BILLING CODE 3410-34-M

FEDERAL RESERVE SYSTEM

12 CFR Parts 207, 220, 221 and 224

Regulations G, T, U and X; Securities Credit Transactions; List of Marginable OTC Stocks; List of Foreign Margin Stocks

AGENCY: Board of Governors of the Federal Reserve System.

ACTION: Final rule; determination of applicability of regulations.

SUMMARY: The List of Marginable OTC Stocks (OTC List) is comprised of stocks traded over-the-counter (OTC) in the United States that have been determined by the Board of Governors of the Federal Reserve System to be subject to the margin requirements under certain Federal Reserve regulations. The List of Foreign Margin Stocks (Foreign List) represents all foreign equity securities that have met the Board's eligibility criteria under Regulation T. The OTC List and the Foreign List are published four times a year by the Board. This document sets forth additions to or deletions from the OTC List and additions to the Foreign List previously published and effective on August 13, 1990.

EFFECTIVE DATE: November 13, 1990.

FOR FURTHER INFORMATION CONTACT: Peggy Wolffrum, Securities Regulation Analyst, Division of Banking Supervision and Regulation, (202) 452–2781, Board of Governors of the Federal Reserve System, Washington, DC 20551. For the hearing impaired only, Earnestine Hill or Dorothea Thompson, Telecommunications Device for the Deaf (TDD) (202) 452–3544.

SUPPLEMENTARY INFORMATION: Two categories of stock information are listed below. The first group represents additions to or deletions from the OTC List. This supersedes the last OTC List which was effective August 13, 1990. Additions and deletions to the OTC List were published on August 2, 1990 (55 FR 31367). A copy of the complete OTC List incorporating these additions and deletions is available from the Federal Reserve Banks.

The OTC List includes those stocks that meet the criteria in Regulations G, T and U (12 CFR parts 207, 220 and 221, respectively). This determination also affects the applicability of Regulation X (12 CFR part 224). These stocks have the degree of national investor interest, the depth and breadth of market, and the availability of information respecting the stock and its issuer to warrant regulation in the same fashion as exchange-traded securities. The OTC List also includes any OTC stock designated under a Securities and Exchange Commission (SEC) rule as qualified for trading in the national market system (NMS security). Additional OTC stocks may be designated as NMS securities in the interim between the Board's quarterly publications. They will become automatically marginable at broker-dealers upon the effective date of their NMS designation. The names of these stocks are available at the Board and the SEC and will be incorporated into the Board's next quarterly publication of the OTC List.

The second group of securities, represents additions to the Board's Foreign List that are now eligible for margin treatment at broker-dealers pursuant to a recent amendment to Regulation T (12 CFR Part 220). (*See* **Federal Register** of March 27, 1990, at page 11158 for Board action.) These additional foreign equity securities have met the Board's requirements pursuant to Regulation T and are now eligible for margin at broker-dealers on the same basis as domestic margin securities. A copy of the complete Foreign List incorporating these additions is available from the Reserve Banks.

Public Comment and Deferred Effective Date

The requirements of 5 U.S.C. 553 with respect to notice and public participation were not followed in connection with the issuance of this amendment due to the objective character of the criteria for inclusion and continued inclusion on the Lists specified in 12 CFR 207.6 (a) and (b), 220.17 (a), (b), (c) and (d), and 221.7 (a) and (b). No additional useful information would be gained by public participation. The full requirements of 5 U.S.C. 553 with respect to deferred effective date have not been followed in connection with the issuance of this amendment because the Board finds that it is in the public interest to facilitate investment and credit decisions based in whole or in part upon the composition of these Lists as soon as possible. The Board has responded to a request by the public and allowed a two-week delay before the Lists are effective.

List of Subjects

Listing of Color Additives for Coloring Contact Lenses; 1,4-Bis[4-(2-Methacryloxyethyl) Phenylamino] Anthraquinone; Confirmation of Effective Date

AGENCY: Food and Drug Administration, HHS.

ACTION: Final rule; confirmation of effective date.

SUMMARY: The Food and Drug Administration (FDA) is confirming the effective date of August 27, 1990, for the final rule that amended the color additive regulations to provide for the safe use of 1,4-bis[4-2-methacryloxyethyl) phenylamino] anthraquinone; for coloring contact lenses.

DATES: Effective date confirmed: August 27, 1990.

FOR FURTHER INFORMATION CONTACT: Sandra L. Varner, Center for Food Safety and Applied Nutrition (HFF-335), Food and Drug Administration, 200 C St. SW., Washington, DC 20204, 202-472-5690.

SUPPLEMENTARY INFORMATION: In the Federal Register of July 25, 1990 (55 FR 30212), FDA amended 21 CFR part 73 of the color additive regulations by adding § 73.3106 to provide for the safe use of 1,4-bis[4-2-methacryloxyethyl) phenylamino] anthraquinone; for coloring contact lenses.

