

strengthen the competitive posture of American automobile manufacturers.

While the majority of the Commission remains convinced that the procompetitive effects of this joint venture overwhelm any of the possible anticompetitive concerns that have been raised in this matter, I should caution against the drawing of any undue inferences from today's decision. Each case that comes before the Commission is analyzed and decided upon based on its own merits, and it should go without saying that the circumstances in this case are sufficiently unique as to augur against making any inferences as to how the Commission might view other production joint ventures.

**Statement of Terry Galvani,
Commissioner, Federal Trade
Commission of the GM/Toyota Joint
Venture**

April 11, 1984.

On December 22, 1983, I voted in favor of provisionally accepting a consent agreement to permit General Motors Corporation and Toyota Motor Corporation to engage in a limited manufacturing joint venture in Fremont, California. At that time, I indicated that I looked forward to receiving and reviewing public comments on the joint venture under the Hart-Scott-Rodino Act procedures and Commission rules. The Commission has received over one hundred comments on the provisionally accepted consent order. After carefully reviewing those comments, several things are apparent. First, the Staff has done an exhaustive job analyzing the competitive aspects of the joint venture. The major concerns raised in the comments had already been identified by the Staff in their investigation, and the resulting consent order addressed virtually all of these concerns. Second,

to the extent anyone feared the proposed consent will not prevent collusion between General Motors and Toyota, the modification adopted today should allay those fears. Limiting information exchanges between the two companies in product development and engineering to communications necessary for producing the joint venture vehicle closes the only potential channel for collusion not covered by the proposed consent. Moreover, the record keeping requirements associated with this change provide an effective method for monitoring compliance.

Although the joint venture presents some potential antitrust problems, the modified consent order addresses the major antitrust concerns that arise from the joint venture. The modified consent prevents collusion between the companies in long term strategic planning as well as in the short term, without unduly interfering with the substantial procompetitive benefits that I believe will result from the joint venture.

BILLING CODE 3210-01-M

DEPARTMENT OF THE INTERIOR

Office of Surface Mining Reclamation and Enforcement

30 CFR Part 906

Extension of Deadline for Submission of Program Amendments to the Colorado Permanent Program

AGENCY: Office of Surface Mining Reclamation and Enforcement (OSM), Interior.

ACTION: Final rule.

SUMMARY: OSM is announcing its decision to extend the deadline for Colorado to (1) promulgate rules governing the training, examination and certification of blasters and (2) to develop and adopt a program to examine and certify all persons who are directly responsible for the use of explosives in a surface coal mining operation. On February 6, 1984, Colorado requested a six month extension of time for the development of a blaster certification program. All States with regulatory programs approved under the Surface Mining Control and Reclamation Act of 1977 (SMCRA or the Act) are required to develop and adopt a blaster certification program by March 4, 1984. Section 850.12(b) of OSM's regulations provides that the Director, OSM, may approve an extension of time for a State to develop and adopt a program upon a demonstration of good cause. In accordance with the State's request, the Director is granting the State a six-month extension of time to submit a proposed blaster certification program.

EFFECTIVE DATE: April 30, 1984.

FOR FURTHER INFORMATION CONTACT:

Mr. Robert Hagen, Director, Albuquerque Field Office, Office of Surface Mining, 219 Central Avenue NW., Albuquerque, New Mexico 87102; Telephone: (505) 766-1486.

SUPPLEMENTARY INFORMATION:

On March 4, 1983, OSM issued final rules effective April 14, 1983, establishing the Federal standards for the training and certification of blasters at 30 CFR Chapter M (48 FR 9486). Section 850.12 of these regulations stipulates that the regulatory authority in each State with an approved program under SMCRA shall develop and adopt a program to examine and certify all persons who are directly responsible for the use of explosives in a surface coal mining operation within 12 months after approval of a State program or within 12 months after publication date of OSM's rule at 30 CFR Part 850, whichever is later. In the case of Colorado's program,

the applicable date is 12 months after publication date of OSM's rule, or March 4, 1984.

On February 6, 1984, Colorado advised OSM that it would be unable to meet the March 4, 1984 deadline and requested an additional six months to develop and adopt a blaster certification program.

The Director of the Colorado Department of Natural Resources, Mined Land Reclamation Division, the regulatory authority for Colorado's program, advised OSM that the State would require the additional time in order to work out an agreement with another State agency that would administer the blaster certification program. He also stated that Colorado would like to promulgate regulations governing a blaster training program concurrently with the promulgation of other modifications to the program which the State intends to make as a result of modifications in the Federal regulations under SMCRA.

In the March 6, 1984 *Federal Register* (49 FR 8261), OSM proposed a six month extension for Colorado to submit to OSM a proposed blaster training program. Public comment on this proposal was sought for 30 days ending April 5, 1984. No comments were submitted to OSM during the comment period.

Secretary's Determination

In accordance with the State's request, the Secretary has decided to extend the deadline for Colorado to submit a proposed blaster training program until September 4, 1984. This extension will allow the Colorado Department of Natural Resources, Mined Land Reclamation Division, to work out an agreement with another State agency to administer the blaster training and certification program and to coordinate the development of the program with the development of other proposed regulatory modifications to the Colorado program which are necessary as a result of changes to the Federal regulations.

Additional Determinations

1. *Compliance with the National Environmental Policy Act:* The Secretary has determined that, pursuant to Section 702(d) of SMCRA, 30 U.S.C. 1292(d), no environmental impact statement need be prepared on this rulemaking.

2. *Executive Order No. 12291 and the Regulatory Flexibility Act:* On August 28, 1981, the Office of Management and Budget (OMB) granted OSM an exemption from Sections 3, 4, 7, and 8 of Executive Order 12291 for actions

directly related to approval or conditional approval of State regulatory programs. Therefore, this action is exempt from preparation of a Regulatory Impact Analysis and regulatory review by OMB.

The Department of the Interior has determined that this rule will not have a significant economic effect on a substantial number of small entities under the Regulatory Flexibility Act (5 U.S.C. 601 *et seq.*). This rule will not impose any new requirements; rather, it will ensure that existing requirements established by SMCRA and the Federal rules will be met by the State.

3. *Paperwork Reduction Act:* This rule does not contain information collection requirements which require approval by the Office of Management and Budget under 44 U.S.C. 3507.

List of Subjects in 30 CFR Part 906

Coal mining, Intergovernmental relations, Surface mining, Underground mining.

Authority: Pub. L. 95-87, Surface Mining Control and Reclamation Act of 1977 (30 U.S.C. 1201 *et seq.*).

Dated: April 24, 1984.

J. Lisle Reed,

Acting Director, Office of Surface Mining.

PART 906—COLORADO

30 CFR Part 906 is amended by adding a new § 906.16 to read as follows:

§ 906.16 Required program amendments.

Pursuant to 30 CFR 732.17, Colorado is required to submit for OSM's approval the following proposed program amendments by the dates specified.

(a) By Sept. 4, 1984, Colorado shall submit for OSM's approval

(1) Rules governing the training, examination and certification of blasters and

(2) A program to examine and certify all persons who are directly responsible for the use of explosives in surface coal mining operations.
