Title 3—

Proclamation 5770 of February 10, 1988

The President

National Child Passenger Safety Awareness Week, 1988

By the President of the United States of America

A Proclamation

Motor vehicle crashes are a major cause of death and disabling injury for America's children. The best way to protect children in automobiles is to use child safety seats and other safety restraints on every trip. We must alert parents and concerned citizens of the critical need to make child passenger safety a priority in every community, and we should recognize the thousands of people throughout our Nation who do so as they take part in programs and activities in support of National Child Passenger Safety Awareness Week. Fittingly, this special week falls just before Valentine's Day, when we express love and appreciation to family and friends.

Many people may be unaware that child passenger protection laws requiring the use of child safety seats and belt systems are in place in all 50 States and the District of Columbia. Correctly used, child safety seats are highly effective, reducing the risk of fatality among children under four by about 70 percent and of serious injury by about 67 percent. For older children, studies of the effectiveness of belt systems indicate that they can reduce the risk of fatalities and serious injuries by 40 to 55 percent.

Effective child passenger protection requires awareness that the efficacy of child safety seats and belt systems depends on their correct installation and use. A nationwide effort is underway to boost correct child seat use to 70 percent or higher by 1990 through increasing public awareness and enforcement of child passenger protection laws and alerting parents about the importance of installing the restraints correctly and securing their children in them properly on every trip. With added concern for the proper installation and consistent use of these safety devices, we can prevent tragedies and save the lives of hundreds of children every year.

To encourage the people of the United States to protect their children properly in child safety seats and belt systems; to encourage safety and law enforcement agencies and others to promote greater use of these essential safety devices; and to inform the public about the serious dangers children can face as automobile passengers and the importance of child safety protection devices and their correct use, the Congress, by House Joint Resolution 402, has designated the week of February 7-13, 1988, as "National Child Passenger Safety Awareness Week" and authorized and requested the President to issue a proclamation in observance of this week.

NOW, THEREFORE, I, RONALD REAGAN, President of the United States of America, do hereby proclaim the week of February 7-13, 1988, as National Child Passenger Safety Awareness Week. I ask all Americans to make sure that their children are fully protected by the correct use of child passenger protection devices. I call upon concerned citizens and government officials to observe this week with appropriate ceremonies and activities in reaffirmation of our commitment to universal and correct use of child passenger protection devices.

IN WITNESS WHEREOF, I have hereunto set my hand this tenth day of February, in the year of our Lord nineteen hundred and eighty-eight, and of the Independence of the United States of America the two hundred and twelfth.

Ronald Reagan

DEPARTMENT OF AGRICULTURE

Agricultural Marketing Service

7 CFR Part 907

[Navel Orange Regulation 672]

Navel Oranges Grown in Arizona and Designated Part of California; Limitation of Handling

AGENCY: Agricultural Marketing Service, USDA.

ACTION: Final rule.

SUMMARY: Regulation 672 establishes the quantity of California Arizona navel oranges that may be shipped to market during the period February 12 through February 18, 1988. Such action is needed to balance the supply of fresh navel oranges with the demand for such oranges during the period specified due to the marketing situation confronting the orange industry.

DATE: Regulation 672 (§ 907.972) is effective for the period February 12 through February 18, 1988.

FOR FURTHER INFORMATION CONTACT: Raymond C. Martin, Section Head, Volume Control Programs, Marketing Order Administration Branch, F&V, AMS, USDA, Room 2528-S, P.O. Box 96456, Washington, DC 20090-6456; telephone: (202) 447-5120.

SUPPLEMENTARY INFORMATION: This final rule is issued under Marketing Order 907 [7 CFR Part 907], as amended, regulating the handling of navel oranges grown in Arizona and designated part of California. This order is effective under the Agricultural Marketing Agreement Act of 1937, as amended, hereinafter referred to as the Act.

This final rule has been reviewed under Executive Order 12291 and Departmental Regulation 1512-1 and has

been determined to be a "non-major" rule under criteria contained therein.

Pursuant to requirements set forth in the Regulatory Flexibility Act (RFA), the Administrator of the Agricultural Marketing Service (AMS) has considered the economic impact of the use of volume regulations on small entities as well as larger ones.

The purpose of the RFA is to fit regulatory actions to the scale of business subject to such actions in order that small businesses will not be unduly or disproportionately burdened. Marketing orders issued pursuant to the Act, and rules issued thereunder, are unique in that they are brought about through group action of essentially small entities acting on their own behalf. Thus, both statutes have small entity orientation and compatibility.

There are approximately 123 handlers of California-Arizona navel oranges subject to regulation under the navel orange marketing order, and approximately 4,065 producers in California and Arizona. Small agricultural producers have been defined by the Small Business Administration [13 CFR 121.2] as those having annual gross revenues for the last three years of less than \$500,000, and small agricultural service firms are defined as those whose gross annual receipts are less than \$3,500,000. The majority of handlers and producers of California-Arizona navel oranges may be classified as small entities.

This action is consistent with the marketing policy for 1987-88 adopted by the Navel Orange Administrative Committee (Committee). The Committee met publicly on February 9, 1988, in Los Angeles, California, to consider the current and prospective conditions of supply and demand and unanimously recommended a quantity of navel oranges deemed advisable to be handled during the specified week. The Committee reports that the demand for navel oranges is improving.

Based on consideration of supply and market conditions, and the evaluation of alternatives to the implementation of prorate regulations, the Administrator of the AMS has determined that this final rule will not have a significant economic impact on a substantial number of small entities.