FDA gave interested persons until August 24, 1990, to file objections or requests for a hearing. The agency received no objections or requests for a hearing on the final rule. Therefore, FDA finds that the final rule published in the **Federal Register** of July 25, 1990, should be confirmed.

New Animal Drug Applications; Approval of Supplemental Applications

AGENCY: Food and Drug Administration; HHS.

ACTION: Final rule.

SUMMARY: The Food and Drug Administration (FDA) is establishing a regulation regarding the approval of supplemental new animal drug applications (NADA's). The regulation provides that FDA will ordinarily approve certain supplemental NADA's without reevaluating the safety or effectiveness data in the parent NADA. For other supplemental NADA's, FDA may reevaluate certain portions or all of the data in the parent NADA and may require submission of new data prior to approval. The regulation will permit FDA to improve internal procedures for processing supplemental applications and will permit expeditious implementation of changes that will provide immediate public health protection. In a separate notice in this issue of the **Federal Register**, FDA is also making available guidelines as aids in the implementation of the new policy.

EFFECTIVE DATE: December 3, 1990.

FOR FURTHER INFORMATION CONTACT: Steven D. Brynes, Center for Veterinary Medicine (HFV-144), Food and Drug Administration, 5600 Fishers Lane, Rockville, MD 20857, 301-443-2841.

SUPPLEMENTARY INFORMATION: In the **Federal Register** of December 23, 1977 (42 FR 64367), FDA proposed new § 514.106 *Approval of supplemental applications*, which sets out principles and criteria for implementing a new policy on the approval of supplemental NADA's. The preamble to the 1977 proposal included FDA's responses to comments submitted in response to an advance notice of proposed rulemaking that had been published in the **Federal Register** of November 12, 1976 (41 FR 50003). An NADA sponsor must submit a supplemental application when the sponsor proposes changes in the original application. The possible changes range from those that would make a significant change in a drug's conditions of use to those that have little or no potential for affecting the drug's safety or effectiveness. FDA has specified when a supplemental application is required and the procedures to be followed in 21 CFR 514.8.

I. Summary of the Proposed and Final Rules

A. The Proposed Rule

The proposed rule provided that FDA would approve certain supplemental NADA's without a complete reevaluation of the underlying safety and effectiveness data when, among other things, the approval posed no increased human risk from exposure to the drug. The proposal represented a change in the agency's policy with regard to supplemental applications. Historically, FDA had viewed the approval of a supplemental NADA as constituting an affirmation that all safety and effectiveness information in the parent application was scientifically adequate by current standards. Accordingly, the agency concluded that it was required to reevaluate all the underlying safety and effectiveness data in the parent NADA when a sponsor submitted a supplemental application and to refuse approval unless current standards were met. However, application of this policy meant delays in FDA's action on supplemental applications for changes that would provide additional public protection. It also meant that the review of safety and effectiveness data in previously approved NADA's was triggered by events beyond the agency's control and did not necessarily occur in a rational, scheduled manner.

The proposed regulation was designed to provide a practical solution to these problems. The proposal provided that the underlying data would not be reviewed if the change proposed by the supplemental application did not increase risk from exposure to the drug. It established three categories of supplemental applications: those that would not require reevaluation of the underlying data; those that would require such reevaluation; and those that might or might not require the reevaluation, depending on the circumstances of the particular application. The agency concluded that, if it did not review the underlying data, approval of the supplement would not imply reaffirmation of the drug's safety and effectiveness by current standards. As part of the decision to revise its supplemental policy, the agency decided to institute a systematic reevaluation of the underlying data that supported all previously approved NADA's; this program was to be known as the cyclic review. The agency also noted that other factors, such as the availability of new information concerning the drug, would continue to trigger a full review of the safety and effectiveness data in an approved NADA (known as a causal review), whether or not a supplemental application had been submitted.

B. Comment, Litigation, and Experience

FDA received two comments on the proposed rule (the comment period closed March 23, 1978 (43 FR 9829; March 10, 1978)). The agency has carefully evaluated the comments, and its response is set forth below. As explained in the preamble to the proposed rule, the agency has, since it issued the advanced notice in 1976, implemented the revised policy on a case-by-case basis. Also, as described further below, the agency has, since publication of the proposed rule, made certain changes in its case-by-case approval of supplemental applications. Further, the evolution of the agency's supplemental policy has been influenced by two cases decided by Federal courts; these cases are also discussed below.

The final rule is based on the comments received, the agency's experience in the implementation of its supplemental policy over more than a decade, the aforementioned litigation, and other considerations as explained in this preamble, in addition to the rationale explained in the advance notice and the preamble to the proposed rule.

During the course of implementing its supplemental policy, FDA has developed guidelines that may be used in deciding whether, when reviewing a supplemental application, it is necessary to review the data in the original
