12-month period as specified in paragraph (b)(1) of this section the simple average (rounded to the nearest cent) of the basic Class II formula prices computed pursuant to § 1132.51a.

* * * * *

3. A new § 1132.51a is added to read as follows:

§ 1132.51a Basic Class II formula price.

The "basic Class II formula price" for the month shall be the basic formula price determined pursuant to § 1132.51 for the second preceding month plus or minus the amount computed pursuant to paragraphs (a) through (d) of this section:

(a) The gross values per hundredweight of milk used to manufacture cheddar cheese and butter-nonfat dry milk shall be computed, using price data determined pursuant to § 1132.20 and yield factors in effect under the Dairy Price Support Program authorized by the Agricultural Act of 1949, as amended, for the first 15 days of the preceding month and, separately, for the first 15 days of the second preceding month as follows:

(1) The gross value of milk used to manufacture cheddar cheese shall be the sum of the following computations:

(i) Multiply the cheddar cheese price by the yield factor used under the Price Support Program for cheddar cheese;

(ii) Multiply the butter price by the yield factor used under the Price Support Program for determining the butterfat component of the whey value in the cheese price computation; and

(iii) Subtract from the edible whey price the processing cost used under the Price Support Program for edible whey and multiply any positive difference by the yield factor under the Price Support Program for edible whey.

(2) The gross value of milk used to manufacture butter-nonfat dry milk shall be the sum of the following computations:

(i) Multiply the butter price by the yield factor used in the Price Support Program for butter; and

(ii) Multiply the nonfat dry milk price by the yield factor used under the Price Support Program for nonfat dry milk.

(b) Determine the amounts by which the gross value per hundredweight of milk used to manufacture cheddar cheese and the gross value per hundredweight of milk used to manufacture butter-nonfat dry milk for the first 15 days of the preceding month exceed or are less than the respective gross values for the first 15 days of the second preceding month.

(c) Compute weighting factors to be applied to the changes in gross values determined pursuant to paragraph (b) of this section by determining the relative proportion that the data included in each of the following subparagraphs is of the total of the data represented in paragraph (c) (1) and (2) of this section:

(1) Combine the total American cheese production for the States of Minnesota and Wisconsin, as reported by the Economics and Statistics Service of the Department for the third preceding month, and divide by the yield factor used under the Price Support Program for cheddar cheese to determine the quantity of milk used in the production of American cheddar cheese; and

(2) Combine the total nonfat dry milk production for the States of Minnesota and Wisconsin, as reported by the Economics and Statistics Service of the Department for the third preceding month, and divide by the yield factor used under the Price Support Program for nonfat dry milk to determine the quantity of milk used in the production of butter-nonfat dry milk.

(d) Compute a weighted average of the changes in gross values per hundredweight of milk determined pursuant to paragraph (b) of this section in accordance with the relative proportions of milk determined pursuant to paragraph (c) of this section.

4. Section 1132.53 is revised to read as follows:

§ 1132.53 Announcement of class prices.

The market administrator shall announce publicly on or before the fifth day of each month the Class I price for the following month, the Class III price for the preceding month and, for each month after the first month in which this section is effective, the final Class II price for the preceding month; and on or before the 15th day of each month the tentative Class II price for the following month.

PART 1138—MILK IN THE RIO GRANDE VALLEY MARKETING AREA

1. A new § 1138.20 is added to read as follows:

§ 1138.20 Product prices.

The following product prices shall be used in calculating the basic Class II formula price pursuant to § 1138.51a:

(a) *Butter price.* "Butter price" means the simple average, for the first 15 days of the month, of the daily prices per pound of Grade A (92-score) butter. The prices used shall be those of the Chicago Mercantile Exchange as reported and published weekly by the Dairy Division, Agricultural Marketing Service. The average shall be computed by the Director of the Dairy Division, using the price reported each week as the daily price for that day and for each following work-day until the next price is reported. A work-day is each Monday through Friday, except national holidays. For any week that the Exchange does not meet to establish a price, the price for the following week shall be the last price that was established.

(b) *Cheddar cheese price.* "Cheddar cheese price" means the simple average, for the first 15 days of the month, of the daily prices per pound of cheddar cheese in 40-pound blocks. The prices used shall be those of the National Cheese Exchange (Green Bay, WI), as reported and published weekly by the Dairy Division, Agricultural Marketing Service. The average shall be computed by the Director of the Dairy Division, using the price reported each week as the daily price for that day and for each following work-day until the next price is reported. A work-day is each Monday through Friday except national holidays. For any week that the Exchange does not meet to establish a price, the price for the following week shall be the last price that was established.

(c) *Nonfat dry milk price.* "Nonfat dry milk price" means the simple average, for the first 15 days of the month, of the daily prices per pound of nonfat dry milk, which average shall be computed by the Director of the Dairy Division as follows:

(1) The prices used shall be the prices (using the midpoint of any price range as one price) of high heat, low heat and Grade A nonfat dry milk, respectively, for the Central States production area, as reported and published weekly by the Dairy Division, Agricultural Marketing Service.

