[A-7-FRL-2209-7]

Designation of Areas for Air Quality; Planning Purposes; Iowa

AGENCY: Environmental Protection Agency (EPA).

ACTION: Final rulemaking.

SUMMARY: EPA today takes final action to redesignate the City of Dubuque, Iowa, from nonattainment to attainment with respect to the National Ambient Air Quality Standards (NAAQS) for sulfur dioxide (SO₂). A nonattainment designation means that air pollution levels are too high and an air pollution control plan must be developed. This redesignation means that air quality in Dubuque has improved so that further SO₂ control measures need not be required.

EFFECTIVE DATE: November 1, 1982.

ADDRESSES: Copies of the redesignation requests and supporting materials are available at the following addresses:

Environmental Protection Agency,
Region VII, Air Programs Branch, 324 East 11th Street, Kansas City, Missouri 64106
Environmental Protection Agency,
Public Information Reference Unit, 401 M Street, SW., Washington, D.C. 20460

FOR FURTHER INFORMATION CONTACT:

Daniel J. Wheeler, Environmental Protection Agency, 324 East 11th Street, Kansas City, Missouri 64106, at 816-374-3791.

SUPPLEMENTARY INFORMATION: On December 22, 1980, the Iowa Department of Environmental Quality (IDEQ) submitted a request to redesignate the attainment status of two areas in Iowa. The state had determined that Dubuque exceeded the NAAQS for carbon monoxide (CO) and should be redesignated from attainment to

nonattainment for CO, that Dubuque no longer exceeded the NAAQS for SO₂ and should be redesignated from nonattainment to attainment for SO₂, and that particulate monitoring data in Keokuk no longer supported the secondary nonattainment designation and it should be changed to unclassifiable for total suspended particulate (TSP).

EPA proposed to approve these requests on April 3, 1981 (46 FR 20235), and received no public comments on the proposal. On October 5, 1981 (46 FR 48929), EPA redesignated Dubuque for CO and Keokuk for TSP but deferred action on Dubuque for SO₂.

EPA designation criteria require 24 months of valid SO₂ monitoring without a violation for an area to be designated as attainment for SO₂. The Dubuque area has not had a violation of the SO₂ standard for over 4 years but final action was deferred because of the air quality simulation modeling study the state then had underway. The purpose of the delay was to see if the results of the modeling study would indicate areas of violation at points other than monitoring sites.

The modeling study was intended as support for new statewide SO₂ limits. The state proposed to adopt new limits, based on the modeling, earlier this year but the rulemaking has been terminated without final action. Because a new rulemaking will require reproposal and new public hearings, it will be a substantial period of time before the new rules and modeling study are submitted. Therefore, EPA finds it is unreasonable to wait any longer for the modeling results and that further delay in redesignating Dubuque should not be allowed. When the modeling study is submitted, EPA will evaluate the results and determine if any new actions are appropriate.

In summary, air quality monitoring data shows that the sulfur dioxide standards have not been exceeded in Dubuque in more than 2 years, therefore the area meets the criteria to be reclassified from nonattainment to attainment. Therefore, the City of Dubuque is redesignated to attainment with respect to SO₂.

The Office of Management and Budget has exempted this rule from the requirements of Section 3 of Executive Order 12291.

[Docket No. HM-56; Amdt. Nos. 107-10, 171-66, 172-74, 173-158, 174-41, 175-23, 177-55, 178-72, 179-31]

Hazardous Materials Regulations; Miscellaneous Amendments

AGENCY: Materials Transportation Bureau, Research and Special Programs Administration, DOT.

ACTION: Final rule.

SUMMARY: The purpose of these amendments to the Hazardous Materials Regulations is to change or delete certain incorrect references, to correct certain editorial errors, and to make minor regulatory changes which will not impose any restrictions on persons affected by these regulations.

EFFECTIVE DATE: September 30, 1982.

FOR FURTHER INFORMATION CONTACT: Thomas G. Allan, Office of Hazardous Materials Regulation, Materials Transportation Bureau, Department of Transportation, 400 Seventh Street, SW., Washington, D.C. 20590, (202) 426-2075.

SUPPLEMENTARY INFORMATION: With consolidation of the Hazardous Materials Regulations (HMR) into Title 49 of the Code of Federal Regulations and subsequent amendments thereto, numerous discrepancies have surfaced in the printing of Title 49. These

discrepancies include incorrect references, inadvertent omissions of phrases within sections, and punctuation errors. In addition, functional responsibilities relating to certain approvals have been transferred from the Materials Transportation Bureau's (MTB) Office of Operations and Enforcement (OOE) to its Office of Hazardous Materials Regulation (OHMR) and the affected sections are amended to note this. Finally, in response to inquiries which MTB has received concerning the clarity of particular requirements specified in the HMR, changes are made which should reduce uncertainties as to their meaning.

Since these amendments do not impose additional requirements, public notice has not been provided and these amendments are effective without delay. The MTB has determined that this rule, as promulgated, is not a "major rule" under the terms of Executive Order 12291 and DOT implementing procedures (44 FR 11034). A final regulatory evaluation and environmental assessment is not available in the Docket as these amendments are merely clerical in their effect. Based on limited information available concerning size and nature of entities likely to be affected by this amendment, I certify that this amendment will not, as promulgated, have a significant economic impact on a substantial number of small entities.

Docket HM-56 is closed upon issuance of this final rule.

The following is a brief summary on the changes in each Part:

Part 107

Changes reflect the proper title of the Associate Director for HMR in the following sections: § 107.119(b)(c), and (d), § 107.121.

In § 107.373, the word "employer" is changed to read "employee" to reflect the proper relationship to OHMR and OOE.

Part 171

In § 171.16, paragraph (b) is changed to specify the name of the new office to which written incident reports are to be addressed.

In §§ 171.19 and 171.20, corrections are made to reflect the correct title of the Associate Director for HMR.

Part 172

In § 172.101, the Hazardous Materials Table (HMT) is changed by adding and revising entries as follows:

"Allethrin" is amended by changing the identification number in column (3A) from NA2909 to NA2902.
