BILLING CODE 6560-50-M

[ER-FRL-3468-8]**City of Tallahassee-Leon County, Florida Wastewater Management Amendment to the Notice of Intent To Prepare an Environmental Impact Statement (EIS) Supplement.**

AGENCY: U.S. Environmental Protection Agency (EPA).

ACTION: This notice is an amendment to the Notice of Intent (NOI) to prepare a supplement to the Tallahassee-Leon County, Florida Wastewater Management Environmental Impact Statement (1983).

Purpose: EPA issued a Notice of Intent to prepare an EIS on proposed wastewater management facilities for Tallahassee, Florida on January 8, 1988. EPA is issuing this amendment to inform the public that a second Federal action will be addressed in the EIS. The EIS will address the possible transfer of land from the United States Forest Service (USFS) to the City of Tallahassee.

For Further Information and to be Placed on the Project Mailing List Contact: Robert B. Howard, Chief, NEPA Compliance Section, Environmental Assessment Branch, EAB-4, US EPA Region IV, 345 Courtland Street NE., Atlanta, Georgia 30365. Telephone: (404) 374-7109 or (FTS) 257-3776.

Need for Action: The EPA, the City of Tallahassee, and the Leon County Board of County Commissioners previously determined the need to reevaluate the selected alternative in the Tallahassee-

Leon County Wastewater Management EIS (1983). Subsequent to the initial public scoping meeting held April 19, 1988, the City of Tallahassee and the USFS have decided to examine the possibility of exchanging land to be used for new irrigation sprayfields. Population and sewage flow projections and alternative locations of treatment facilities and irrigation sprayfields will be addressed. The results of the EIS supplement will be used in determining EPA 201 Construction Grant funding eligibility and the acceptability of transfer of lands to the City of Tallahassee by the USFS.

Alternatives: The EIS supplement will examine the feasible long-term alternatives for wastewater management in the study area including proposed land exchange alternatives.

Scoping: A scoping meeting to address issues that should be considered regarding possible land exchanges with the USFS will be held on November 15, 1988 at 7:30 pm at the Tallahassee City Commission Chambers. Input to the EIS supplement may also be submitted in writing to the contact person listed above. Participation in the EIS process is invited from individuals, organizations, and government agencies. Persons wishing to be included on the mailing list to receive a copy of the draft EIS supplement should write to the same address.

Estimated Date of Draft EIS Release: July 1989.

Responsible Official: Greer Tidwell, Regional Administrator.

Dated: October 25, 1988.

Richard E. Sanderson,

Director, Office of Federal Activities.

[OPP-36165; FRL-3469-3]**Pesticide Registration; Availability For Comment**

AGENCY: Environmental Protection Agency (EPA).

ACTION: Notice of availability of draft Standards for comment.

SUMMARY: This notice announces the availability of draft pesticide Registration Standard documents for comment. The Agency has completed a review of the listed pesticides and is making available documents describing its regulatory conclusions and actions.

DATE: Written comments on the Registration Standards should be

submitted on or before December 27, 1988.

ADDRESSES: Three copies of comments identified with the docket number listed with the Registration Standard should be submitted to: By mail: Public Information Branch, Field Operations Division (TS-757C), Office of Pesticide Programs, Environmental Protection Agency, 401 M Street SW., Washington, DC 20460.

In person, deliver comments to: Rm. 246, CM #2, 1921 Jefferson Davis Highway, Arlington, VA.

Information submitted as a comment in response to this notice may be claimed confidential by marking any part or all of that information as "Confidential Business Information" (CBI). Information so marked will not be disclosed except in accordance with the procedures set forth in 40 CFR Part 2. A copy of the comment that does not contain CBI must be submitted for inclusion in the public docket.

Information not marked confidential will be included in the public docket without prior notice. The public docket and docket index will be available for public inspection in Rm. 246 at the address given above, from 8 a.m. to 4 p.m., Monday through Friday, excluding legal holidays.

FOR FURTHER INFORMATION CONTACT: To request a copy of a Registration Standard, contact the Public Information Branch, in Rm. 246 at the address given above (703-557-2805). Requests should be submitted no later than November 28, 1988 to allow sufficient time for receipt before the close of the comment period.

For technical questions related to the Registration Standard, contact the Production Manager listed for that Standard, at the phone number given.