Pursuant to 5 U.S.C. 553, it is further found that it is impracticable,

unnecessary, and contrary to the public interest to give preliminary notice and engage in further public procedure with respect to this action and that good cause exists for not postponing the effective date of this action until 30 days after publication in the Federal Register because of insufficient time between the date when information became available upon which this regulation is based and the effective date necessary to effectuate the declared policy of the Act. Interested persons were given an opportunity to submit information and views on the regulation at an open meeting. To effectuate the declared purposes of the Act, it is necessary to make this regulatory provision effective as specified, and handlers have been apprised of such provision and the effective time.

Lemons Grown in California and Arizona; Limitation of Handling**AGENCY:** Agricultural Marketing Service, USDA.**ACTION:** Final rule.

SUMMARY: Regulation 600 establishes the quantity of fresh California-Arizona lemons that may be shipped to market at 250,000 cartons during the period February 14 through February 20, 1988. Such action is needed to balance the supply of fresh lemons with market demand for the period specified, due to the marketing situation confronting the lemon industry.

DATES: Regulation 600 (§ 910.900) is effective for the period February 14 through February 20, 1988.

FOR FURTHER INFORMATION CONTACT: Raymond C. Martin, Section Head, Volume Control Programs, Marketing Order Administration Branch, F&V, AMS, USDA, Room 2523, South Building, P.O. Box 96456, Washington, DC 20090-6456; telephone: (202) 447-5697.

SUPPLEMENTARY INFORMATION: This final rule has been reviewed under Executive Order 12291 and Departmental Regulation 1512-1 and has been determined to be a "non-major" rule under criteria contained therein.

Pursuant to requirements set forth in the Regulatory Flexibility Act (RFA), the Administrator of the Agricultural Marketing Service has determined that this action will not have a significant economic impact on a substantial number of small entities.

The purpose of the RFA is to fit regulatory action to the scale of business subject to such actions in order that small businesses will not be unduly or disproportionately burdened. Marketing orders issued pursuant to the Agricultural Marketing Agreement Act, and rules issued thereunder, are unique in that they are brought about through group action of essentially small entities acting on their own behalf. Thus, both statutes have small entity orientation and compatibility.

This regulation is issued under Marketing Order No. 910, as amended [7 CFR Part 910] regulating the handling of lemons grown in California and Arizona. The order is effective under the Agricultural Marketing Agreement Act (the "Act," 7 U.S.C. 601-674), as amended. This action is based upon the recommendation and information submitted by the Lemon Administrative Committee and upon other available information. It is found that this action

will tend to effectuate the declared policy of the Act.

This regulation is consistent with the marketing policy for 1987-88. The committee met publicly on February 9, 1988, in Los Angeles, California, to consider the current and prospective conditions of supply and demand and recommended, by an 8-4 vote, a quantity of lemons deemed advisable to be handled during the specified week. The committee reports that the market for lemons is improving.

Pursuant to 5 U.S.C. 553, it is further found that it is impracticable, unnecessary, and contrary to the public interest to give preliminary notice and engage in further public procedure with respect to this action and that good cause exists for not postponing the effective date of this action until 30 days after publication in the *Federal Register* because of insufficient time between the date when information became available upon which this regulation is based and the effective date necessary to effectuate the declared purposes of the Act. Interested persons were given an opportunity to submit information and views on the regulation at an open meeting. It is necessary, in order to effectuate the declared purposes of the Act, to make these regulatory provisions effective as specified, and handlers have been apprised of such provisions and the effective time.

NUCLEAR REGULATORY COMMISSION

10 CFR Parts 30, 40, 60, 61, 70, 71, 72, 73, 74 and 110

Relocation of NRC Offices—NMSS, OI, and GPA

AGENCY: Nuclear Regulatory Commission.

ACTION: Final rule.

SUMMARY: The Nuclear Regulatory Commission (NRC) is amending its regulations to indicate that its Offices of Nuclear Material Safety and Safeguards (NMSS) and Investigations (OI) and portions of the Office of Governmental and Public Affairs (GPA) have relocated at the agency's new office building located at One White Flint North in Rockville, Maryland. These amendments are being made to inform NRC licensees and members of the public of the relocation of these offices.

EFFECTIVE DATE: February 12, 1988.

FOR FURTHER INFORMATION CONTACT: Donnie H. Grimsley, Director, Division of Rules and Records, Office of Administration and Resources Management, U.S. Nuclear Regulatory Commission, Washington, DC 20555, Telephone: 301-492-7211.

SUPPLEMENTARY INFORMATION: On January 20, 1988 (53 FR1531), the NRC

published a general notice announcing that as of January 11, 1988, the Office of NMSS had relocated at the agency's new office building located at One White Flint North, 11555 Rockville Pike, Rockville, Maryland. The notice also announced that effective January 15, the Office of GPA's State, Local, and Indian Tribe Programs and International Programs had relocated at One White Flint North. The remainder of GPA, including Public Affairs and Congressional Affairs, will relocate at the new building in late February 1988. In addition, effective January 19, 1988, the NRC's Office of Investigations has been relocated at One White Flint North.

Because these amendments deal solely with the relocation of agency personnel, the notice and comment provisions of the Administrative Procedure Act do not apply under 5 U.S.C. 553(b)(A). These amendments are effective upon publication in the **Federal Register**. Good cause exists to dispense with the usual 30-day delay in the effective date, because these amendments are of a minor and administrative nature, dealing with the relocation of agency personnel.

Environmental Impact: Categorical Exclusion

The NRC has determined that this final rule is the type of action described in categorical exclusion 10 CFR 51.22(c)(2). Therefore, neither an environmental impact statement nor an environmental assessment has been prepared for this final rule.

Paperwork Reduction Act Statement

This final rule contains no information collection requirements and therefore is not subject to the requirements of the Paperwork Reduction Act of 1980 (44 U.S.C. 3501 et seq.).
