

existing requirements established by SMCRA and the Federal rules will be met by the State.

3. *Paperwork Reduction Act.* This rule does not contain information collection requirements which require approval by the Office of Management and Budget under 44 U.S.C. 3507.

List of Subjects in 30 CFR Part 934

Coal mining, Intergovernmental relations, Surface mining, Underground mining.

Dated: October 14, 1986.

James W. Workman,

Deputy Director, Operations and Technical Services, Office of Surface Mining Reclamation and Enforcement.

PART 934—NORTH DAKOTA

30 CFR Part 934 is amended as follows:

1. The authority citation for Part 934 continues to read as follows:

Authority: Sec. 503, Pub. L. 95-87 (30 U.S.C. 1253), unless otherwise noted.

2. 30 CFR Part 934.15 is amended by adding a new paragraph (g) as follows:

§ 934.15 Approval of amendments to State regulatory program.

(g) The following amendments to the North Dakota permanent regulatory program, submitted to OSMRE May 30, 1986, are approved effective October 21, 1986.

(1) Addition of definitions to NDAC 69-05.2-01-02 (11) and (12) for "coal preparation" and "coal preparation plant", and deletion of the definition of "coal processing plant";

(2) Addition of NDAC 69-05.2-09-19 and 69-05.2-13-13 concerning permit application requirements and performance standards for coal preparation plants not located within the permit area of a mine;

(3) Modifications to NDAC 69-05.2-16-04(1)(b) and 69-05.2-16-09(22) concerning criteria for the removal of sedimentation ponds and other treatment facilities;

(4) Repeal of NDAC 69-05.2-15-01 concerning general requirements for performance standards for suitable plant growth material;

(5) Modifications to NDAC 69-05.2-15-02, 03(2), and 04 concerning the removal, storage and protection, and redistribution of suitable plant growth material;

(6) Modifications to NDAC 69-05.2-21-03 concerning revised backfilling and grading requirements for covering exposed coal seams and toxic-forming and combustible materials; and

(7) Modifications to NDAC 69-05.2-08-05(2)(c)(5) concerning addition of saturation percentage to overburden analysis requirements.

Coast Guard

33 CFR Part 162

[CGD 85-060]

Inland Waterway Navigation Regulations; Connecting Waters From Lake Huron to Lake Erie

AGENCY: Coast Guard, DOT.

ACTION: Final rule; technical amendment.

SUMMARY: The Coast Guard is amending the Inland Waterways Navigation Regulations for the connecting waters between Lake Huron and Lake Erie to update the name of the light at the junction of the St. Clair and Black Rivers. This amendment will bring the regulation into agreement with current Coast Guard and National Oceanic and Atmospheric Administration (NOAA) charts.

EFFECTIVE DATE: October 21, 1986.

FOR FURTHER INFORMATION CONTACT:

Mr. Michael J. Powers, Office of Navigation, (202) 267-0415. Normal working hours are from 7:30 a.m. to 4:00 p.m., Monday through Friday, except Federal Holidays.

SUPPLEMENTARY INFORMATION: In the May 8, 1986 issue of the Federal Register (51 FR 17013), the Coast Guard published a rule, which among other matters, concerned a reporting requirement at the "Black River Entrance Light". After the rule was published, the Coast Guard was informed that the "Black River Entrance Light" was now named the "St. Clair/Black River Junction Light." The location of the light has not changed. This document reflects that change in the name by updating Table I in 33 CFR Part 162.

Since this change is merely editorial in nature, notice and public procedure thereon is unnecessary and it may be made effective in less than 30 days. In addition, the action in this document would not change the Regulatory Evaluation contained in the final rule published on May 8, 1986.

List of Subjects in 33 CFR Part 162
Navigation (water), Waterways.

In consideration of the foregoing, Part 162 of Title 33 is amended as follows:

1. The authority citation for Part 162 continues to read as follows:

Authority: 33 U.S.C. 1231; 49 CFR 1.46(n)(4).

2. By amending Table I in § 162.132 by changing the words "Black River Entrance Light" in the second column under the heading "Reporting Points", to the words: "St. Clair/Black River Junction Light". Table I is revised to read as follows:

§ 162.132 Connecting waters from Lake Huron to Lake Erie; communication rules.

BILLING CODE 4910-14-M

ENVIRONMENTAL PROTECTION AGENCY

40 CFR Part 62

[A-7-FRL-3091-7]

Approval and Promulgation of State Plans for Designated Facilities and Pollutants; State of Kansas; Section 111(d) Plan

AGENCY: Environmental Protection Agency (EPA).

ACTION: Final rule.