(2) For each week, determine the simple average of the prices reported for the three types of nonfat dry milk. Such average shall be the daily price for the day that such prices are reported and for each preceding work-day until the day such prices were previously reported. A work-day is each Monday through Friday except national holidays.

(3) Add the prices determined in paragraph (c)(2) of the section for the first 15 days of the month and divide by the number of days for which there is a daily price.

(d) *Edible whey price.* "Edible whey price" means the simple average, for the first 15 days of the month, of the daily prices per pound of edible whey powder (nonhygroscopic). The prices used shall be the prices (using the midpoint of any price range as one price) of edible whey powder for the Central State production area, as reported and published weekly by the Dairy Division, Agricultural Marketing Service. The average shall be computed by the Director of the Dairy Division, using the price reported each week as the daily price for that day and for each preceding work-day until the day such price was previously reported. A work-day is each Monday through Friday except national holidays.

2. Section 1138.50(b) is revised to read as follows:

§ 1138.50 Class prices.

(b) *Class II price.* A tentative Class II price shall be computed by the Director of the Dairy Division and transmitted to the market administrator on or before the 15th day of the preceding month. The tentative Class II price shall be the basic Class II formula price computed pursuant to § 1138.51a for the month plus the amount that the value computed pursuant to paragraph (b)(1) of this section exceeds the value computed pursuant to paragraph (b)(2) of this section, except that, for each month after the first month in which this paragraph is effective, the final Class II price shall be not less than the Class III price.

(1) Determine for the most recent 12-month period the simple average (rounded to the nearest cent) of the basic formula prices computed pursuant to § 1138.51 and add 10 cents; and

(2) Determine for the same 12-month period as specified in paragraph (b)(1) of this section the simple average (rounded to the nearest cent) of the basic Class II formula prices computed pursuant to § 1138.51a.

3. A new § 1138.51a is added to read as follows:

§ 1138.51a Basic Class II formula price.

The "basic Class II formula price" for the month shall be the basic formula price determined pursuant to § 1138.51 for the second preceding month plus or minus the amount computed pursuant to paragraphs (a) through (d) of this section:

(a) The gross values per hundredweight of milk used to manufacture cheddar cheese and butter-nonfat dry milk shall be computed, using price data determined pursuant to § 1138.20 and yield factors in effect under the Dairy Price Support Program authorized by the Agricultural Act of 1949, as amended, for the first 15 days of the preceding month and, separately, for the first 15 days of the second preceding month as follows:

(1) The gross value of milk used to manufacture cheddar cheese shall be the sum of the following computations:

(i) Multiply the cheddar cheese price by the yield factor used under the Price Support Program for cheddar cheese;

(ii) Multiply the butter price by the yield factor used under the Price Support Program for determining the butterfat component of the whey value in the cheese price computation; and

(iii) Subtract from the edible whey price the processing cost used under the Price Support Program for edible whey and multiply any positive difference by the yield factor used under the Price Support Program for edible whey.

(2) The gross value of milk used to manufacture butter-nonfat dry milk shall be the sum of the following computations:

(i) Multiply the butter price by the yield factor used under the Price Support Program for butter; and

(ii) Multiply the nonfat dry milk price by the yield factor used under the Price Support Program for nonfat dry milk.

(b) Determine the amounts by which the gross value per hundredweight of milk used to manufacture cheddar cheese and the gross value per hundredweight of milk used to manufacture butter-nonfat dry milk for the first 15 days of the preceding month exceed or are less than the respective gross values for the first 15 days of the second preceding month.

(c) Compute weighting factors to be applied to the changes in gross values determined pursuant to paragraph (b) of this section by determining the relative proportion that the data included in each of the following subparagraphs is of the total of the data represented in paragraph (c) (1) and (2) of this section:

(1) Combine the total American cheese production for the States of Minnesota and Wisconsin, as reported by the Economics and Statistics Service of the Department for the third preceding month, and divide by the yield factor used under the Price Support Program for cheddar cheese to determine the quantity of milk used in the production of American cheddar cheese; and

(2) Combine the total nonfat dry milk production for the States of Minnesota and Wisconsin, as reported by the Economics and Statistics Service of the Department for the third preceding month, and divide by the yield factor used under the Price Support Program for nonfat dry milk to determine the quantity of milk used in the production of butter-nonfat dry milk.

(d) Compute a weighted average of the changes in gross values per hundredweight of milk determined pursuant to paragraph (b) of this section in accordance with the relative proportions of milk determined pursuant to paragraph (c) of this section.

4. Section 1138.53 is revised to read as follows:

§ 1138.53 Announcement of class prices.

The market administrator shall announce publicly on or before the fifth day of each month the Class I price for the following month, the Class III price for the preceding month and, for each month after the first month in which this section is effective, the final Class II price for the preceding month; and on or before the 15th day of each month the tentative Class II price for the following month.

(Secs. 1-19, 48 Stat. 31, as amended; 7 U.S.C. 601-674)

Effective Date: September 1, 1981.

Signed at Washington, D.C., on August 25, 1981.

C. W. McMillan,

Assistant Secretary, Marketing and Inspection Services.