SUPPLEMENTARY INFORMATION: The Environmental Protection Agency conducts a systematic review of pesticides to determine whether they meet the criteria for continued registration under section 3(c)(5) of the Federal Insecticide, Fungicide, and Rodenticide Act (FIFRA). That review culminates in the issuance of a Registration Standard, a document describing the Agency's regulatory conclusions and positions on the continued registrability of the pesticide. In accordance with 40 CFR 155.34(c), before issuing certain Registration Standards, the Agency makes the draft document available for public comment.

Draft Registration Standards for the following pesticides are now available:

Name of pesticide	Docket number	Contact person
Methidathion	950-37-8	Dennis Edwards, Product Manager 12, 703-557- 2386.
Chlorothalonil	1897-45-6	Lois Rossi, Product Manager 21, 703-557- 1900.

Copies of the Registration Standards may be obtained from the Agency at the address listed under FOR FURTHER INFORMATION CONTACT. Because of the length of the Standards and the limited number of copies available for distribution, only one copy can be provided by mail to any one individual or organization. The Registration Standards are also available for inspection and copying in EPA Regional offices at the addresses listed below after November 28, 1988.

BILLING CODE 6560-50-M

[OPTS-62069; FRL-3469-2]

Receipt of Application for Approval to Dispose of Polychlorinated Biphenyls

AGENCY: Environmental Protection Agency (EPA).

ACTION: Notice of receipt of application.

SUMMARY: EPA Headquarters has received an application from AmerEco Environmental Services, Inc. (AmerEco), Kingsville, Missouri, for nationwide approval to dispose of polychlorinated biphenyls (PCBs) using a mobile modular rotary kiln incinerator. This approval process is done under the authority of section 6(e) of the Toxic Substances Control Act (TSCA). EPA is notifying interested persons of the request, and comments may be submitted.

DATE: Comments should be received by November 28, 1988.

ADDRESS: Three copies of written comments should be addressed to: TSCA Document Processing Center (TS-790), Office of Toxic Substances, Environmental Protection Agency, Rm. L-100, 401 M St., SW., Washington, DC 20460.

Comments should bear the identifying notation OPTS-62069. The application (without confidential business information) and comments received in response to this notice are available for public inspection and copying in Rm. NE-G004 at the address noted above from 8 a.m. to 4 p.m. Monday through Friday, except legal holidays.

FOR FURTHER INFORMATION CONTACT: Michael M. Stahl, Director, TSCA Assistance Office (TS-799), Office of Toxic Substances, Environmental Protection Agency, Rm. EB-44, 401 M St., SW., Washington, DC 20460, (202-554-1404), TDD-(202-554-0551).

SUPPLEMENTARY INFORMATION: Under 40 CFR 761.60(e), the Regional Administrators and the Assistant Administrator for Pesticides and Toxic Substances (OPTS) share the approval authority for permitting alternative PCB disposal technologies. A Regional Administrator determines whether to approve an application when the disposal will take place in that region only or, in the case of research and development (R and D), on PCB disposal methods involving less than 500 pounds of PCB material. The Assistant

Administrator for OPTS determines whether to approve applications for mobile and other types of PCB disposal technologies that may be operated in more than one region or, in the case of R and D, on disposal methods involving 500 pounds or more of material. Notwithstanding, the Assistant Administrator for OPTS may delegate the authority to review and approve any aspect of a disposal system to OPTS staff or to a Regional Administrator. The rationale for permit approval authority is discussed in "Polychlorinated Biphenyls (PCBs); Procedural Amendment of the Approval Authority for PCB Disposal Facilities and Guidance for Obtaining Approval," published in the *Federal Register* of March 30, 1983 (48 FR 13181)..

In general, EPA may approve alternative methods of PCB disposal if they achieve a level of performance equivalent to an incinerator approved under 40 CFR 761.70 or a high efficiency boiler approved under 40 CFR 761.60 and will not present an unreasonable risk of injury to health or the environment. EPA also imposes some protective conditions requiring the application to address such items as testing of all gaseous, liquid, and solid effluent streams for PCBs and any other contaminants which may potentially contribute to the environmental risk of operating the disposal unit. To obtain a permit for an alternative method of PCB disposal, the applicant must supply detailed technical descriptions and drawings of the site, process and control equipment, monitoring and sampling methods, quality assurance plan, and emergency and contingency measures, as well as a full discussion of all cleanup and closure procedures.

