

The nature of the residues is adequately understood, and an adequate analytical method [gas-liquid chromatography using a flame photometric detector set for the phosphorous mode] is available for enforcement purposes. Since the grazing and feeding of treated lentil vines by livestock is prohibited, there should be no problem with secondary residues in meat and milk.

Based on the above information considered by the Agency, the tolerance established by amending 40 CFR 180.204 would protect the public health. It is proposed, therefore, that the tolerance be established as set forth below.

Any person who has registered or submitted an application for registration of a pesticide, under the Federal Insecticide, Fungicide, and Rodenticide Act (FIFRA) as amended, which contains any of the ingredients listed herein, may request within 30 days after publication of this notice in the *Federal Register* that this rulemaking proposal be referred to an Advisory Committee in accordance with section 408(e) of the Federal Food, Drug, and Cosmetic Act.

Interested persons are invited to submit written comments on the proposed regulation. Comments must bear a notation indicating the document control number, [PP 3E2890/P316]. All written comments filed in response to this petition will be available in the Program Management and Support Division, at the address given above from 8 a.m. to 4 p.m., Monday through Friday, except legal holidays.

The office of Management and Budget has exempted this rule from the requirements of section 3 of Executive Order 12291.

Pursuant to the requirements of the Regulatory Flexibility Act (Pub. L. 96-534, 94 Stat. 1164, 5 U.S.C. 601-612), the Administrator has determined that regulations establishing new tolerances or raising tolerance levels or establishing exemptions from tolerance requirements do not have a significant economic impact on a substantial number of small entities. A certification statement to this effect was published in the *Federal Register* of May 4, 1981 [46 FR 24950].

These regulations included provisions under which EPA can authorize qualified State hazardous waste management programs to operate in lieu of the Federal program. The regulations provide for a transitional stage in which qualified State programs can be granted interim authorization. The interim authorization program is being implemented in two phases corresponding to the two stages in which the underlying Federal program will take effect.

Component A, published in the Federal Register January 12, 1981 (46 FR 2802), contains standards for permitting containers, tanks, surface impoundments and waste piles.