SUMMARY: The state of Kansas has submitted its plan for the control of sulfuric acid mist emissions from existing sulfuric acid production plants. This plan was submitted in response to section 111(d) of the Clean Air Act, which requires states to establish emission controls for existing sources which would be subject to EPA's new source performance standards if these

sources were new sources. This notice advises the public that EPA takes final action to approve Kansas' 111(d) plan.

EFFECTIVE DATE: This action will be effective December 22, 1986, unless notice is received within 30 days that adverse or critical comments will be submitted.

ADDRESSES: Comments should be sent to Deann K. Hecht, Environmental Protection Agency, Air Branch, 726 Minnesota Avenue, Kansas City, Kansas 66101. The state submission is available for inspection during normal business hours at the above address and at the Kansas Department of Health and Environment, Forbes Field, Topeka, Kansas 66620.

FOR FURTHER INFORMATION CONTACT: Deann K. Hecht at (913) 236-2893, FTS 757-2893.

SUPPLEMENTARY INFORMATION:

I. Plan Requirements

Section 111 of the Clean Air Act provides authority for EPA to establish standards of performance for new stationary sources of air pollution. Section 111(d) and 40 CFR Part 60, Subpart B, require that each state adopt and submit a plan for the control of designated pollutants from existing facilities. Designated pollutants do not include those for which air quality criteria have been established or which are already listed under section 108(a), relating to development of air quality criteria for certain pollutants, or section 112(b)(1)(A), Hazardous Air Pollutants. After promulgation of a standard of performance for a designated pollutant from an affected facility, EPA publishes an applicable emission control guideline document and then publishes a notice in the Federal Register as to its availability. The state must submit its section 111(d) plan within nine months after the final guideline notice of availability. If there are no such designated facilities located within a state, the state is required to submit a letter of certification to that effect; i.e., a negative declaration.

The requirements for section 111(d) plans are contained in 40 CFR 60.23 through 60.26. The state is required to give proper notification and conduct at least one public hearing. The plan must contain emission standards and compliance schedules. The emission standards must be at least as stringent as those required by the federal guideline with certain case-by-case exemptions. The plan must also include an inventory of all designated facilities, including emissions data for the designated pollutants. The state must demonstrate that it has adequate legal

authority to carry out the plan. For a complete description of the plan requirements, the reader is referred to the above-mentioned sections of the Code of Federal Regulations. Part 62 of the CFR provides the procedural framework for the submission of these plans.

II. Review of the State Submittal

On February 28, 1986, the state of Kansas submitted a plan for the control of sulfuric acid mist emissions from existing sulfuric acid production plants. On May 1, 1985, the state of Kansas submitted rule K.A.R. 28-19-26 for the control of sulfuric acid production plants. The public hearing was held on November 2, 1984, with proper public notice and participation. The state's sulfuric acid mist emission limit in rule K.A.R. 28-19-26 is 0.5 pounds of sulfuric acid mist per ton of acid produced. This is identical to the limit contained in EPA's "Final Guideline Document: Control of Sulfuric Acid Mist Emissions from Existing Sulfuric Acid Production Units" (EPA-450/2-77-019).

The state has adopted, by reference, EPA's compliance test methods for sulfuric acid mist emissions as specified in 40 CFR Part 60, Appendix A. There is one sulfuric acid production plant in Kansas and it is in compliance with the emission limit. Therefore, the state's plan does not include a compliance schedule.

The state's plan includes an inventory of the designated facility, including emission data for the designated pollutants. Additional inventory data are maintained on EPA's National Emissions Data System (NEDS), which is updated periodically. The state's section 111(d) emission inventory meets the requirements of 40 CFR 60.25 and 40 CFR Part 60, Appendix D. The state has identified reporting and recordkeeping requirements contained in the Kansas Air Pollution Control law, which were previously approved under section 110 of the Act.

III. EPA Action

Today's notice takes final action to approve the state of Kansas' section 111(d) plan for the control of sulfuric acid mist emissions from existing sulfuric acid production plants.

EPA believes this submission is noncontroversial and is taking final action to approve it without prior proposal. The public should be advised that this action will be effective within 60 days from today. However, if notice is received within 30 days that someone wishes to submit adverse or critical comments, this action will be withdrawn and two subsequent notices will be

published before the effective date. One notice will withdraw final action and another will begin a new rulemaking by announcing a proposal of the action and establishing a comment period.

Under 5 U.S.C. 605(b), I hereby certify that this section 111(d) plan will not have a significant economic impact on a substantial number of small entities.

The Office of Management and Budget has exempted this rule from the requirements of section 3 of Executive Order 12291.

Under section 307(b)(1) of the Act, petitions for judicial review of this action must be filed in the United States Court of Appeals for the appropriate circuit within 60 days from today. This action may not be challenged later in proceedings to enforce its requirement (see section 307(b)(2)).