When EPA Headquarters receives a permit application, it reviews the application and determines if the permit application is complete. If the application is not acceptable, EPA lists its deficiencies in a letter to the applicant and the applicant can remedy the application. If the application is acceptable, a determination is made whether a process demonstration is needed. If one is needed, the applicant must submit a demonstration test plan to the Agency. After receipt of the process demonstration test plan, EPA either approves, requires modification or additions to the process demonstration test plan, or disapproves it and notifies the applicant. Once the Agency accepts a process demonstration test plan, a demonstration test approval is issued by EPA. As part of this approval, the applicant will be required to give advance written notice of at least 30

days to the EPA regional office and State and local governments where the process demonstration will take place. This 30-day period provides the public an opportunity to discuss local issues related to the planned disposal operation and provides the EPA regional office with information necessary for effective monitoring for compliance with the demonstration approval. If the application cannot be approved because the process demonstration test fails, the problems with the process demonstration are addressed on a case-by-case basis.

EPA will grant or deny approval for full scale operation based on a review of the application package, demonstration test results, and other submitted information. Approval for operation will contain special conditions that EPA finds necessary to protect human health or the environment. It also requires compliance with all applicable State, local, or other Federal requirements. The PCB disposal approval decision process (from receipt of the permit application to issuance of a final approval) generally can take from 6 months to 1 year, depending on the quality of information submitted by the applicant and the complexities involved. If a permit is issued for more than one site, 30-day notice is required before operation may begin at any site other than where the process demonstration took place.

The application from AmerEco is for nationwide permission to operate a mobile rotary kiln incinerator for the destruction of PCB wastes including solids, sludges, and liquids. This process is based on an existing system design currently operating in Europe.

In determining whether to approve this application, EPA will take into consideration, along with other factors, the comments received on the application.

Dated: October 20, 1988.

Martin P. Halper,

*Director, Exposure Evaluation Division,
Office of Toxic Substances.*

Fuels and Fuel Additives; Modification of a Fuel Waiver Granted to the Texas Methanol Corporation

AGENCY: Environmental Protection Agency (EPA).

ACTION: Notice.

SUMMARY: The Environmental Protection Agency has reconsidered a portion of a fuel waiver granted under section 211(f)

of the Clean Air Act to the Texas Methanol Corporation (Texas Methanol) (53 FR 3636, February 8, 1988, and 53 FR 17977, May 19, 1988). Today's notice approves the use of an alternative corrosion inhibitor, DMA-67, in Texas Methanol's gasoline-alcohol fuel, OCTAMIX.

ADDRESS: Copies of the information relative to this request are available for inspection in public docket EN-87-06 at the Central Docket Section (LE-131A) of the EPA, South Conference Center, Room 4, 401 M Street, SW., Washington, DC, (202) 382-7548, between the hours of 8:00 a.m. and 4:00 p.m. As provided in 40 CFR Part 2, a reasonable fee may be charged for copying materials in the docket.

FOR FURTHER INFORMATION CONTACT: Sylvia I. Correa, Attorney/Advisor, Field Operations and Support Division (EN-397F), U.S. Environmental Protection Agency, 401 M Street, SW., Washington, DC. 20460, (202) 383-2635.

SUPPLEMENTARY INFORMATION:

I. Background

Section 211(f)(1) of the Clean Air Act (Act), 42 U.S.C. 7545(f)(1), makes it unlawful for any manufacturer of any fuel or fuel additive to first introduce into commerce or to increase the concentration in use of any fuel or fuel additive for general use in light-duty motor vehicles manufactured after model year 1974, which is not substantially similar to any fuel or fuel additive utilized in the certification of any model year 1975, or subsequent model year, vehicle or engine under section 206 of the Act. Section 211(f)(4) of the Act, 42 U.S.C. 7545(f)(4), provides that the Administrator of EPA, upon application of any manufacturer of any fuel or fuel additive, may waive the prohibitions established under section 211(f)(1), if the Administrator determines that the applicant has established that such fuel or fuel additive or a specified concentration thereof, and the emission products of such fuel or additive or specified concentration thereof, will not cause or contribute to a failure of any emission control device or system (over the useful life of any vehicle in which such device or system is used) to achieve compliance by the vehicle with the emission standards with respect to which it has been certified pursuant to section 206 of the Act. The same section specifies that if the Administrator does not act to grant or deny an application within 180 days of receipt of the application, the waiver authorized by section 211(f)(4) shall be treated as granted.