List of Subjects in 40 CFR Part 62

Air pollution control, Fluoride, Administrative practice and procedure, Intergovernmental relations, Reporting and recordkeeping requirements, Phosphate, Aluminum, Fertilizers, Paper and paper products industry, Sulfuric oxides, Sulfuric acid plants.

Dated: September 29, 1986.

Lee M. Thomas,
Administrator.

PART 62—[AMENDED]

Part 62 of Chapter I, Title 40 of the Code of Federal Regulations, is amended as follows:

Subpart R—Kansas

1. The authority citation for Part 62 continues to read as follows:

Authority: 42 U.S.C. 7401-7642.

2. Subpart R is amended by adding § 62.4175 and the undesignated center heading preceding the section to read as follows:

Sulfuric Acid Mist From Existing Sulfuric Acid Production Plants

§ 62.4175 Identification of plan.

(a) *Identification of Plan.* State of Kansas Implementation Plan for Control of Sulfuric Acid Mist from Existing Sulfuric Acid Plants.

(b) The Plan was officially submitted on February 6, 1986.

(c) *Identification of Sources.* The Plan applies to existing facilities at the following existing sulfuric acid plant: (1) Koch Sulfur Products, DeSoto, Kansas.

[FR Doc. 86-22830 Filed 10-20-86; 8:45 am]

BILLING CODE 6560-50-M

**FEDERAL EMERGENCY
MANAGEMENT AGENCY**
44 CFR Part 65
**Changes in Flood Elevation
Determinations**

AGENCY: Federal Insurance Administration, Federal Emergency Management Agency.

ACTION: Final rule.

SUMMARY: Modified base (100-year) flood elevations are finalized for the communities listed below.

These modified elevations will be used in calculating flood insurance premium rates for new buildings and their contents and for second layer coverage on existing buildings and their contents.

DATES: The effective dates for these modified base flood elevations are indicated on the following table and amend the Flood Insurance Rate Map(s) (FIRM) in effect for each listed community prior to this date.

ADDRESSES: The modified base flood elevations for each community are available for inspection at the office of the Chief Executive Officer of each community. The respective addresses are listed on the following table.

FOR FURTHER INFORMATION CONTACT: Mr. John L. Matticks, Acting Chief, Risk Studies Division, Federal Insurance Administration, Federal Emergency Management Agency, Washington, DC 20472, (202) 646-2767.

SUPPLEMENTARY INFORMATION: The Federal Emergency Management Agency gives notice of the final determinations of modified flood

elevations for each community listed. These modified elevations have been published in newspaper(s) of local circulation and ninety (90) days have elapsed since that publication. The Administrator, has resolved any appeals resulting from this notification.

Numerous changes made in the base (100-year) flood elevations on the FIRMs for each community make it administratively infeasible to publish in this notice all of the changes contained on the maps. However, this rule includes the address of the Chief Executive Officer of the community, where the modified base flood elevation determinations are available for inspection.

The modifications are made pursuant to Section 206 of the Flood Disaster Protection Act of 1973 (Pub. L. 93-234) and are in accordance with the National Flood Insurance Act of 1968, as amended (Title XIII of the Housing and Urban Development Act of 1968, (Pub. L. 90-448), 42 U.S.C. 4001-4128, and 44 CFR Part 65.

For rating purposes, the revised community number is shown and must be used for all new policies and renewals.

The modified base (100-year) flood elevations are the basis for the flood plain management measures that the community is required to either adopt or show evidence of being already in effect in order to qualify or to remain qualified for participation in the National Flood Insurance Program.

These modified elevations, together with the flood plain management measures required by § 60.3 of the program regulations, are the minimum that are required. They should not be

construed to mean that the community must change any existing ordinances that are more stringent in their flood plain management requirements. The community may at any time enact stricter requirements of its own, or pursuant to policies established by other Federal, State or regional entities.

These modified base flood elevations shall be used to calculate the appropriate flood insurance premium rates for new buildings and their contents and for second layer coverage on existing buildings and their contents.

The changes in the base flood elevations are in accordance with 44 CFR 65.4.

Pursuant to the provisions of 5 U.S.C. 605(b), the Administrator, to whom authority has been delegated by the Director, Federal Emergency Management Agency, hereby certifies that this rule, if promulgated, will not have a significant economic impact on a substantial number of small entities. This rule provides routine legal notice of technical amendments made to designated special flood hazard areas on the basis of updated information and imposes no new requirements or regulations on participating communities.

BILLING CODE 6718-03-M

44 CFR Part 65

[Docket No. FEMA-6900]

Changes in Flood Elevation Determinations

AGENCY: Federal Insurance Administration, Federal Emergency Management Agency.

ACTION: Interim rule.

SUMMARY: This rule lists those communities where modification of the base (100-year) flood elevations is appropriate because of new scientific or technical data. New flood insurance premium rates will be calculated from the modified base (100-year) elevations for new buildings and their contents and for second layer insurance on existing buildings and their contents.

DATES: These modified elevations are currently in effect and amend the Flood Insurance Rate Map (FIRM) in effect prior to this determination.

From the date of the second publication of notice of these changes in a prominent local newspaper, any person has ninety (90) days in which he can request through the community that the Administrator, reconsider the changes. These modified elevations may be changed during the 90-day period.

ADDRESSES: The modified base (100-year) flood elevation determinations are

available for inspection at the office of the Chief Executive Officer of the community, listed in the fifth column of the table.

Send comments to that address also.

FOR FURTHER INFORMATION CONTACT:

Mr. John L. Matticks, Acting Chief, Risk Studies Division, Federal Insurance Administration, Federal Emergency Management Agency, Washington, DC 20472, (202) 646-2767.

SUPPLEMENTARY INFORMATION:

The numerous changes made in the base (100-year) flood elevations on the FIRM(s) make it administratively infeasible to publish in this notice all of the modified base (100-year) flood elevations contained on the map. However, this rule includes the address of the Chief Executive Officer of the community where the modified base (100-year) flood elevation determinations are available for inspection.

Any request for reconsideration must be based on knowledge of changed conditions, or new scientific or technical data.

These modifications are made pursuant to section 206 of the Flood Disaster Protection Act of 1973 (Pub. L. 93-234) and are in accordance with the National Flood Insurance Act of 1968, as amended (Title XIII of the Housing and Urban Development Act of 1968 (Pub. L. 90-448)), 42 U.S.C. 4001-4128, and 44 CFR 65.4.

For rating purposes, the revised community number is listed and must be used for all new policies and renewals.

These base (100-year) flood elevations are the basis for the flood plain management measures that the community is required to either adopt or

show evidence of being already in effect in order to qualify or remain qualified for participation in the National Flood Insurance Program.

These elevations, together with the flood plain management measures required by 60.3 of the program regulations are the minimum that are required. They should not be construed to mean the community must change any existing ordinances that are more stringent in their flood plain management requirements. The community may at any time, enact stricter requirements on its own, or pursuant to policies established by other Federal, State or regional entities.

The changes in the base (100-year) flood elevations listed below are in accordance with 44 CFR 65.4.

Pursuant to the provisions of 5 U.S.C. 605(b), the Administrator, to whom authority has been delegated by the Director, Federal Emergency Management Agency, hereby certifies that this rule if promulgated will not have a significant economic impact on a substantial number of small entities. This rule provides routine legal notice of technical amendments made to designated special flood hazard areas on the basis of updated information and imposes no new requirements or regulations on participating communities.

 BILLING CODE 6718-03-M

44 CFR Part 67

Final Flood Elevation Determinations; California et al.

AGENCY: Federal Insurance Administration, Federal Emergency Management Agency.

ACTION: Final rule.

SUMMARY: Modified base (100-year) flood elevations are finalized for the communities listed below.

These modified elevations are the basis for the flood plain management measures that the community is required to either adopt or show evidence of being already in effect in order to qualify or remain qualified for participation in the National Flood Insurance Program.

EFFECTIVE DATE: The date of issuance of the Flood Insurance Rate Map (FIRM) showing modified base flood elevations, for the community. This date may be obtained by contacting the office where the maps are available for inspection indicated on the table below:

ADDRESSES: See table below:

FOR FURTHER INFORMATION CONTACT: Mr. John L. Matticks, Acting Chief, Risk Studies Division, Federal Insurance Administration, Federal Emergency Management Agency, Washington, DC 20472 (202) 646-2767.

SUPPLEMENTARY INFORMATION: The Federal Emergency Management Agency gives notice of the final determinations of flood elevations for each community listed. Proposed base flood elevations or proposed modified base flood elevations have been published in the *Federal Register* for each community listed.

This final rule is issued in accordance with section 110 of the Flood Disaster Protection Act of 1968 (Title XIII of the Housing and Urban Development Act of 1968 (Pub. L. 90-448)), 42 U.S.C. 4001-4128, and 44 CFR Part 67. An opportunity for the community or individuals to appeal the proposed determination to or through the community for a period of ninety (90) days has been provided.

The Agency has developed criteria for flood plain management in floodprone areas in accordance with 44 CFR Part 60.

Pursuant to the provisions of 5 U.S.C. 605(b), the Administrator, to whom authority has been delegated by the Director, Federal Emergency Management Agency, hereby certifies for reasons set out in the proposed rule that the final flood elevation determinations, if promulgated, will not have a significant economic impact on a substantial number of small entities. Also, this rule is not a major rule under terms of Executive Order 12291, so no regulatory analyses have been proposed. It does not involve any collection of information for purposes of The Paperwork Reduction Act.
